Personal Author Index

Authors' surnames are indexed in the form appearing in the publication cited; given names generally have been reduced to initials. For documents with multiple authors, each author name is indexed. The entry for a primary author (first author listed on an abstracted document) includes the full document title and citation number. Entries for other authors provide a cross-reference to the primary author. Also included is information on the document type, country of publication, and the document language listed in parentheses in the format (J;FR;In French and English). Accent marks are not input because of computer alphabetization. Spelling and transliteration follow standard conventions.

Subject Index

This index is arranged by subject descriptors selected from those assigned to each citation in this publication. Subject descriptors are selected from a controlled thesaurus of terms, ETDE/PUB–2, *International Energy: Subject Thesaurus*. In order to enhance indexing, subject descriptor entries generally consist of a pair of descriptors: a main term and a qualifier term. Each entry includes the full title (which may be followed by supplementary descriptive information in parentheses) and the citation number. Additional information given in parentheses indicates the document type (an abbreviation such as B for book), the country of publication (such as DE for Federal Republic of Germany), and the language if non-English.

See references guide users from synonymous terms to the descriptors selected for the concept. *See also* references indicate subject concepts that are more specific than a particular descriptor. To gain complete subject coverage, all such terms should be reviewed.

ALUMINIUM FLUORIDES
ALUMINIUM OXIDES
[Diffusion/dispersion transport of chemically reacting species]: Progress report, FY 1992–1993, 18:26050 (R;US)

ALUMINIUM FLUORIDES
Design and performance of the terawatt Cr:$LiSrAlF_6$ laser system, 18:26950 (R;US)

ALUMINIUM OXIDES
Effect of additives on enhanced sintering and grain growth in uranium dioxide, 18:26737 (R;FR;In French)
Microwave hybrid heating of alumina filaments, 18:26759 (R;US)
Microwave sintering of large alumina bodies, 18:26760 (R;US)
Rheology and microstructure of concentrated zirconia-alumina suspensions for gelcasting composites, 18:26743 (R;US)

ALUMINUM
See ALUMINIUM

ALVEOLI (PULMONARY)
See LUNGS

AMBIENT TEMPERATURE
Global climate change modelling, 18:27327 (R;IT;In Italian)

AMERICAN INDIANS
Purity and danger: Protection of Native American religious sites and knowledge in federal development, 18:26414 (R;US)

AMERICIUM
Combined TRU-Sr extraction/recovery process, 18:25678 (R;US)
Experimental studies of actinide volatilities with application to mixed waste oxidation processors, 18:25762 (R;US)
Measurement of plutonium and americium volatilities under thermal process conditions: Final report, 18:26882 (R;US)

AMERICIUM 241
A modeling study of contaminant transport resulting from flooding of Pit 9 at the Radioactive Waste Management Complex, Idaho National Engineering Laboratory, 18:27401 (R;US)
Properties of plutonium-contaminated particles resulting from British Vixen B trials at Maralinga, 18:27383 (R;AU)

AMERICIUM OXIDES
Experimental studies of actinide volatilities with application to mixed waste oxidation processors, 18:25762 (R;US)

AMES LABORATORY
An aerial radiological survey of the Ames Laboratory and surrounding area, Ames, Iowa: Date of survey: July 1991, 18:27400 (R;US)

AMINO ALCOHOLS
See ALCOHOLS

AMMONIA
Ammonia regeneration for a combined lime/ammonia spray dryer for SO_2 control: Final report, 18:25554 (R;US)

Ammonium generation during SRAT cycle, 18:25827 (R;US)
Catalytic activity of oxidized (combusted) oil shale for removal of nitrogen oxides with ammonia as a reductant in combustion gas streams, Part 2, 18:25620 (R;US)
Development of ceramic membrane reactors for high temperature gas cleanup, 18:25504 (RA;US)

AMMONIUM COMPOUNDS
See also AMMONIUM PHOSPHATES
AMMONIUM SULFATES
Travel to the Netherlands to participate in a workshop held by the World Inventory of Soil Emissions (WISE) project at the International Soil Reference and Information Centre (ISRIC): Foreign trip report, August 22–29, 1992, 18:27439 (R;US)

AMMONIUM PHOSPHATES
Mechanical properties of magnesium ammonium phosphate cements and their zeolite composites, 18:26771 (R;US)

AMMONIUM SULFATES
Desulfurization and denitrification technologies suitable for developing countries, 18:25552 (IA;JP;In Japanese)
Utilization of by-product ammonium sulfate, 18:26540 (R;US)

ANADROMOUS FISHES
See also SALMON
STRIPED BASS
Integrated hatchery operations team: Operation plans for anadromous fish production facilities in the Columbia River Basin: Annual report 1992, Volume 3, 18:25985 (R;US)

ANAEROBIC DIGESTION
Agro-industrial anaerobic digestion cost benefits: Technology utilization in distillery, 18:25980 (R;IT;In Italian)
Pre-and after-treatment of household wastes which have been sorted at the source for use in the production of biogas, 18:25956 (R;DK;In Danish)

ANALOG-TO-DIGITAL CONVERTERS
Center of trace algorithms for extracting digitized waveforms from two-dimensional images, 18:26908 (R;US)

ANALYSIS (THERMAL)
See THERMAL ANALYSIS

ANEMOMETERS
Doppler velocimeter: Design proposal (part 2), 18:26059 (R;IT;In Italian)

ANHARMONIC CRYSTALS
Crystal anharmonicity in Li(H,D) and Na(H,D) systems, 18:27902 (R;XA)

ANIONS
Columbia River monitoring: Summary of chemical monitoring along cross sections at Vernita Bridge and Richland, 18:27455 (R;US)

ANL
Developing and implementing a software management program, 18:28129 (RA;US)

ANODES
Fabrication of advanced design (grooved) cermet anodes, 18:26767 (R;US)

ANTARCTICA
[Environmental impact analyses on current and planned Antarctic operations and research activities]: Foreign trip report, October 19–November 20, 1992, 18:27444 (R;US)
[Travel to US field stations in Antarctica in preparation for environmental impact studies]: Foreign trip report, January 4–February 22, 1993, 18:27445 (R;US)

ANTIKAONS
New data on the KK-bar threshold region and the nature of the $f_0(S^*)$, 18:27808 (R;GB)

ANTIMICROBIAL AGENTS
Fate of trypanocidal drugs in cattle (chemotherapy of trypanosomiasis). Kenya: Terminal report. Report prepared for the Government of Kenya, 18:27590 (R;XA)

ANTIMUONS
See MUONS PLUS

ANTINEUTRINO-ELECTRON INTERACTIONS
Conserved-vector-current hypothesis and the ν-bar$_e$e-bar$\rightarrow\pi^-\pi^0$ process, 18:27787 (R;RU)

ANTIPROTON BEAMS
Observation of the coalescing of beam into an asymmetric rf bucket by stochastic cooling, 18:27001 (R;US)

ANTIPROTON SOURCES
The design and performance of a high sensitivity loss monitor system for use in the Fermilab antiproton rings, 18:27051 (R;US)

APARTMENT BUILDINGS
Central heating in older housing blocks, 18:26550 (R;DK;In Danish)
Green plan of maintenance: Maintenance and resource savings in the cooperative housing association building at Bissensgade/Lundbyesgade, Aarhus, 18:26512 (R;DK;In Danish)
Passive smoke evacuation systems - with reference to Vietnamese multi-storey buildings, 18:27345 (R;SE)
Solar building study. Final report: Christopher Taylor Court, Bournville, Birmingham, 18:26015 (R;GB)

APATITES
Laser and spectroscopic properties of Yb-doped apatite crystals, 18:26959 (R;US)

APPARATUS
See EQUIPMENT

APPLIANCES
See also ELECTRIC APPLIANCES
Investigation on load prediction method for domestic customer, 18:26543 (R;JP;In Japanese)

APS STORAGE RING
See ADVANCED PHOTON SOURCE

AQUATIC ECOSYSTEMS
See also WETLANDS
Acidification of freshwater ecosystems: Foreign trip report, September 25–October 19, 1992, 18:27356 (R;US)
Aquatic model ecosystems for studies of ecological effects of pollution, 18:27496 (R;SE;In Swedish)
Behaviour of endosulfan in a model rice-fish ecosystem, 18:27542 (RA;XA)
Determination of key radionuclides and parameters related to dose from the Columbia River pathway: Hanford Environmental Dose Reconstruction Project, 18:27603 (R;US)
Distribution and effect of ^{14}C-endosulfan in a rice paddy-fish microecosystem, 18:27545 (RA;XA)
Fate of chlorpyrifos in a model rice-fish ecosystem, 18:27548 (RA;XA)
Fate of endosulfan in a rice-fish ecosystem, 18:27543 (RA;XA)
Research on fate of fenitrothion in a rice/fish/azolla ecosystem, 18:27549 (RA;XA)
Residues of ^{14}C-endosulfan in plant, soil, and water of a rice ecosystem, 18:27544 (RA;XA)
Residues of ^{14}C-fenitrothion in a model paddy-fish ecosystem, 18:27550 (RA;XA)
Residues of monocrotophos in a simulated model system, 18:27547 (RA;XA)
Study on residues of ^{14}C-Fenitrothion in a model rice-fish ecosystem and in a field rice-fish ecosystem, 18:27551 (RA;XA)
Subtidal eelgrass/macroalgae surveys for the proposed breakwaters at the US Coast Guard Station at Ediz Hook, Washington, March 1993, 18:27503 (R;US)
Travel to the United Kingdom and Italy to present keynote lectures and technical talks at two international meetings on the role of natural organic matter in the environment and to learn about recent advances in this area relevant to the traveler's research: Foreign trip report, September 10–26, 1992, 18:27440 (R;US)
Valuing the salmon resource: Columbia River stocks under climate change and fishery enhancement, 18:27505 (R;US)

AQUATIC ORGANISMS
See also BENTHOS
FISHES
MOLLUSCS
Subtidal eelgrass/macroalgae surveys for the proposed breakwaters at the US Coast Guard Station at Ediz Hook, Washington, March 1993, 18:27503 (R;US)

AQUIFERS
Demonstration of risk-based decision analysis in remedial alternative selection and design, 18:27465 (R;US)

ARAB REPUBLIC OF EGYPT
See EGYPTIAN ARAB REPUBLIC
ARC FURNACES
Graphite electrode dc arc technology development for treatment of buried wastes, 18:25872 (R;US)
ARGON 40 REACTIONS
Charged particle calorimetry of $^{40}Ar + ^{27}Al$ reactions from 36 to 65 MeV/u, 18:27861 (R;FR)
Excitation energy distributions in fusion reactions induced by Ar projectiles at 50 and 70 MeV/u, 18:27859 (R;FR)
Inversion of collective matter flow and equation of state, 18:27860 (R;FR)
ARGONNE NATIONAL LABORATORY
See ANL
ARGONNE SUPERCONDUCTING LINAC
See ATLAS SUPERCONDUCTING LINAC
ARMS CONTROL
A miniature modular MCA for gamma-ray spectroscopy, 18:27200 (R;US)
Evaluation of three new technolgies for international safeguards, 18:25893 (R;US)
Experimental and theoretical studies of spectral alteration in ultrasonic waves resulting from nonlinear elastic response in rock, 18:27261 (R;US)
Managing nuclear weapons in the United States, 18:26565 (R;US)
Technical specifications manual for the MARK-1 pulsed ionizing radiation detection system: Volume 1, 18:26567 (R;US)
AROMATIC COMPOUNDS
See AROMATICS
AROMATICS

BERYLLIUM
Compatibility behavior of beryllium with $LiAlO_2$ and Li_2ZrO_3 ceramics, with 316L and 1.4914 steels in Sibelius, 18:26582 (R;FR)

Compatibility of stainless steels and lithium based ceramics with beryllium, 18:26581 (R;FR)
Development of beryllium bonds for plasma-facing components, 18:28044 (R;IT)

BERYLLIUM 9
The LAHET code system: Introduction, development, and benchmarking, 18:27871 (R;US)

BERYLLIUM MODERATORS
See BERYLLIUM

BERYLLIUM OXIDES
X-ray effects and swelling of some non-metallic materials after neutron irradiations, 18:26797 (RA;UA;In Russian)

BESSEL DIFFERENTIAL EQUATION
See FOKKER-PLANCK EQUATION

BETA BEAMS (ELECTRONS)
See ELECTRON BEAMS

BETA BEAMS (POSITRONS)
See POSITRON BEAMS

BETA DECAY
Angular correlations in neutron beta decay, 18:27824 (R;US)

BEVALAC
The Bevalac long flattop, 18:26971 (R;US)

BILATERAL AGREEMENTS
Quality assurance programmes and normalization for the Argentine-Brazilian integration, 18:28217 (IA;AR;In Spanish)

BIMETALLIC CORROSION
See ELECTROCHEMICAL CORROSION

BIMETALS
Theory of the negative magnetoresistance in magnetic metallic multilayers, 18:26709 (R;US)

BINARY ALLOY SYSTEMS
A model of the effective lossy medium for a binary alloy under irradiation, 18:26612 (RA;UA)
Calculation of point defect sink strengths in binary and ternary substitutional alloys, 18:26618 (RA;UA)

BINARY FISSION
Fission of spin-aligned projectile-like nuclei in the interactions of 29 MeV/nucleon ^{208}Pb with ^{197}Au, 18:27843 (R;FR)

BIOASSAY
Applied in vitro radio bioassay, 18:27622 (R;BR;In Portuguese)

BIOGAS
See METHANE

BIOLOGICAL INDICATORS
The use of aquatic organisms as environmental indicators, 18:27495 (R;SE;In Swedish)

BIOLOGICAL REACTORS
See BIOREACTORS

BIOLOGICAL TESTING
See BIOASSAY

BIOMASS
IEA Bioenergy. Annual report 1992, 18:26440 (R;SE)
Regional assessment of nonforestry related biomass resources: Alabama, 18:25927 (R;US)
Regional assessment of nonforestry related biomass resources: Arkansas, 18:25928 (R;US)
Regional assessment of nonforestry related biomass resources: Florida, 18:25929 (R;US)
Regional assessment of nonforestry related biomass resources: Georgia, 18:25930 (R;US)
Regional assessment of nonforestry related biomass resources: Kentucky, 18:25931 (R;US)
Regional assessment of nonforestry related biomass resources: Louisiana, 18:25932 (R;US)
Regional assessment of nonforestry related biomass resources: Mississippi, 18:25934 (R;US)
Regional assessment of nonforestry related biomass resources: Missouri, 18:25933 (R;US)
Regional assessment of nonforestry related biomass resources: North Carolina, 18:25935 (R;US)
Regional assessment of nonforestry related biomass resources: South Carolina, 18:25936 (R;US)
Regional assessment of nonforestry related biomass resources: Tennessee, 18:25937 (R;US)
Regional assessment of nonforestry related biomass resources: Virginia, 18:25938 (R;US)
Regional assessment of nonforestry related biomass resources: West Virginia, 18:25939 (R;US)
Regional assessment of nonforestry-related biomass resources, 18:25940 (R;US)
Wood biomass gasification: Technology assessment and prospects in developing countries, 18:25969 (R;IT;In Italian)

BIOMASS CONVERSION PLANTS
Biogas production: (A) The effect of fish oil and bentonite (bleaching clay) on biogas production. (B) Removal of H_2S with the addition of $FeC1_2$ to the manure in biogas production, 18:25957 (R;DK)
Biomass for energy and industry, 18:26477 (R;DK)
Pilot project concerning the establishment of a collective biomass conversion plant on the island of Mors, 18:25958 (R:DK;In Danish)
Technical and economical evaluation of methods for online determination of volatile fatty acids, 18:25960 (I;DK;In Danish)
Thorsoe environmental and biogas plant Amba: Final report (Danish biomass conversion plant), 18:25959 (R;DK;In Danish)

BIOMASS PLANTATIONS
Perennial species for optimum production of herbaceous biomass in the Piedmont (Management study, 1987–1991): Final report, 18:25944 (R;US)

BIOPHYSICS
Radiation physics, biophysics, and radiation biology: Progress report, December 1, 1992–November 30, 1993, 18:27607 (R;US)

BIOREACTORS
Biological production of hydrogen, 18:25925 (RA;US)
Clay enhancement of methane, low molecular weight hydrocarbon and halocarbon conversion by methanotrophic bacteria, 18:27532 (PA;US)
Development of biological coal gasification (MicGAS process), 18:25943 (RA;US)

BIRDS
Belted kingfishers as ecological monitors of contamination: A review, 18:27501 (R;US)
Establishment of a viable population of red-cockaded woodpeckers at the Savannah River Site: Annual report, FY1992, 18:27514 (R;US)

BISETHYLENEDITHIOLOTETRATHIAFULVALENE
See BEDT-TTF

BISMUTH OXIDES
Direct submillimeter absorptivity measurements on epitaxial $Ba_{1-x}K_xBiO_3$ films at 2K, 18:26763 (R;US)

BITTER SPAR
See DOLOMITE

BITUMINOUS COAL
Development of an advanced, continuous mild gasification process for the production of co-products technical evaluation: Final report, 18:25480 (R;US)
Liquid chromatographic analysis of coal surface properties: Quarterly progress report, January–March 1993, 18:25546 (R;US)

BLACK HOLES
A classical instability for black strings and p-branes, 18:27717 (R;US)

BLADES (TURBINES)
See TURBINE BLADES

BLANKETS (BREEDING)
See BREEDING BLANKETS

BLASTS
See EXPLOSIONS

BLOOD
High-speed imaging of blood splatter patterns, 18:27227 (R;US)

BLOWDOWN
WHAM6: Liquid-Filled Piping System Analysis, 18:28157 (CM;US)

BLOWERS
Impact evaluation of an adjustable speed drive installed at Ball-InCon Glass Packaging Corporation under the Energy $avings Plan, 18:26536 (R;US)

BN-600 REACTOR
See BELOYARSK-3 REACTOR
BNL
Environment, safety and health progress assessment of the Brookhaven National Laboratory (BNL), 18:26422 (R;US)
BODY
Current distribution tomography for determination of internal current density distributions, 18:27652 (R;US)
BODY WAVES P (SEISMIC)
See SEISMIC P WAVES
BODY WAVES S (SEISMIC)
See SEISMIC S WAVES
BOGS
See SWAMPS
BOILERS
See also REFUSE-FUELED BOILERS
VAPOR GENERATORS
Current situation in CO2 absorbing and separating pilot plant, 18:26430 (IA;JP;In Japanese)
Development of a chain grate stoker for d-RDF combustion, 18:25965 (R;GB)
Semi-dry type dimplified desulfurizer, 18:25576 (IA;JP;In Japanese)
Thermal conductivity of coal ashes and slags, 18:26102 (RA;US)
BOILING WATER COOLED AND MODERATED REACTOR
See BWR TYPE REACTORS
BOLTZMANN COLLISION INTEGRAL
See BOLTZMANN EQUATION
BOLTZMANN EQUATION
Parallelization of a spherical S_N algorithm based on the spatial domain decomposition, 18:28096 (R;US)
BOLTZMANN TRANSPORT EQUATION
See BOLTZMANN EQUATION
BOLTZMANN-VLASOV EQUATION
Magnetic fusion computing: A personal retrospective view, 18:28026 (R;US)
BOMBS
Computer vision and sensor fusion for detecting buried objects, 18:27242 (R;US)
BONNEVILLE POWER ADMINISTRATION
Impact evaluation of an Energy $avings Plan project at Holnam Incorporated, 18:26535 (R;US)
BOOKKEEPING
See ACCOUNTING
BOOSTERS (PARTICLE)
See PARTICLE BOOSTERS
BOOTSTRAP CURRENT
Numerical simulation of Bootstrap Current, 18:28021 (R;US)
BORANES
A proposed mechanism for the pyrolysis of diborane, 18:26885 (R;US)
BOREHOLES
Mise-a-la-Masse measurements and galvanic connections as a part of flow path investigations at Palmottu U-Th-mineralization, southwestern Finland, 18:27408 (R;FI;In Finnish)
Rapid acquisition of high resolution full wave-field borehole seismic data, 18:27668 (R;US)
BORN-GREEN-YVON EQUATION
See BOLTZMANN EQUATION
BORON
Radiation damage of boron containing materials, 18:26801 (RA;UA;In Russian)
BORON 11 BEAMS
Nuclear fusion of protons with ions of boron, 18:26988 (R;US)
BORON 11 TARGET
Nuclear fusion of protons with ions of boron, 18:28030 (R;US)
BORON CARBIDES
Radiation damage of boron containing materials, 18:26801 (RA;UA;In Russian)
Radiation stability or absorbing compositions with a pyrocarbon binder, 18:26798 (RA;UA;In Russian)
X-ray effects and swelling of some non-metallic materials after neutron irradiations, 18:26797 (RA;UA;In Russian)
BORON HYDRIDES
A proposed mechanism for the pyrolysis of diborane, 18:26885 (R;US)
BORON NITRIDES
Fast-ICCD photography and gated photon counting measurements of blackbody emission from particulates generated in the KrF-laser ablation of BN and YBCO, 18:26739 (R;US)
BOROSILICATE GLASS
Canonical correlation of waste glass compositions and durability, including pH, 18:25823 (R;US)
Effect of composition and temperature on viscosity and electrical conductivity of borosilicate glasses for Hanford nuclear waste immobilization, 18:25750 (R;US)
Relationship between borosilicate glass composition, structure, and durability test response (SRS), 18:25816 (R;US)
BOROSILICATES
See BOROSILICATE GLASS
BOUNDARIES (GRAIN)
See GRAIN BOUNDARIES
BOVINE
See CATTLE
BPA
See BONNEVILLE POWER ADMINISTRATION
BRACKISH WATER ECOSYSTEMS
See AQUATIC ECOSYSTEMS
BRASIMONE PEC REACTOR
See PEC BRASIMONE REACTOR
BREAKWATERS
See DAMS
BREEDING BLANKETS
Reactivity and corrosion properties of metallic lithium candidate blanket breeder for fusion reactors, 18:28059 (R;IT)
BREMSSTRAHLUNG (MAGNETIC)
See SYNCHROTRON RADIATION
BRIDGES
An engineering design study of the transfer bridge for the SSC SDC detector, 18:27130 (R;US)
BRINES
Large-scale brine inflow data report for room Q prior to November 25, 1991, 18:25754 (R;US)
Room Q data report: Test borehole data from April 1989 through November 1991, 18:25753 (R;US)
The effects of latex additions on centrifugally cast concrete for internal pipeline protection, 18:25608 (R;US)
[Diffusion/dispersion transport of chemically reacting species]: Progress report, FY 1992–1993, 18:26050 (R;US)
BRONCHI
^{222}Rn dosimetry in the dog lung, 18:27605 (R;US)
BROOKHAVEN AGS
A γ_t-jump scheme for the Brookhaven AGS, 18:26992 (R;US)
Minimizing linear coupling in AGS with skew quads, 18:26997 (R;US)
On the high intensity aspects of AGS Booster proton operation, 18:27039 (R;US)
Operation of the Brookhaven AGS with the Booster, 18:26963 (R;US)
BROOKHAVEN NATIONAL LABORATORY
See BNL
BROOKHAVEN RHIC
A simulation study of linear coupling effects and their correction in RHIC, 18:27154 (R;US)
Broadband impedance of azimuthally symmetric devices in RHIC, 18:26989 (R;US)
Comparison of aperture determinations on RHIC for single particles tracked 10^6 turns and 100 particles, having randomly generated initial coordinates, tracked for 1000 turns, 18:26990 (R;US)
PHENIX Conceptual Design Report: An experiment to be performed at the Brookhaven National Laboratory Relativistic Heavy Ion Collider, 18:27745 (R;US)
Preliminary studies on a magneto-optical procedure for aligning RHIC magnets, 18:27042 (R;US)
Software development with two port calibration techniques for RHIC impedance measurements, 18:26991 (R;US)

BUBIAG-DIDIER PROCESS

Viscosity
Thermal property correlation package of hydrogen, carbon monoxide, carbon dioxide and methane, 18:26927 (R;JP;In Japanese)
Waste Disposal
Travel to attend the International Energy Agency carbon dioxide symposium at Oxford, United Kingdom: Foreign trip report, March 27–April 3, 1993, 18:25588 (R;US)
Waste Product Utilization
Evaluation of options for CO_2 capture/utilization/disposal, 18:26101 (RA;US)

CARBON DIOXIDE ACCEPTOR PROCESS
See COAL GASIFICATION

CARBON DIOXIDE LASERS
Laser mirrors with variable reflected intensity and uniform phase shift, 18:26938 (R;IT)

CARBON IONS
Metastable enhancement of C^+ and O^+ capture reactions: Final report, 18:27887 (R;US)

CARBON ISOTOPES
See also CARBON 14
Design of a formaldehyde photodissociation process for carbon and oxygen isotope separation, 18:25910 (R;US)

CARBON MONOXIDE
Ion-exchange membranes for bulk separation of acid gases, 18:25510 (RA;US)
Quantum state resolved desorption of CO from solid surfaces: Final technical report, 18:26859 (R;US)
The application of infrared synchrotron radiation to the study of interfacial vibrational modes, 18:26856 (R;US)
Thermal property correlation package of hydrogen, carbon monoxide, carbon dioxide and methane, 18:26927 (R;JP;In Japanese)
[Greenhouse gases and national energy options]: Foreign travel trip report, October 24–November 4, 1992, 18:27275 (R;US)
[Lawrence Berkeley Laboratory] Chemical Sciences Division annual report 1991, 18:26829 (R;US)

CARBON STEELS
DWPF recycle stream corrosion tests, 18:25835 (R;US)
Modeling microstructural evolution and the mechanical response of superplastic materials, 18:26727 (R;US)

CARBON TETRACHLORIDE
A technical approach to groundwater contamination problems, 18:27381 (R;US)
Cost/benefit analysis comparing ex situ treatment technologies for removing carbon tetrachloride from Hanford groundwater, 18:27451 (R;US)
Fiber optic spectrochemical emission sensor: Detection of volatile chlorinated compounds in air and water using ultrathin membranes, 18:27457 (R;US)

CARBONACEOUS MATERIALS
See also COAL
Catalytic gasification fundamentals, 18:25482 (RA;US)
Change of carbon fibre structure and properties under low-temperature neutron irradiation, 18:26799 (RA;UA;In Russian)
Irradiation property changes in the structural graphites at 1500-2000°C, 18:26800 (RA;UA;In Russian)

CARS SPECTROSCOPY
See RAMAN SPECTROSCOPY

CASCADE (EXTRACTION)
See EXTRACTION COLUMNS

CASCADES (NUCLEAR)
See NUCLEAR CASCADES

CASTE (INSECTS)
See INSECTS

CATALYSIS
Studies of intermediates, in catalytic reactions, catalysts and catalytic combustion using laser and mass spectrometry, 18:26872 (R;SE)

CATALYST SUPPORTS
Coal-chemical prospects on preventing NOx and SOx generation in coal combustion, 18:25551 (IA;JP;In Japanese)

CATALYSTS
Biomimetic catalysts: Application of coordinating complexes containing an asymmetric coordinating ligand, 18:25961 (R;US)
Use of dispersed catalysts for coal liquefaction, 18:25478 (R;US)

[Experimental and kinetic modeling of acid/base and redox reactions over oxide catalysts]: Technical progress report, 18:26858 (R;US)

CATION EXCHANGE CAPACITY
See CATIONS

CATIONS
Extraction of a alkali metal cations using a lipophilic lariat ether having a c-pivot carboxylic acid sidearm, 18:26840 (R;US)

CATTLE
Diet-meat and diet-milk transfer of ^{137}Cs in cattle: Values of dynamic model and values obtained in field, 18:27611 (R;IT)
Fate of trypanocidal drugs in cattle (chemotherapy of trypanosomiasis). Kenya: Terminal report. Report prepared for the Government of Kenya, 18:27590 (R;XA)

CAVITY RESONATORS
See also SUPERCONDUCTING CAVITY RESONATORS
Required cavity HOM deQing calculated from probability estimates of coupled bunch instabilities in the APS ring, 18:26980 (R;US)
The effects of temperature and rf power level on the tuning of the water-cooled SSC Low-Energy Booster cavity, 18:27075 (R;US)

CDTE SEMICONDUCTOR DETECTORS
Crystallographic and metallurgical characterization of radiation detector grade cadmium telluride materials, 18:27171 (R;US)

CELL GROWTH (ANIMAL)
See GROWTH

CELL GROWTH (PLANT)
See GROWTH

CEMENT INDUSTRY
Impact evaluation of an Energy $avings Plan project at Holnam Incorporated, 18:26535 (R;US)

CEMENTS
Mechanical properties of magnesium ammonium phosphate cements and their zeolite composites, 18:26771 (R;US)
Microbial-influenced cement degradation: Literature review, 18:25733 (R;US)

CENTRAL NUCLEAR EN ATUCHA REACTOR
See ATUCHA REACTOR

CENTRAL REGION
See USA

CEPFR-1 REACTOR
See ZERO POWER REACTORS

CERAMIC MELTERS
Measurement of cesium and mercury emissions from the vitrification of simulated high level radioactive waste, 18:25815 (R;US)

CERAMICS
Formalization of an ontology of ceramic science in Classic, 18:26766 (RA;US)
Problems and opportunities in microwave joining of ceramics, 18:26770 (R;US)
Synthesis of ceramic oxide powders in a microwave plasma device, 18:26761 (R;US)
Thermal stress analyses of a header plate with a 51-PIN electrical feed-thru, 18:26947 (R;US)

CERCLA
See US SUPERFUND

CERIUM ALLOYS
The low-temperature specific heat of $CeCu_2Ge_2$ at 0 and 9.5 kbar, 18:26711 (R;US)

CERIUM COMPOUNDS
See also CERIUM FLUORIDES
CERIUM PHOSPHATES
Volume dependence of Anderson hybridization in cubic CeCd and CeAg, 18:27905 (R;US)

CERIUM FLUORIDES
Scintillation mechanism in stoichiometric cerium compounds, 18:26775 (R;US)

CERIUM PHOSPHATES
Scintillation mechanism in stoichiometric cerium compounds, 18:26775 (R;US)

CESIUM
Development and testing of ion exchangers for treatment of liquid wastes at Oak Ridge National Laboratory, 18:25739 (R;US)
Measurement of cesium and mercury emissions from the vitrification of simulated high level radioactive waste, 18:25815 (R;US)

CESIUM 137
The soil-to-plant transfer of radionuclides. Feasibilities and limits of the transfer concept, 18:27438 (R;AT;In German)

CESIUM 137 TARGET
Radiation deactivations of the long-life lived radioactive wastes with the help of median energy protons, 18:25715 (RA;UA;In Russian)

CFC
See CHLOROFLUOROCARBONS

CHANNELS (REACTOR)
See REACTOR CHANNELS

CHARGED PARTICLES
See also ALPHA PARTICLES
IONS
TRITONS
Some features of particle orbit behavior in LHD configurations, 18:28014 (R;JP)

CHARGED-PARTICLE ACTIVATION
See CHARGED PARTICLES

CHARGED-PARTICLE TRANSPORT
Helium transport scaling law studies, 18:27942 (R;US)
MCNP4A: Features and philosophy, 18:27873 (R;US)
Transport in a fusion plasma in presence of a chaotic magnetic field, 18:27989 (R;FR;In French)
Variance reduction unique to coupled electron/photon Monte Carlo transport, 18:27877 (R;US)

CHARGING (REACTOR)
See REACTOR FUELING

CHARM PARTICLES
RF system options for the τ-C factory, 18:26967 (R;FR)

CHARS
Characterization of porosity via secondary reactions: Quarterly technical progress report, 1 January 1993–31 March 1993, 18:26791 (R;US)
Development of advanced, continuous mild gasification process for the production of co-products addendum to technical evaluation: Final report, 18:25481 (R;US)
Development of an advanced, continuous mild gasification process for the production of co-products, 18:25520 (RA;US)
Development of an advanced, continuous mild gasification process for the production of co-products technical evaluation: Final report, 18:25480 (R;US)
Fundamental studies of the mechanism of catalytic reactions with catalysts effective in the gasification of carbon solids and the oxidative coupling of methane: Quarterly report, January 1, 1993–March 31, 1993, 18:25541 (R;US)
Reactivity of young chars via energetic distribution measurements: Quarterly technical progress report, 1 July 1992–30 September 1992, 18:25535 (R;US)
Reactivity of young chars via energetic distribution measurements: Quarterly technical progress report, 15 March 1992–30 June 1992, 18:25534 (R;US)
TGA characterization of char reactivity, 18:25515 (RA;US)

CHEMICAL ANALYSIS
Analytical Chemistry Laboratory progress report for FY 1992, 18:26831 (R;US)
Procurement and execution of PCB analyses: Customer-analyst interactions, 18:26833 (R;US)

CHEMICAL EFFLUENTS
Electrochemical processing of nitrate waste solutions: Phase 2, Final report, 18:25834 (R;US)
Travel to Luso, Portugal, to participate in the NATO Advanced research workshop on the use of biomarkers to assess human health and environmental impacts from exposure to chemical pollutants: Foreign trip report, May 30, 1992–June 9, 1992, 18:27650 (R;US)

CHEMICAL ENGINEERING
Global engineering of biology and air pollution, 18:26428 (IA;JP;In Japanese)

CHEMICAL EXPLOSIONS
Detonation reaction steps frozen by free expansion and analyzed by mass spectrometry, 18:27245 (R;US)

CHEMICAL EXPLOSIVES
See also TATB
Comparison of HOB curves for 0.5-g NP charges with field test data and calculations, 18:27247 (R;US)
Destruction of waste energetic materials using base hydrolysis, 18:26867 (R;US)
Detonation reaction steps frozen by free expansion and analyzed by mass spectrometry, 18:27245 (R;US)
Minimization of mixed waste in explosive testing operations, 18:27248 (R;US)
Modeling ignition chemistry, 18:26890 (R;US)
Planning and preliminary design of a contained firing chamber to resist blast effects of 60kg of energetic chemical explosive, 18:27257 (R;US)

CHEMICAL HEAT PIPES
See HEAT PIPES

CHEMICAL INDUSTRY
Industry/Department of Energy workshop on chemical safety: Summary and highlights, 18:26420 (R;US)

CHEMICAL PLANTS
Remedial investigation for the chemical plant area of the Weldon Spring Site: Volume 2, 18:25856 (R;US)

CHEMICAL REACTION KINETICS
See also COMBUSTION KINETICS
KIVA3: A KIVA Program With Block-Structured Mesh for Complex Geometries, 18:28147 (CM;US)
Molecular beam studies of reaction dynamics, 18:26871 (R;US)

CHEMICAL REACTIONS

CHICAGO
An examination of utility emissions contributions to elevated ozone concentrations in the Chicago area, 18:26112 (R;US)

CHINA
Application of food irradiation in China, 18:27562 (RA;XA)
Desulfurization and denitrification technologies suitable for developing countries, 18:25552 (IA;JP;In Japanese)
Field survey of information on energy policy in the Pacific region, 18:26458 (R;JP;In Japanese)
Field survey of information on energy policy in the Pacific region.: Central China region (Provinces of Henan, Hubei, Hunan and Jianxi), 18:26455 (RA;JP;In Japanese)
Field survey of information on energy policy in the Pacific region.: East China region (Shanghai city, provinces of Zhejiang, Jiangsu and Anhui), 18:26456 (RA;JP;In Japanese)

CHLOR-ALKALI INDUSTRY
See CHEMICAL INDUSTRY

CHLORIDES
See also SODIUM CHLORIDES
Coal liquefaction model compounds: Progress report, 18:25479 (R;US)

CHLORINATED ALIPHATIC HYDROCARBONS
See also CARBON TETRACHLORIDE
CHLOROFORM
PVC
Analysis of flow processes during TCE infiltration in heterogeneous soils at the Savannah River Site, Aiken, South Carolina, 18:27431 (R;US)
Elimination of sodium cyanide and vapor degreasing from the passivation process, 18:26942 (R;US)
Fiber optic spectrochemical emission sensor: Detection of volatile chlorinated compounds in air and water using ultrathin membranes, 18:27457 (R;US)
Process waste assessment: Petroleum jelly removal from semiconductor die using trichloroethylene, 18:27429 (R;US)
Risk implications of approaches to setting soil remediation goals, 18:27386 (R;US)

CHLORINATED AROMATIC HYDROCARBONS
See also POLYCHLORINATED BIPHENYLS
Risk implications of approaches to setting soil remediation goals, 18:27386 (R;US)
Trace contaminant determination in fish scale by laser ablation technique, 18:27476 (R;US)

CHLOROBUTADIENE
See NEOPRENE

CHLOROFLUOROCARBONS
Absorption coefficients of CFC-11, CFC-12, HCFC-22, and SF_6 relevant to atmospheric remote sensing and global warming studies, 18:27277 (RA;US)
Refrigeration systems with CFC refrigerants: Report no. 4. Recycling possibilities for used CFC (CFC = Chlorofluorocarbon), 18:27350 (R;DK;In Danish)
Refrigeration systems with CFC refrigerants: Report no. 5. Control of consumpiton of refrigerants (CFC = Chlorofluorcarbon), 18:27351 (R;DK;In Danish)

CHLOROFORM
Single-collision studies of energy transfer and chemical reaction: Progress report, April 1992–March 1993, 18:27888 (R;US)

CHLOROPRENE
See NEOPRENE

CHROMATIC ABERRATIONS
Second order chromaticity of the interaction regions in the collider, 18:27028 (R;US)

CHROMATOGRAPHIC COLUMNS
See EXTRACTION COLUMNS

CHROMIUM
Analysis of chromium volatility in the DWTF incinerator and in the molten salt processor, 18:25761 (R;US)
Determination of the diffusion coefficients of iron and chromium in Pb17Li at 500 deg C, 18:26583 (R;FR)
Development and testing of UO_2-Cr dispersing full for fast reactor application, 18:26200 (RA;UA;In Russian)
Physical nature of strengthening of chromium under irradiation, 18:26687 (RA;UA;In Russian)
The extraction of titanium, chromium and cadmium from phosphoric acid solutions by para (1,1,3,3 tetramethyl butyl) phenyl phosphoric acid in kerosene diluent, 18:26866 (R;DZ)

CHROMIUM 52
Use of median energy proton beams in radiation damage physics and in radiation material science, 18:27922 (RA;UA;In Russian)

CHROMIUM ALLOYS
See also ALLOY-NI43FE33CR16MO3
ALLOY-NI45FE34CR20
CHROMIUM BASE ALLOYS
CHROMIUM STEELS
CHROMIUM-NICKEL STEELS
Anelastic relaxation properties of nickel and 0Cr16Ni11Mo3 steel with rare-earth additions, 18:26635 (RA;UA;In Russian)
Development and testing of UO_2-Cr dispersing full for fast reactor application, 18:26200 (RA;UA;In Russian)
Effects of alloying and temperature on the high-temperature oxidation of Cr-Cr_2Nb, 18:26596 (R;US)
Environmental effects on iron aluminides, 18:26597 (R;US)
In situ studies of passive film chemistry using x-ray absorption spectroscopy, 18:26571 (R;US)
Structural state in ion irradiated metal systems, 18:26622 (RA;UA)
The accumulation and annealing of radiation defects in iron-chromium alloys, 18:26642 (RA;UA;In Russian)
The effect of processing on the microstructure and tensile properties of a γ-TiAl based alloy, 18:26700 (R;US)

CHROMIUM BASE ALLOYS
Low activated chromium-base alloys, 18:26698 (RA;UA;In Russian)
Physical nature of strengthening of chromium under irradiation, 18:26687 (RA;UA;In Russian)

CHROMIUM OXIDES
Effect of additives on enhanced sintering and grain growth in uranium dioxide, 18:26737 (R;FR;In French)

CHROMIUM STEELS
See also STEEL-CR16
Microstructural evolutions in ferritic-martensitic Kh12MVFR-type steel during irradiation and the effect of these evolutions on its radiation resistance capability, 18:26665 (RA;UA;In Russian)
The accumulation and annealing of radiation defects in iron-chromium alloys, 18:26642 (RA;UA;In Russian)
The modification of some steel properties under helium implantation, 18:27923 (RA;UA;In Russian)

CHROMIUM-MOLYBDENUM STEELS
The effect of long-term aging on the impact properties of modified 9Cr-1Mo steel, 18:26590 (R;US)
The influence of thermal aging on the microstructure and fatigue properties of modified 9Cr-1Mo steel, 18:26592 (R;US)

CHROMIUM-NICKEL STEELS
See also CHROMIUM-NICKEL-MOLYBDENUM STEELS
STEEL-CR18NI10TI
A study of the phase structure of radiation-resistant steel, 18:26681 (RA;UA;In Russian)
Estimation of the effect of operation on deformation of BN-600 fuel assembly tubes and fuel pin cladding fabricated of austenitic Cr/Ni steel, 18:26669 (RA;UA;In Russian)
Tensile properties of high nickel-base alloys Kh18N40M3B and nimonic PE-16 irradiated to neutron damage level of 60 dpa, 18:26672 (RA;UA;In Russian)

CHROMIUM-NICKEL-MOLYBDENUM STEELS
See also STEEL-CR16NI15MO3NB
STEEL-CR17NI12MO3-L
Dispersion hardening and radiation damage in austenitic stainless steels, 18:26674 (RA;UA;In Russian)
Hydrogen permeation in austenite steels under neutron irradiation, 18:26673 (RA;UA;In Russian)
Quality improvement of radiation-resistant steels by filtration, 18:26688 (RA;UA;In Russian)
The effect of the tensile stress on the swelling and microstructure of the stainless steels irradiated to high neutron fluence, 18:26675 (RA;UA;In Russian)
Void swelling of hexagonal wrappers of BN-600 subassemblies, 18:26676 (RA;UA;In Russian)

CHROMODYNAMICS

Determination and correlation of coal data. Volume 2: Petrographical and chemical coal characterisation. Final report. Appendix, 18:25548 (R;DK)
Chemical Reactions
Coal structure and behavior. Interfacial chemistry in coal, 18:25545 (R;US)
Chemistry
Coal-chemical prospects on preventing NOx and SOx generation in coal combustion, 18:25551 (IA;JP;In Japanese)
Combustion
An emissions audit of a chain grate stoker burning coal, 18:25577 (R;GB)
Characterization and supply of coal based fuels: Quarterly report, August 1, 1987–October 31, 1987, 18:25564 (R;US)
Characterization and supply of coal based fuels: Quarterly report, May 1, 1987–July 31, 1987, 18:25563 (R;US)
Characterization and supply of coal based fuels: Technical progress report, August 1–October 31, 1988, 18:25567 (R;US)
Characterization and supply of coal-based fuels: Quarterly report, February 1, 1989–April 30, 1989, 18:25569 (R;US)
Characterization and supply of coal-based fuels: Quarterly report, May 1, 1989–July 31, 1989, 18:25570 (R;US)

Characterization and supply of coal-based fuels: Quarterly report, November 1, 1988–January 31, 1989, 18:25568 (R;US)
Characterization and supply of coal-based fuels: Quarterly technical report, May 1, 1988–July 31, 1988, 18:25566 (R;US)
Coal-chemical prospects on preventing NOx and SOx generation in coal combustion, 18:25551 (IA;JP;In Japanese)
Symposium on global environmental conservation and air pollution prevention technology, 18:26427 (I;JP;In Japanese)
The Coal Tech Advanced Cyclone Combustor Demonstration Project: A DOE assessment, 18:25561 (R;US)
Transformations of inorganic coal constituents in combustion systems: Volume 1, sections 1–5: Final report, 18:25571 (R;US)
Transformations of inorganic coal constituents in combustion systems: Volume 2, Sections 6 and 7: Final report, 18:25572 (R;US)
Transformations of inorganic coal constituents in combustion systems: Volume 3, Appendices: Final report, 18:25573 (R;US)
Travel to Korea to attend the Eight US-Korea Joint Workshop on coal Utilization Technology and to conduct preliminary design review of the KIER Combustion Facility: Foreign trip report, August 16–28, 1992, 18:25559 (R;US)
[A trip to Krakow, Poland to investigate their clean fossil fuels and energy efficiency program]: Foreign trip report, November 6–15, 1992, 18:27321 (R;US)
[Characterization and supply of coal based fuels]: Quarterly technical report, February 1, 1988–April 30, 1988, 18:25565 (R;US)

Consumption Rates
Energy Information Administration quarterly coal report, October–December 1992, 18:25556 (R;US)

Conversion
Simulation of coal conversion in a circulating fluidized bed, 18:25524 (R;US)

Coprocessing
Effect of pretreating of host oil on coprocessing: Quarterly progress report, January 1, 1993–March 31, 1993, 18:25538 (R;US)
Fundamental reaction pathways during coprocessing, 18:25527 (R;US)

Depolymerization
Sequential low-temperature depolymerization and liquefaction of US coals: Progress report No. 1, October 1–December 31, 1986, 18:25537 (R;US)

Desulfurization
Symposium on global environmental conservation and air pollution prevention technology, 18:26427 (I;JP;In Japanese)

Evaluation
Characterization and supply of coal based fuels: Quarterly report, May 1, 1987–July 31, 1987, 18:25563 (R;US)
Characterization and supply of coal-based fuels: Quarterly report, May 1, 1989–July 31, 1989, 18:25570 (R;US)

Exhaust Gases
An emissions audit of a chain grate stoker burning coal, 18:25577 (R;GB)

Fluid Flow
Advanced research in instrumentaton and diagnostics technology, 18:25558 (RA;US)

Fluidized Beds
Symposium on global environmental conservation and air pollution prevention technology, 18:26427 (I;JP;In Japanese)

Heat Treatments
Low severity conversion of activated coal: Final report, 18:25526 (R;US)

In-Situ Processing
Symposium on global environmental conservation and air pollution prevention technology, 18:26427 (I;JP;In Japanese)

Inventories
Characterization and supply of coal-based fuels: Quarterly report, November 1, 1988–January 31, 1989, 18:25568 (R;US)

Ion Exchange
Symposium on global environmental conservation and air pollution prevention technology, 18:26427 (I;JP;In Japanese)

Isotopic Exchange
Coal structure and behavior: Interfacial chemistry in coal, 18:25545 (R;US)

Liquefaction
Production of mild gasification coproducts, 18:25483 (RA;US)

Molecular Structure
Symposium on global environmental conservation and air pollution prevention technology, 18:26427 (I;JP;In Japanese)

Nitrogen
Symposium on global environmental conservation and air pollution prevention technology, 18:26427 (I;JP;In Japanese)

Nitrogen Oxides
The Technical University of Denmark/ DIA cogeneration plant. Network measurements of temperature and gas concentrations in the combustion chamber: Measurements carried out in April - May 1991, 18:25578 (R;DK;In Danish)

Production
Energy Information Administration quarterly coal report, October–December 1992, 18:25556 (R;US)

Pyrolysis
Mild gasification in transport reactors, 18:26100 (RA;US)
Using the distributed activation energy model to interpret oxidative coal pyrolysis experiments performed by flat-flame burner, entrained-flow reactor and thermogravimetric analyzer, 18:25544 (R;DK)

Qualitative Chemical Analysis
Determination and correlation of coal data. Volume 1: Petrographical and chemical coal characterisation. Final report. Text, 18:25547 (R;DK)

Structural Chemical Analysis
Sequential low-temperature depolymerization and liquefaction of US coals: Progress report No. 1, October 1–December 31, 1986, 18:25537 (R;US)

Sulfur Content
Molten-Caustic-Leaching (Gravimelt) System Integration Project, Phase 2: Topical report for test circuit operation, 18:25539 (R;US)

Ultrasonic Waves
Ultrasonic ash/pyrite liberation: Final technical report, 18:25477 (R;US)

COAL DEPOSITS
Catalytic reduction of SO_x-NO_x in coal flue gas: Supplement to the final report, 18:26110 (R;US)

COAL FINES
The metered delivery of solids into pressure: A radically new machine concept, 18:25509 (RA;US)

COAL GAS
Bench-scale testing and evaluation of the direct sulfur recovery process, 18:25490 (RA;US)
Comparative study of the reactions of metal oxides with H_2S and SO_2, 18:25512 (RA;US)
Enhanced durability of high-temperature desulfurization sorbents for moving-bed applications, 18:25491 (RA;US)
H_2S-removal and sulfur-recovery processes using metal salts, 18:25484 (RA;US)
Hydrogen separation by ceramic membranes in coal gasification, 18:25500 (RA;US)

COAL GASIFICATION
A calcium oxide sorbent process for bulk separation of carbon dioxide, 18:25502 (RA;US)

Adsorbents
Studies of in-situ calcium-based sorbents in advanced pressurized coal conversion systems, 18:25518 (RA;US)
Sulfur capture mechanisms, 18:25517 (RA;US)

Ashes
Coal ash behavior in reducing environments, 18:25486 (RA;US)

Bioreactors
Development of biological coal gasification (MicGAS process), 18:25943 (RA;US)

Catalysts
Catalytic gasification fundamentals, 18:25482 (RA;US)

Chemical Reactors
Development of an advanced, continuous mild gasification process for the production of co-products, 18:25520 (RA;US)
Measurements and modeling of advanced coal conversion processes, 18:25519 (RA;US)

Scaleup of mild gasification to a process development unit, 18:25521 (RA;US)
TGA characterization of char reactivity, 18:25515 (RA;US)
Gas Analysis
Trace contaminants in fixed-bed gasifier gas, 18:25516 (RA;US)
Hot Gas Cleanup
Development of ceramic membrane reactors for high temperature gas cleanup, 18:25504 (RA;US)
Development of hollow-fiber catalytic-membrane reactors for high-temperature gas cleanup, 18:25503 (RA;US)
Facilitated transport ceramic membranes for high temperature gas cleanup, 18:25507 (RA;US)
High temperature hydrogen sulfide removal, 18:25511 (RA;US)
Mechanical analysis of a cross flow filter, 18:25505 (RA;US)
Particulate technology issues, 18:25508 (RA;US)
Hydrogen Production
High-temperature membranes for gas separation and gas cleanup, 18:25506 (RA;US)
Hydrogen separation by ceramic membranes in coal gasification, 18:25500 (RA;US)
Material Balance
Development of advanced, continuous mild gasification process for the production of co-products addendum to technical evaluation: Final report, 18:25481 (R;US)
Measuring Methods
The metered delivery of solids into pressure: A radically new machine concept, 18:25509 (RA;US)
Off-Gas Systems
Gas separations using ceramic membranes, 18:25501 (RA;US)
Packed Beds
Trace contaminants in fixed-bed gasifier gas, 18:25516 (RA;US)
Slags
Coal ash behavior in reducing environments, 18:25486 (RA;US)

COAL GASIFICATION PLANTS
Current status of design and construction of ENCOAL mild gasification plant, 18:25522 (RA;US)
Gasification product improvement facility (GPIF), 18:25523 (RA;US)
Gasifiers optimized for fuel cell systems, 18:26098 (RA;US)
Integrated operation of a pressurized fixed bed gasifier and hot gas desulfurization system, 18:26099 (RA;US)

COAL LIQUEFACTION
See also TSL PROCESS
Coal liquefaction model compounds: Progress report, 18:25479 (R;US)
Effect of pretreating of host oil on coprocessing: Quarterly progress report, January 1, 1993–March 31, 1993, 18:25538 (R;US)
Low severity conversion of activated coal: Final report, 18:25526 (R;US)
Sequential low-temperature depolymerization and liquefaction of US coals: Progress report No. 1, October 1–December 31, 1986, 18:25537 (R;US)
Use of dispersed catalysts for coal liquefaction, 18:25478 (R;US)

COAL LIQUIDS
Development of an advanced, continuous mild gasification process for the production of co-products, 18:25520 (RA;US)
Novel technique for coal pyrolysis and hydrogenation product analysis: Final technical report, 18:25529 (R;US)
Production of mild gasification coproducts, 18:25483 (RA;US)
Run 263 with Black Thunder Mine subbituminous coal and dispersed molybdenum catalysts: Technical progress report, 18:25533 (R;US)
Sequential low-temperature depolymerization and liquefaction of US coals: Progress report No. 1, October 1–December 31, 1986, 18:25537 (R;US)
Toxicity studies of mild gasification products, 18:25579 (RA;US)

COAL PREPARATION
Characterization and supply of coal based fuels: Technical progress report, August 1–October 31, 1988, 18:25567 (R;US)

COAL RANK
Control of NOx and SOx generation in fluidized bed coal combustion, and N2O generation and its control, 18:25575 (IA;JP;In Japanese)

COAL RESERVES
Field survey of information on energy policy in the Pacific region.: China as a whole, 18:26454 (RA;JP;In Japanese)

COAL-DERIVED LIQUIDS

E CODES
EDSFI: Electrical Distribution System Functional Inspection Data Base, 18:28161 (CM;US)
Improvement of ELESIM CANDU fuel performance analysis code: Fission product gas release, fuel densification and neutron flux depression, 18:26171 (RA;XA)
Modeling CANDU-type fuel behaviour during extended burnup irradiations using a revised version of the ELESIM code, 18:26172 (RA;XA)

E2-TRANSITIONS
The E2 N→Δ transition from polarized Compton scattering, 18:27766 (R;US)

EARTH ATMOSPHERE
See also EARTH MAGNETOSPHERE
IONOSPHERE
TROPOSPHERE

Air-Biosphere Interactions
Status of instrumentation for the southern Great Plains clouds and radiation testbed, 18:27310 (RA;US)

Albedo
Plane-parallel albedo bias, 18:27284 (RA;US)

Climate Models
A field evaluation of NOAA remote sensor measurements of wind, temperature, and moisture, 18:27297 (RA;US)
An integrated cloud observation and modeling investigation in support of the Atmospheric Radiation Measurement Program, 18:27295 (RA;US)
Testbed model and single column data assimilation for the Atmospheric Radiation Measurement Program, 18:27294 (RA;US)

Coordinated Research Programs
Vision statement for research and educational outreach for the ARM CART southern Great Plains locale, 18:27311 (RA;US)

General Circulation Models
A field evaluation of NOAA remote sensor measurements of wind, temperature, and moisture, 18:27297 (RA;US)
A stochastic formulation of radiative transfer in clouds and radiative properties of non-uniform clouds, 18:27285 (RA;US)
An integrated cloud observation and modeling investigation in support of the Atmospheric Radiation Measurement Program, 18:27295 (RA;US)
Analysis of cloud radiative forcing and feedback in a climate general circulation model, 18:27282 (RA;US)
Atmospheric radiation measurement aerosol working group, 18:27283 (RA;US)
CHAMMP program overview, 18:27292 (RA;US)
Data assimilation and the Atmospheric Radiation Measurement Program, 18:27293 (RA;US)
Development of a regional-scale climate model with a detailed microphysics parameterization, 18:27291 (RA;US)
Gulf stream locale - a field laboratory for cloud process, 18:27314 (RA;US)
Interactions between deep convection and upper tropospheric cloudiness, 18:27288 (RA;US)
Numerical simulations of an idealized convective system: Comparisons between parameterized and explicitly resolved clouds, 18:27290 (RA;US)
Parameterization of convective clouds, mesoscale convective systems, and convective-generated clouds, 18:27301 (RA;US)
Plane-parallel albedo bias, 18:27284 (RA;US)
Radiative effects of non-uniform clouds, 18:27287 (RA;US)
Testbed model and single column data assimilation for the Atmospheric Radiation Measurement Program, 18:27294 (RA;US)
The effects of cloud heterogeneity on radiant fluxes at the top and bottom of the atmosphere, 18:27286 (RA;US)
The north slope of Alaska: The Atmospheric Radiation Measurement Program's window on high latitude phenomena, 18:27313 (RA;US)
Treatment of cloud radiative effects in general circulation models, 18:27281 (RA;US)
Tropical western Pacific project: Status, 18:27312 (RA;US)
Vision statement for research and educational outreach for the ARM CART southern Great Plains locale, 18:27311 (RA;US)

Radiation Flux
Radiative effects of non-uniform clouds, 18:27287 (RA;US)
The effects of cloud heterogeneity on radiant fluxes at the top and bottom of the atmosphere, 18:27286 (RA;US)

Remote Sensing
Absorption coefficients of CFC-11, CFC-12, HCFC-22, and SF_6 relevant to atmospheric remote sensing and global warming studies, 18:27277 (RA;US)

Research Programs
Status of instrumentation for the southern Great Plains clouds and radiation testbed, 18:27310 (RA;US)

Seasonal Variations
Gulf stream locale - a field laboratory for cloud process, 18:27314 (RA;US)

EARTH MAGNETOSPHERE
Advances in low energy neutral atom imaging techniques, 18:27710 (R;US)
Investigations of transitions from order to chaos in dynamical systems: Annual progress report, 18:27914 (R;US)
Low energy neutral atom imaging techniques, 18:27711 (R;US)
Terrestrial magnetospheric imaging: Numerical modeling of low energy neutral atoms, 18:27718 (R;US)

EARTHQUAKES

GALACTIC EVOLUTION
On inhomogeneous halo collapse and the globular cluster metallicity gradient, 18:27726 (R;US)

GALAXIES
Search for emission of ultra high energy radiation from active galactic nuclei, 18:27715 (R;US)

GALAXY CLUSTERS
Redshift distortions of galaxy correlation functions, 18:27702 (R;US)

GALLIUM ARSENIDES
Interface configurations of $Al_xGa_{1-x}As/GaAs$ quantum wells probed by photoluminescence spectroscopy, 18:26815 (RA;US)
Strain distribution in heterolayers with low misfit as revealed by convergent beam illumination methods, 18:27911 (R;US)

GALLIUM PHOSPHIDES
Heat conductivity of irradiated GaP crystals and details of their thermal annealing, 18:26653 (RA;UA;In Russian)

GALVANIC CORROSION
See ELECTROCHEMICAL CORROSION

GAME THEORY
Strategy acquisition by an artificial neural network: Experiments in learning to play a stochastic game, 18:28177 (RA;US)

GAMMA CAMERAS
Real-time spot size camera for pulsed high-energy radiographic machines, 18:25915 (R;US)

GAMMA HEATING
See RADIATION HEATING

GAMMA RADIATION
Chemoprevention by WR-2721, 18:27602 (R;US)

GAMMA SPECTROMETERS
A miniature modular MCA for gamma-ray spectroscopy, 18:27200 (R;US)
Electronic characterization of mercuric iodide gamma ray spectrometers, 18:27181 (R;US)
The gamma ray energy tagging spectrometer of ROKK-2 facility at VEPP-3 storage ring, 18:27195 (R;RU)

GAMMA SPECTROSCOPY
Multi-dimensional analysis of high resolution γ-ray data, 18:28136 (R;FR)

GANIL
See GANIL CYCLOTRON

GANIL CYCLOTRON
Inversion of collective matter flow and equation of state, 18:27860 (R;FR)
Secondary beams at GANIL, 18:27004 (R;FR)
Travel to France for a large experiment at the GANIL accelerator facility: Foreign trip report, June 10–24, 1992, 18:27092 (R;US)
GARLIC
Effect of gamma radiation on garlic storage under natural conditions, 18:27538 (R;SY;In Arabic)
GAS CENTRIFUGATION
[The Hanford story, Chapter 14], 18:25633 (R;US)
GAS CONDENSATE FIELDS
Establishment of an oil and gas database for increased recovery and characterization of oil and gas carbonate reservoir heterogeneity: Appendix 1, Volume 3, 18:25581 (R;US)
Establishment of an oil and gas database for increased recovery and characterization of oil and gas carbonate reservoir heterogeneity: Appendix 1, Volume 2 (Jurassic Smackover Formation), 18:25582 (R;US)
Geologic setting, petrophysical characteristics, and regional heterogeneity patterns of the Smackover in southwest Alabama: Draft topical report on Subtasks 2 and 3, 18:25580 (R;US)
GAS COOLANTS
See GASES
GAS ENGINES
See INTERNAL COMBUSTION ENGINES
GAS FIELDS

Israel Geological Society annual meeting 1993, 18:27425 (R;IL)
K-Ar age authigenic feldspar from cenomanian hazera formation, 18:27419 (IA;IL)

GEOMAGNETIC STORMS
See MAGNETIC STORMS

GEOPHYSICS
The reflection of geodynamic process in the variations of radon concentration in earth, before the earthquake in Egypt, 12.10.1992, 18:27411 (IA;IL)

GEOPRESSURED SYSTEMS
A study of hydrocarbons associated with brines from DOE geopressured wells: Final report, 18:26051 (R;US)
Consolidated Research Program, United States Gulf Coast Geopressured-Geothermal Program: First quarterly report, January 1, 1993–March 3, 1993, 18:26044 (R;US)

GEOTHERMAL AREAS
See GEOTHERMAL FIELDS

GEOTHERMAL EXPLORATION
Geothermal Reservoir Technology Research Program: Abstracts of selected research projects, 18:26038 (R;US)
No.30 survey report on promotion of geothermal energy development in 1991.: Survey of environmental effects of fumarolic gas in the Hakkodo area, 18:26033 (I;JP;In Japanese)
No.31 survey report on promotion of geothermal energy development in 1991.: Survey of environmental effects of fumarolic gas in the Iwatesan west area, 18:26034 (I;JP;In Japanese)

GEOTHERMAL FIELDS
See also GEYSERS GEOTHERMAL FIELD
MATSUKAWA GEOTHERMAL FIELD
No.30 survey report on promotion of geothermal energy development in 1991.: Survey of environmental effects of fumarolic gas in the Hakkodo area, 18:26033 (I;JP;In Japanese)
No.36 survey report on promotion of geothermal energy development in 1991.: Survey of environmental effects before fumarolic gas in the Amemasudake area, 18:26035 (I;JP;In Japanese)
No.37 survey report on promotion of geothermal energy development in 1991.: Survey of environmental effects before fumarolic gas in the Hongu area, 18:26036 (I;JP;In Japanese)
No.38 survey report on promotion of geothermal energy development in 1991.: Survey of environmental effects before fumarolic gas in the Mt. Aso west area, 18:26037 (I;JP;In Japanese)

GEOTHERMAL FLUIDS
See also FUMAROLIC FLUIDS
Critical issues in the use of metals and alloys in sulphur-containing aqueous systems, 18:26604 (R;US)
No.30 survey report on promotion of geothermal energy development in 1991.: Survey of environmental effects of fumarolic gas in the Hakkodo area, 18:26033 (I;JP;In Japanese)
No.31 survey report on promotion of geothermal energy development in 1991.: Survey of environmental effects of fumarolic gas in the Iwatesan west area, 18:26034 (I;JP;In Japanese)
No.37 survey report on promotion of geothermal energy development in 1991.: Survey of environmental effects before fumarolic gas in the Hongu area, 18:26036 (I;JP;In Japanese)
[Diffusion/dispersion transport of chemically reacting species]: Progress report, FY 1992–1993, 18:26050 (R;US)

GEOTHERMAL POWER PLANTS
Design and operation of a geopressured-geothermal hybrid cycle power plant: Appendix B-1, Pleasant Bayou Site: Final report, 18:26032 (R;US)

GEOTHERMAL REGIONS
See GEOTHERMAL FIELDS

GEOTHERMAL RESOURCES
[Travel to Russia and the UK concerning mining and heat extraction technology]: Foreign trip report, September 11–24, 1992, 18:26039 (R;US)

GEOTHERMAL WATER HEATING
Hot Dry Rock energy annual report fiscal year 1992, 18:26029 (R;US)

GEOTHERMAL WELLS
A study of hydrocarbons associated with brines from DOE geopressured wells: Final report, 18:26051 (R;US)
Contractor for geopressured-geothermal sites: Final contract report, Volume 1, fiscal years 1986–1990 (5 years), testing of wells through October 1990: Appendix A, Volume 2, Gladys McCall Site (Cameron Parish LA); Appendix B-1, Volume 3, Pleasant Bayou Site; Appendix B-2, Volume 4, Pleasant Bayou Site; Appendix C, Volume 5, Willis Hulin Site, 18:26040 (R;US)
Flow tests of the Gladys McCall well: Appendix A, Gladys McCall Site (Cameron Parish, LA): Final report, October 1985–October 1990, 18:26041 (R;US)
Flow tests of the Willis Hulin well: Appendix C, Willis Hulin Site: Final report, October 1985–October 1990, 18:26043 (R;US)
Hot Dry Rock energy annual report fiscal year 1992, 18:26029 (R;US)
Testing of the Pleasant Bayou Well through October 1990: Final report, October 1985–October 1990, 18:26042 (R;US)

GERMAN DEMOCRATIC REPUBLIC

GEYSERS GEOTHERMAL FIELD
Geothermal Reservoir Technology Research Program: Abstracts of selected research projects, 18:26038 (R;US)

GIANT RESONANCE
Pre-equilibrium effects on properties of hot giant dipole resonances, 18:27819 (R;FR)

GLASS
See also BOROSILICATE GLASS
A literature review of surface alteration layer effects on waste glass behavior, 18:25679 (R;US)
Conditions for precipitation of copper phases in DWPF waste glass: Revision 1, 18:25817 (R;US)
Laboratory-scale vitrification and leaching of Hanford high-level waste for the purpose of simulant and glass property models validation, 18:25747 (R;US)

Pilot scale vitrification studies on hazardous and mixed wastes, 18:25822 (R;US)
TWEAT: Ternary Waste Envelope Assessment Tool, 18:25746 (R;US)

GLASS MELTERS
See CERAMIC MELTERS

GLIOMAS
A benchmark analysis of radiation flux distribution for Boron Neutron Capture Therapy of canine brain tumors, 18:27523 (R;US)
Synthesis and evaluation of boron compounds for neutron capture therapy of malignant brain tumors: Technical progress report No. 1, May 1, 1990–January 31, 1991, 18:27522 (R;US)

GLOBAL CLIMATE CHANGE
See CLIMATIC CHANGE

GLOBAL WARMING
See GREENHOUSE EFFECT

GLOVES
Final report for Allied-Signal Aerospace Company, Kansas City Division on protective glove permeation analysis, 18:26910 (R;US)

GLOW DISCHARGES
Characterization of He/CH_4 DC glow discharge plasmas by optical emission spectroscopy, mass spectrometry and actinometry, 18:27939 (R;ES)
Kinetics of Hydrocarbon formation in a-C:H film deposition plasmas, 18:27940 (R;ES)

GLUONS
On the validity of perturbative evolution of structure functions from low Q^2, 18:27760 (R;GB)
Quark and gluon jets at CDF, 18:27775 (R;US)

GNEISSES
Preliminary experiments for measuring Kd values for cesium and strontium. To be used in site evaluations, 18:26810 (R;AT;In German)

GOBAR GAS
See METHANE

GOLD
Ploughing on gold using a Scanning Tunneling Microscope, 18:26704 (R;US)

GOLD 197 BEAMS
Stripping efficiencies for 277 MeV/amu gold beam on copper foils, 18:27886 (R;US)

GOLD 197 TARGET
Complex fragment production and multifragmentation in 60 MeV/u ^{129}Xe-induced reactions, 18:27858 (R;US)
High transverse momentum events in Kr+Au, Th central collisions at 43 MeV/u, 18:27862 (R;FR)
Study of Krypton-Silver, Krypton-gold, Krypton-thorium interactions at 27 and 43 MeV/n in terms of global variables, 18:27863 (R;FR;In French)

GOLD ALLOYS
Phase stability of ordered alloys under irradiation, 18:26623 (RA;UA;In Russian)

GONIOMETERS
Adjustment of a goniometer for X-rays optics calibration in the spectral range 1.5-20 KeV, 18:27173 (R;FR;In French)

GRADED LIE GROUPS
On a possible algebra morphism of $U_q[osp(1/2)]$ onto the deformed oscillator algebra $W_q(N)$, 18:27673 (R;XA)

GRAIN ALCOHOL
See ETHANOL

GRAIN BOUNDARIES
Boundary stability under nonequilibrium conditions: Progress report, 18:26602 (R;US)
Grain-boundary electronic states by multiple-scattering theory, 18:26725 (R;US)

GRAINS (CEREAL)
See SEEDS

GRAMINEAE
Perennial species for optimum production of herbaceous biomass in the Piedmont (Management study, 1987–1991): Final report, 18:25944 (R;US)
Rangeland – plant response to elevated CO_2: Progress report, 1993, 18:27389 (R;US)

GRANODIORITES
Preliminary experiments for measuring Kd values for cesium and strontium. To be used in site evaluations, 18:26810 (R;AT;In German)

GRANULAR BED FILTERS
Moving granular bed filter development program, 18:25496 (RA;US)
Standleg moving granular bed filter development program, 18:25495 (RA;US)

GRANULAR MATERIALS
Flow of granular materials down an inclined plane, 18:26922 (R;US)
Stability of flows in fluidized beds: Final report, 18:25560 (R;US)

GRAPHITE
Corrosion kinetics and mechanisms for nuclear grade graphites, 18:26779 (R;US)
Irradiation property changes in the structural graphites at 1500-2000^{0}C, 18:26800 (RA;UA;In Russian)
Sputtering of graphite, niobium and niobium carbide by neutron bombardment. Computer simulation, 18:26660 (RA;UA;In Russian)

GRAPHITE MODERATOR

Radiological transportation emergency response training course funding and timing in the southern states, 18:25657 (R;US)
Southern State Radiological Transportation Emergency Response Training Course Summary, 18:25664 (R;US)
Southern States' Routing Agency Report, 18:25662 (R;US)
Southern States' Routing Agency Report, 18:25658 (R;US)
Southern routes for high-level radioactive waste: Agencies, contacts, and designations, 18:25661 (R;US)
Southern states' routing agency report, 18:25670 (R;US)
Spent Fuel and High-Level Radioactive Waste Transportation Report, 18:25655 (R;US)
Spent fuel and high-level radioactive waste transportation report, 18:25668 (R;US)
Spent fuel and high-level radioactive waste transportation report, 18:25665 (R;US)
State alternative route designations, 18:25899 (R;US)
The rail abandonment process: A southern perspective, 18:25667 (R;US)

HIGH-TC SUPERCONDUCTORS
Ablation
Fast-ICCD photography and gated photon counting measurements of blackbody emission from particulates generated in the KrF-laser ablation of BN and YBCO, 18:26739 (R;US)

Adsorption
Influence of the granular surface on the oxygen uptake in $YBa_2Cu_3O_{6+\delta}$ ceramics, 18:26756 (R;RU;In Russian)

Chemical Analysis
Application of Z-contrast imaging to obtain column-by-column spectroscopic analysis of materials, 18:26838 (R;US)

Crystal Defects
Roles of oxygen defects in copper-oxide superconductors, 18:26736 (R;US)

Crystal Growth
Experimental investigations of superconductivity in quasi-two-dimensional epitaxial copper oxide superlattices and trilayers, 18:27931 (R;US)

Deposition
Effects of depositon rate on $Bi_2Sr_2CaCu_2O_{8+x}$ and $Bi_2Sr_{1.6}La_{0.4}CuO_{6+x}$ epitaxial thin film growth by pulsed-laser ablation, 18:26747 (R;US)
Fast-ICCD photography and gated photon counting measurements of blackbody emission from particulates generated in the KrF-laser ablation of BN and YBCO, 18:26739 (R;US)
Kinetics of photodeposition of superconducting films, 18:26741 (R;US)

Diffusion
Description of oxygen diffusion in $YBa_2Cu_3O_{6+\delta}$ ceramics, 18:26755 (R;RU;In Russian)
Oxygen diffusion in $YBa_2Cu_3O_{6+\delta}$ ceramics on heating, 18:26754 (R;RU;In Russian)

Oxygen
Description of oxygen diffusion in $YBa_2Cu_3O_{6+\delta}$ ceramics, 18:26755 (R;RU;In Russian)
Influence of the granular surface on the oxygen uptake in $YBa_2Cu_3O_{6+\delta}$ ceramics, 18:26756 (R;RU;In Russian)
Oxygen diffusion in $YBa_2Cu_3O_{6+\delta}$ ceramics on heating, 18:26754 (R;RU;In Russian)

Penetration Depth
Measurement of penetration depth $\lambda(T)$ in $YBa_2Cu_3O_{7-\delta}$ thin film, 18:26762 (R;US)

Scanning Electron Microscopy
Travel to Japan to participate in the international seminar on high-resolution STEM: Foreign trip report, June 9–16, 1992, 18:26851 (R;US)

Sound Waves
Radiation-acoustic studies of materials with non-linear thermoelastic properties, 18:26626 (RA;UA;In Russian)

Superconductivity
After seven years, where's the consensus?, 18:27930 (R;US)
Neutron spectroscopic investigations on crystalline-electric-field and exchange interactions on high-Tc superconductors, 18:26764 (R;CH;In German)
Roles of oxygen defects in copper-oxide superconductors, 18:26736 (R;US)

Tunnel Effect
Effect of spontaneous decay of superconductor quasiparticles in the tunneling density of states, 18:27932 (R;US)

X-Ray Spectroscopy
Local environment about O atoms in Pr-Y-Ba-Cu-O films studied by O K-edge XAFS, 18:27907 (R;US)

HIGHLY ENRICHED URANIUM
Measurements with an unreflected uranium (93.2%) metal sphere, 18:25636 (R;US)

HILACS
Longitudinal beam dynamics for heavy ion fusion, 18:28066 (R;US)

HIPURE PROCESS
See DESULFURIZATION

HITREX-2 REACTOR
See ZERO POWER REACTORS

HOFFMAN PROCESS
See COAL GASIFICATION

HOLMIUM 165 TARGET
Complex fragment production and multifragmentation in 60 MeV/u ^{129}Xe-induced reactions, 18:27858 (R;US)

HORIZONTAL AXIS TURBINES
Extended fatigue monitoring of the MS-1 WTG rotor, 18:26078 (R;GB)
First measurements on DANmark 36 - 525 kW wind turbine, 18:26085 (R;DK)
The research measurement system on the DANmark 36 - 525 kW wind turbine, 18:26086 (R;DK)
Wind turbines modelling: An introduction to experimental identification, 18:26084 (R;DK)

HOT LABS
Analysis of accidents at the LPR (Radiochemical Processes Laboratory), 18:25845 (IA;AR;In Spanish)

HOT PLASMA
Effects of radial diffusion on triton burn up, 18:27966 (R;IT)

HOT-DRY-ROCK SYSTEMS
Camborne geothermal energy project. Characterisation of the Rosemanowes HDR reservoir: (Report 3A-10), 18:26046 (R;GB)
Geothermal hot dry rock: UK Government R and D programme 1976-1991, 18:26028 (R;GB)
Hot Dry Rock energy annual report fiscal year 1992, 18:26029 (R;US)
Hot dry rock: What does it take to make it happen, 18:26476 (R;US)
Modelling and design of HDR reservoir creation: Camborne Geothermal Energy Project, 18:26047 (R;GB)
Techniques for the correction of short circuit effects on HDR reservoirs: Camborne Geothermal Energy Project, 18:26045 (R;GB)

HOUSES
BREDEM-8 parametric study into the potential energy saving from passive solar house design, 18:26019 (R;GB)
House design studies: Overview, 18:26021 (R;GB)
Residential radon survey in Finland, 18:27645 (R;FI;In Finnish)
Solar building study. Final report: Albert Hall Memorial Housing, Coalville, Leicestershire, 18:26018 (R;GB)
Solar building study. Final report: Cedargrove House, Chorley, 18:26011 (R;GB)
Solar building study. Final report: Cockerell Grove House, Milton Keynes, 18:26016 (R;GB)
Solar building study. Final report: Paxton Court House, Sheffield, 18:26014 (R;GB)

HTGR TYPE REACTORS
See also HTTR REACTOR
VRAIN REACTOR
Final irradiation report for the HFR-B1 experiment and postirradiation examinations for HFR-B1: Foreign trip report, October 12–December 30, 1991, 18:26276 (R;US)
Modular High-Temperature Gas-Cooled Reactor COMEDIE Fission Product Transport Program: Foreign trip report, October 11–20, 1991, 18:26275 (R;US)
Safety aspects of forced flow cooldown transients in Modular High Temperature Gas-Cooled Reactors, 18:26364 (R;US)
Testing and surveillance of corrosion for the steam generator (SG) materials of the New Production-Modular High-Temperature Gas-cooled Reactor program: Foreign trip report, August 31–September 5, 1992, 18:26167 (R;US)

HTO
See HEAVY WATER

HTTR REACTOR
Proceedings of the 2nd JAERI symposium on HTGR technologies October 21 ≈ 23, 1992, Oarai, Japan, 18:26165 (R;JP)

HYBRID ELECTRIC-POWERED VEHICLES
Utility emissions associated with electric and hybrid vehicle (EHV) charging, 18:26560 (R;US)

HYDRAULIC CONDUCTIVITY
Measurements of hydraulic conductivity in deep bedrock at Palmottu, Outokumpu, Pori and Ylivieska, 18:27490 (R;FI;In Finnish)

HYDRAULIC FRACTURES
Application of characteristic time concepts for hydraulic fracture configuration design, control, and optimization: Final report, 18:25612 (R;US)
Mathematical modeling and simulation analysis of hydraulic fracture propagation in three-layered poro-elastic media, 18:25590 (R;US)
Multi-Site Project seismic verification experiment and assessment of site suitability, 18:25614 (R;US)

HYDRAULIC FRACTURING
Application of characteristic time concepts for hydraulic fracture configuration design, control, and optimization: Final report, 18:25612 (R;US)
Hydraulic fracturing rock stress measurement at Haestholmen, Finland, 18:25838 (R;FI)
Observations of broad-band micro-seisms during reservoir stimulation, 18:25597 (R;US)

HYDRAULIC RAMS
See PUMPS

HYDRAULICS
RELAP5 assessment using LSTF test data SB-CL-18, 18:26368 (R;US)
RELAP5/MOD3 assessment using the Semiscale 50% Feed Line Break test S-FS-11, 18:26369 (R;US)

HYDROCARBONS
See also POLYCYCLIC AROMATIC HYDROCARBONS
TETRALIN
Clay enhancement of methane, low molecular weight hydrocarbon and halocarbon conversion by methanotrophic bacteria, 18:27532 (PA;US)

Novel technique for coal pyrolysis and hydrogenation product analysis: Final technical report, 18:25529 (R;US)
Radiolytic decomposition of environmental contaminants using an electron accelerator, 18:27463 (R;US)
Synthesis of dimethyl ether and alternative fuels in the liquid phase from coal-derived synthesis gas: Task 3.2: Screen novel catalyst systems; Task 3.3:, Evaluation of the preferred catalyst system, 18:25531 (R;US)

HYDROELECTRIC POWER
Purity and danger: Protection of Native American religious sites and knowledge in federal development, 18:26414 (R;US)

HYDROELECTRIC POWER PLANTS
Above Bonneville passage and propagation cost effectiveness analysis: Technical report, January 1993, 18:25990 (R;US)
Environmentally adjusted oil and grease, 18:25991 (R;SE;In Swedish)
Fish barriers: Methods to divert fish (avoidance, attraction) at hydroelectric power installations, 18:25992 (R;SE;In Swedish)

HYDROELECTRICITY

HYDROGEN
Atom-Molecule Collisions
Single-collision studies of energy transfer and chemical reaction: Progress report, April 1992–March 1993, 18:27888 (R;US)
Chemical Activation
Alkali/TX_2 catalysts for CO/H_2 conversion to C_1-C_4 alcohols: Final technical progress report, September 1, 1988–August 31, 1991, 18:25528 (R;US)
Combustion
Hydrogen distribution and combustion, 18:26379 (RA;US)
Degassing
BAKEOUT: A computer program for predicting diffusive outgassing from stainless steel, 18:26734 (R;US)
Diffusion
Hydrogen permeation in austenite steels under neutron irradiation, 18:26673 (RA;UA;In Russian)
Energy Demand
Prospect on new energies.: Hydrogen energy, 18:25926 (I;JP;In Japanese)
Enthalpy
Electronic structure and enthalpy of hydrogen and helium mixtures, 18:26874 (R;US)
Excited States
Measurement of H zero excited states produced by foil stripping of 800-MeV H^- ions, 18:27087 (R;US)
Fuels
Production of hydrogen and coproducts from coal, 18:25485 (RA;US)
Gaseous Diffusion
Experimental validation of Pd-Ag diffuser modeling, 18:28031 (R;FR)
Hydrogen Production
Prospect on new energies.: Hydrogen energy, 18:25926 (I;JP;In Japanese)
Ion-Molecule Collisions
Metastable enhancement of C^+ and O^+ capture reactions: Final report, 18:27887 (R;US)
Market
Production of hydrogen and coproducts from coal, 18:25485 (RA;US)
Materials Recovery
Development of an electrochemical hydrogen separator, 18:25499 (RA;US)
Permeability
Hydrogen permeability of constructor materials during ion bombardment, 18:26638 (RA;UA;In Russian)
Photoionization
New infrared photon absorption processes: Final technical progress report, August 1, 1988–February 1, 1993, 18:27882 (R;US)
Separation Processes
Development of an electrochemical hydrogen separator, 18:25499 (RA;US)
Gas separations using ceramic membranes, 18:25501 (RA;US)
High-temperature membranes for gas separation and gas cleanup, 18:25506 (RA;US)
Hydrogen separation by ceramic membranes in coal gasification, 18:25500 (RA;US)
Ion-exchange membranes for bulk separation of acid gases, 18:25510 (RA;US)
Specific Heat
Thermal property correlation package of hydrogen, carbon monoxide, carbon dioxide and methane, 18:26927 (R;JP;In Japanese)
Synthesis
Radiolytic hydrogen production from process vessels in HB line - production rates compared to evolution rates and discussion of LASL reviews, 18:25828 (R;US)
Revisions to the hydrogen gas generation computer model, 18:25832 (R;US)
Thermal Conductivity
Thermal property correlation package of hydrogen, carbon monoxide, carbon dioxide and methane, 18:26927 (R;JP;In Japanese)
Three-Dimensional Calculations
A hydrogen atom in the curved space. Expansion over free solutions on the three-dimensional sphere, 18:27696 (R;RU;In Russian)
Viscosity
Thermal property correlation package of hydrogen, carbon monoxide, carbon dioxide and methane, 18:26927 (R;JP;In Japanese)
Wave Functions
A hydrogen atom in the curved space. Expansion over free solutions on the three-dimensional sphere, 18:27696 (R;RU;In Russian)

HYDROGEN 1 MINUS BEAMS
BNL volume H^- sources, 18:27043 (R;US)
Measurement of H zero excited states produced by foil stripping of 800-MeV H^- ions, 18:27087 (R;US)

Alaska North Slope National Energy Strategy initiative: Analysis of five undeveloped fields, 18:25604 (R;US)
Multi-Site Project seismic verification experiment and assessment of site suitability, 18:25614 (R;US)

NATURAL GAS HYDRATE DEPOSITS
Hydrate characterization research overview, 18:25611 (R;US)
Overview: Gas hydrate geology and geography, 18:25610 (R;US)

NATURAL GAS INDUSTRY
Qatar's economy transition from oil based economy to gas based economy, 18:25605 (R;QA)
The natural gas resources and industrial development in Qatar, 18:25616 (I;QA)

NATURAL GAS WELLS
Observations of broad-band micro-seisms during reservoir stimulation, 18:25597 (R;US)

NATURAL LANGUAGE
A natural language generation system for a heterogeneous distributed database system, 18:28176 (RA;US)

NATURAL LIGHTING
See DAYLIGHTING

NAVIER-STOKES EQUATION
See NAVIER-STOKES EQUATIONS

NAVIER-STOKES EQUATIONS
Tracking sharp interface of two fluids by the CIP (cubic-interpolated propagation) scheme, 18:28009 (R;JP)

NEBRASKA
A technical approach to groundwater contamination problems, 18:27381 (R;US)

NEGATIVE IONS
See ANIONS

NEGATONS
See ELECTRONS

NEGATRONS
See ELECTRONS

NEODYMIUM ISOTOPES
Deformation studies in the extremely neutron-deficient praseodymium, neodymium and promethium isotopes, 18:27813 (R;US)

NEON
Analysis of neon soft x-ray spectra from short-pulse laser-produced plasmas, 18:27885 (R;US)
Observation of nonsequential ionization of helium and its impact on intensity monitoring, 18:27895 (R;US)
NEOPLASMS
See also GLIOMAS
A reasonable price to prevent death caused by radiation induced neoplasms, 18:27637 (R;SE;In Swedish)
Cancer and birth defects surveillance system for communities around the Savannah River Site: Annual progress report, 18:25922 (R;US)
Combined radiation and hyperthermia: Effects of number of heat fractions and their interval on normal and tumor tissues, 18:27524 (R;IT)
NEOPRENE
Final report for Allied-Signal Aerospace Company, Kansas City Division on protective glove permeation analysis, 18:26910 (R;US)
NEPTUNIUM
Combined TRU-Sr extraction/recovery process, 18:25678 (R;US)
NEPTUNIUM COMPOUNDS
Consecutive determination of pentavalent neptunium by spectrophotometric method, 18:26846 (R;JP;In Japanese)
NET TOKAMAK
Occupational radiation dose assessment process at research thermonuclear fusion plant, 18:28043 (RA;IT)
NETWORKS (COMPUTER)
See COMPUTER NETWORKS
NEURAL NETWORKS
Adaptive Transfer Function Networks, 18:28172 (R;US)
Identification of continuous-time dynamical systems: Neural network based algorithms and parallel implementation, 18:28169 (R;US)
Stabilizing periodic orbits in chaotic neural dynamics, 18:28144 (R;IT)
Strategy acquisition by an artificial neural network: Experiments in learning to play a stochastic game, 18:28177 (RA;US)
There is future for present generation of artificial neural networks, 18:28145 (R;IT)
NEUTRAL BEAM SOURCES
A PC-PCL-based control system for the high-voltage pulsed-power operation of the Intense Diagnostic Neutral Beam (IDNB) Experiment, 18:28004 (R;US)
NEUTRAL PARTICLES
Advances in low energy neutral atom imaging techniques, 18:27710 (R;US)
Terrestrial magnetospheric imaging: Numerical modeling of low energy neutral atoms, 18:27718 (R;US)
NEUTRAL-PARTICLE TRANSPORT
See also NEUTRON TRANSPORT
PHOTON TRANSPORT
MCNP/KENO criticality benchmarks, 18:26899 (R;US)
New developments enhancing MCNP for criticality safety, 18:26900 (R;US)
NEUTRINO OSCILLATION
Are there atmospheric neutrino oscillations?, 18:27765 (R;US)
NEUTRON ACTIVATION ANALYSIS
Automatization of the neutron activation analysis method in the nuclear analysis laboratory, 18:26837 (R;CU;In Spanish)
Recent development of radioanalytical method at IBR-2 pulsed fast reactor of the JINR, 18:26847 (R;RU;In Russian)
NEUTRON BEAMS
[Travel to Japan to attend the fifth international symposium on advanced nuclear energy research and to visit the new research reactor JRR-3M]: Foreign trip report, March 9–12, 1993, 18:25920 (R;US)
NEUTRON CAPTURE
See NEUTRON REACTIONS
NEUTRON CAPTURE THERAPY
Summing up: The physics of NCT, 18:27521 (R;US)
NEUTRON DETECTORS
See also HE-3 COUNTERS
Moisture effects on high level coincidence counter assays of mixed uranium/plutonium oxide, 18:25888 (R;IT)
NEUTRON DIFFRACTION
Development and applications of the reverse neutron time-of-flight method with Fourier-type beam chopper, 18:27913 (R;FI)
New techniques for synchrotron powder diffraction studies, 18:26834 (R;US)
[Travel to Japan to attend the fifth international symposium on advanced nuclear energy research and to visit the new research reactor JRR-3M]: Foreign trip report, March 9–12, 1993, 18:25920 (R;US)
NEUTRON DIFFUSION EQUATION
PDQ7: 1,2 or 3-d few-gp diffusion depletion, 18:28150 (CM;US)
NEUTRON DOSIMETRY
Eleventh DOE workshop on personnel neutron dosimetry, 18:27632 (R;US)
NEUTRON GENERATORS
Radiation protection at Frascati neutron generator, 18:27045 (RA;IT)
NEUTRON HEATING
See RADIATION HEATING
NEUTRON REACTIONS
See also THERMAL FISSION
About anomalous scattering of p neutrons by tellurium nuclei, 18:27854 (R;RU;In Russian)
Analysis of the nonstatistical behaviour of the radiative strength function at capture of thermal and resonance neutron, 18:27855 (R;RU;In Russian)
Calculations of neutron cross sections for $^{178}Hf^{m2}$ in the energy range 10 KeV-3 MeV and for thermal neutrons, 18:27864 (R;FR;In French)
Comparative analysis of systematics on (n,p) reaction cross sections at neutron energy ≃14-15 MeV, 18:28211 (R;RU;In Russian)
NEUTRON SOURCE FACILITIES
Design for low beam loss in accelerators for intense neutron source applications, 18:27012 (R;US)
NEUTRON SOURCES
See also NEUTRON GENERATORS
A Los Alamos design study for a high-power spallation-neutron-source driver, 18:25916 (R;US)
First results from PHAROS, the new chopper spectrometer at LANSCE, 18:27201 (R;US)
Injector design for high-current CW proton linacs, 18:27066 (R;US)
Linac design study for an intense neutron-source driver, 18:25917 (R;US)
Materials irradiation subpanel report to BESAC neutron sources and research panel, 18:26279 (R;US)
Proposal of a wide-band mirror polarizer of slow neutrons at a pulsed neutron source, 18:27870 (R;RU)
NEUTRON SPECTROMETERS
First results from PHAROS, the new chopper spectrometer at LANSCE, 18:27201 (R;US)
High efficiency neutron spectrometer with low background, 18:27196 (R;RU)
ISIS annual report for the financial year 1 April 1991 to 31 March 1992. V. 1, 18:28084 (R;GB)
ISIS annual report for the financial year 1 April 1991 to 31 March 1992. V. 2, 18:28085 (R;GB)
NEUTRON STARS
Fast pulsars, compact stars, and the strange matter hypothesis, 18:27722 (R;US)
NEUTRON THERAPY
See also NEUTRON CAPTURE THERAPY
A benchmark analysis of radiation flux distribution for Boron Neutron Capture Therapy of canine brain tumors, 18:27523 (R;US)
NEUTRON TRANSPORT
Application of a simple analytical model to estimate effectiveness of radiation shielding for neutrons, 18:27874 (R;US)
General order characteristic methods for solving neutron transport problems, 18:27865 (R;US)
Installation of Monte Carlo neutron and photon transport code system MCNP4: Improvements of graphic functions and

cross section library for Sun work stations, 18:27850 (R;JP;In Japanese)
MCNP4A: Features and philosophy, 18:27873 (R;US)
Monte Carlo based formula for radiation shielding assessment in the forward direction, 18:27875 (R;US)

NEUTRONS
Determination of nucleon structure functions on the assumption of diquark presence, 18:27807 (R;FR;In French)

NEVADA TEST SITE
A portable vacuum hammer seismic source for use in tunnel environments, 18:27226 (R;US)
A study of the homogenization of soils, 18:27394 (R;US)
Archaeological data recovery at drill hole U19az, Nevada Test Site, Nye County, Nevada, 18:27396 (R;US)
Archaeological investigations at sample unit U19ax, Nevada Test Site, Nye County, Nevada, 18:27395 (R;US)
Fire on the mesa: Archaeological investigations at the U19an borrow pit on the Nevada Test Site, 18:27397 (R;US)
Groundwater chemistry at the Nevada Test Site: Data and preliminary interpretations, 18:27485 (R;US)

NICKEL
About the role of divacancies and di-interstitials in the theory of homogeneous nucleation of radiation-induced voids in metals, 18:26641 (RA;UA;In Russian)
Evolution of radiation defects attached to the annealing of nickel implanted by xenon to concentration of 0.08...1at%, 18:26649 (RA;UA;In Russian)
Hydrogen permeability of constructor materials during ion bombardment, 18:26638 (RA;UA;In Russian)
Investigation of recovery of nickel from raffinate treated uranium ore, 18:25629 (R;KP;In Korean)
Passive oxide films on well-defined nickel surfaces: An examination of film growth on Ni(100) with ex situ scanning tunneling microscopy, 18:26570 (R;US)
Quantum state resolved desorption of CO from solid surfaces: Final technical report, 18:26859 (R;US)
Surface damage by emission of target atoms under ion bombardment, 18:26659 (RA;UA;In Russian)
The influence of implanted helium on nickel radiation resistance under conditions simulating plasma flux disruption in nuclear fusion reactor, 18:26662 (RA;UA;In Russian)
Thin Ni silicide formation by low temperature-induced metal atom reaction with ion implanted amorphous silicon, 18:26740 (R;US)
Use of dispersed catalysts for coal liquefaction, 18:25478 (R;US)
Vacancy and impurity complexes in the Ni-Sc system and their influence on the radiation swelling, 18:26627 (RA;UA;In Russian)

NICKEL 58
Use of median energy proton beams in radiation damage physics and in radiation material science, 18:27922 (RA;UA;In Russian)

NICKEL 58 BEAMS
Folding model analysis of $^{58}Ni + {}^{64}Ni$ elastic and inelastic scattering at E_{lab}=203.8 and 219.2 MeV, 18:27840 (R;FR)

NICKEL 64 TARGET
Folding model analysis of $^{58}Ni + {}^{64}Ni$ elastic and inelastic scattering at E_{lab}=203.8 and 219.2 MeV, 18:27840 (R;FR)

NICKEL ALLOYS
See also CHROMIUM-NICKEL STEELS
NICKEL BASE ALLOYS

Crystal Defects
Space and time dissipation structures in impurity crystals under irradiation, 18:26611 (RA;UA;In Russian)

Crystal-Phase Transformations
Magnetic state of $Fe_{69.5}Ni_{30.5}$ alloy with bcc-fcc transitions induced by ion irradiation, 18:26654 (RA;UA;In Russian)

Hardening
Ternary alloying effects in polycrystalline β-NiAl, 18:26706 (R;US)

Internal Friction
Absorption of radiation vacancies by grain boundaries in metal and steels, 18:26636 (RA;UA;In Russian)
Anelastic relaxation properties of nickel and 0Cr16Ni11Mo3 steel with rare-earth additions, 18:26635 (RA;UA;In Russian)

Ion Implantation
Dispersion and amorphization of nickel-titanium under mechanical and radiation treatment, 18:26650 (RA;UA;In Russian)
Structural state in ion irradiated metal systems, 18:26622 (RA;UA)

Magnetic Moments
Magnetic state of $Fe_{69.5}Ni_{30.5}$ alloy with bcc-fcc transitions induced by ion irradiation, 18:26654 (RA;UA;In Russian)

Molecular Structure
Chemical and displacement atomic pair correlations in crystalline solid solutions recovered by anomalous x-ray scattering in Fe-Ni alloys, 18:26586 (R;US)

Phase Transformations
Efficiency of collisional precipitate resolution, 18:26697 (RA;UA)

Physical Radiation Effects
About the role of divacancies and diinterstitials in the theory of homogeneous nucleation of radiation-induced voids in metals, 18:26615 (RA;UA;In Russian)
Absorption of radiation vacancies by grain boundaries in metal and steels, 18:26636 (RA;UA;In Russian)
Anelastic relaxation properties of nickel and 0Cr16Ni11Mo3 steel with rare-earth additions, 18:26635 (RA;UA;In Russian)
Efficiency of collisional precipitate resolution, 18:26697 (RA;UA)
Magnetic state of $Fe_{69.5}Ni_{30.5}$ alloy with bcc-fcc transitions induced by ion irradiation, 18:26654 (RA;UA;In Russian)
Space and time dissipation structures in impurity crystals under irradiation, 18:26611 (RA;UA;In Russian)
Structural state in ion irradiated metal systems, 18:26622 (RA;UA)
Vacancy and impurity complexes in the Ni-Sc system and their influence on the radiation swelling, 18:26627 (RA;UA;In Russian)

Rolling
Dispersion and amorphization of nickel-titanium under mechanical and radiation treatment, 18:26650 (RA;UA;In Russian)

Scandium Additions
Vacancy and impurity complexes in the Ni-Sc system and their influence on the radiation swelling, 18:26627 (RA;UA;In Russian)

Swelling
Vacancy and impurity complexes in the Ni-Sc system and their influence on the radiation swelling, 18:26627 (RA;UA;In Russian)

Synthesis
Summary report of research accomplishments, 18:26750 (R;US)

Tensile Properties
Anelastic relaxation properties of nickel and 0Cr16Ni11Mo3 steel with rare-earth additions, 18:26635 (RA;UA;In Russian)

Vacancies
Vacancy and impurity complexes in the Ni-Sc system and their influence on the radiation swelling, 18:26627 (RA;UA;In Russian)

NICKEL BASE ALLOYS
See also ALLOY-NI45FE34CR20
A reexamination of grain boundary fracture in Ni_3Al: Environmental and alloying effects, 18:26599 (R;US)
Calculation of the thermopower of Ni-P amorphous alloys, 18:26588 (R;US)
In-reactor creep of steels and alloys with various Fe-Cr-Ni bases in the BN-350 commercial fast reactor, 18:26668 (RA;UA;In Russian)
Phase structural changes in nickel alloys in the process of thermal ageing and under irradiation, 18:26621 (RA;UA;In Russian)

NICKEL COMPLEXES
EXAFS studies on the structure of photoexcited cyclopentadienylnickelnitrosyl(C_5H_5NiNO), 18:26875 (R;US)

NICKEL OXIDES
Fundamental studies of the mechanism of catalytic reactions with catalysts effective in the gasification of carbon solids and the oxidative coupling of methane: Quarterly report, January 1, 1993–March 31, 1993, 18:25541 (R;US)

NICKEL SILICIDES
Thin Ni silicide formation by low temperature-induced metal atom reaction with ion implanted amorphous silicon, 18:26740 (R;US)

NIOBIUM
Atomic structure of the (310) twin in niobium: Theoretical predictions and comparison with experimental observation, 18:26733 (R;US)
Interfacial structure of lattice mismatched bcc(110)/bcc(110) transition metal superlattices, 18:26569 (R;US)
Quantitative HREM study of the atomic structure of the Σ(310)/[001] symmetric tilt grain boundary in Nb, 18:26731 (R;US)
Radiative effects and properties of refractory metals with the bcc and hcp, 18:26658 (RA;UA;In Russian)
Sputtering of graphite, niobium and niobium carbide by neutron bombardment. Computer simulation, 18:26660 (RA;UA;In Russian)

NIOBIUM ALLOYS
Anisotropy
Anisotropy of irradiation strengthening of textured zirconium alloys H-1 and H-2.5, 18:26686 (RA;UA;In Russian)
The structural-phenomenological description of plastic anisotropy of H-1 and H-2.5 alloys, subjected to reactors irradiation, 18:26685 (RA;UA;In Russian)

Creep
The creep of zirconium and Zr-1%Nb alloy under non-stationary irradiation by helium ions, 18:27924 (RA;UA;In Russian)

Diffusion
Changes in zirconium microstructure and properties under LOCA simulation conditions, 18:26682 (RA;UA;In Russian)

Mechanical Properties
The effect of processing on the microstructure and tensile properties of a γ-TiAl based alloy, 18:26700 (R;US)

Microstructure
Changes in zirconium microstructure and properties under LOCA simulation conditions, 18:26682 (RA;UA;In Russian)

Oxidation
Changes in zirconium microstructure and properties under LOCA simulation conditions, 18:26682 (RA;UA;In Russian)
Effects of alloying and temperature on the high-temperature oxidation of Cr-Cr_2Nb, 18:26596 (R;US)
The mechanism and mathematical model of nodule (spot) corrosion of zirconium alloys, 18:26690 (RA;UA;In Russian)

Physical Radiation Effects
Anisotropy of irradiation strengthening of textured zirconium alloys H-1 and H-2.5, 18:26686 (RA;UA;In Russian)
Investigation and prediction of cladding materials deformation behaviour under rapid heating, 18:26696 (RA;UA;In Russian)
Irradiation effect on corrosion cracking of WWER reactors fuel element claddings ion iodium and cesium iodide medium, 18:26679 (RA;UA;In Russian)
Radiation growth of zirconium alloys, 18:26684 (RA;UA;In Russian)
Resistance to destruction of zirconium tubes in technological channels with account of radiation creeping and delayed hydrogen failure, 18:26695 (RA;UA;In Russian)
Second phase inclusion effect on the mechanism of irradiation nodula corrosion of the unswelling alloys, 18:26691 (RA;UA;In Russian)
Study of crack initiation and propagation mechanism on SCC of Zr-1%Nb VVER fuels, 18:26692 (RA;UA;In Russian)
The creep of zirconium and Zr-1%Nb alloy under non-stationary irradiation by helium ions, 18:27924 (RA;UA;In Russian)
The structural-phenomenological description of plastic anisotropy of H-1 and H-2.5 alloys, subjected to reactors irradiation, 18:26685 (RA;UA;In Russian)

Pitting Corrosion
Second phase inclusion effect on the mechanism of irradiation nodula corrosion of the unswelling alloys, 18:26691 (RA;UA;In Russian)
The mechanism and mathematical model of nodule (spot) corrosion of zirconium alloys, 18:26690 (RA;UA;In Russian)

Stacking Faults
Investigation of quench induced faults in the hcp crystalline structure of zirconium alloys, 18:26678 (RA;UA;In Russian)

Stress Corrosion
Irradiation effect on corrosion cracking of WWER reactors fuel element claddings ion iodium and cesium iodide medium, 18:26679 (RA;UA;In Russian)
Study of crack initiation and propagation mechanism on SCC of Zr-1%Nb VVER fuels, 18:26692 (RA;UA;In Russian)

Ultimate Strength
Investigation and prediction of cladding materials deformation behaviour under rapid heating, 18:26696 (RA;UA;In Russian)

Wear Resistance
Strength of technological channel tubes, 18:26683 (RA;UA;In Russian)

Yield Strength
Anisotropy of irradiation strengthening of textured zirconium alloys H-1 and H-2.5, 18:26686 (RA;UA;In Russian)

NIOBIUM CARBIDES
Sputtering of graphite, niobium and niobium carbide by neutron bombardment. Computer simulation, 18:26660 (RA;UA;In Russian)

NIOBIUM IODIDES
Synthesis and properties of novel cluster phases: Progress report, [June 30, 1993], 18:26786 (R;US)

NIOBIUM SULFIDES
Alkali/TX_2 catalysts for CO/H_2 conversion to C_1-C_4 alcohols: Final technical progress report, September 1, 1988–August 31, 1991, 18:25528 (R;US)

NIPER
See US NIPER

NITRATES
See also SODIUM NITRATES
Effect of potential Hanford ferrocyanide waste constituents on the reaction between ferrocyanide and nitrates/nitrites, 18:25744 (R;US)
Electrochemical processing of nitrate waste solutions: Phase 2, Final report, 18:25834 (R;US)
Travel to Bristol, England to observe "proof-of-principle" experiments for nitric acid recycle and nitrate destruction, review progress on contracted work, and the project schedule status: Foreign trip report, July 25–30, 1992, 18:25689 (R;US)

NITRIC ACID
Radiolytic hydrogen production from process vessels in HB line - production rates compared to evolution rates and discussion of LASL reviews, 18:25828 (R;US)
Raman scattering method for measuring HNO_3 concentration, 18:26854 (R;US)
Travel to Bristol, England to observe "proof-of-principle" experiments for nitric acid recycle and nitrate destruction, review progress on contracted work, and the project schedule status: Foreign trip report, July 25–30, 1992, 18:25689 (R;US)

NITRIC OXIDE
Catalytic activity of oxidized (combusted) oil shale for removal of nitrogen oxides with ammonia as a reductant in combustion gas streams, Part 2, 18:25620 (R;US)

NITRITES
Effect of potential Hanford ferrocyanide waste constituents on the reaction between ferrocyanide and nitrates/nitrites, 18:25744 (R;US)

NITRO COMPOUNDS
Laboratory solvent reuse – Liquid chromatography, 18:25730 (R;US)

NITROGEN DIOXIDE
Control of NOx and SOx generation in fluidized bed coal combustion, and N2O generation and its control, 18:25575 (IA;JP;In Japanese)

NUCLEAR FUELS
See also DISPERSION NUCLEAR FUELS
SPENT FUELS
Comparison of a constraint directed search to a genetic algorithm in a scheduling application, 18:25642 (R;US)
Fission product release rate from aluminum clad uranium fuel, 18:26268 (R;US)

Intergranular fission gas bubbles and solid precipitates in UO_2 irradiated at high burnup in various conditions, 18:26146 (RA;XA)
P-10 air monitor design criteria, 18:25639 (R;US)
Review of Studsvik's international fuel R and D projects, 18:26142 (RA;XA)

NUCLEAR MAGNETIC RESONANCE
Toroid excitation of nuclear magnetic resonance, 18:27708 (R;RU;In Russian)

NUCLEAR MATERIALS MANAGEMENT
Fuzzy risk analysis for nuclear safeguards, 18:25892 (R;US)
Nuclear materials control technology in the post-cold war world: Radiation-based methods and information management systems, 18:25895 (R;US)
Recent miniature MCA technology developments at Los Alamos, 18:25894 (R;US)
Statistics applied to safeguards, 18:25891 (R;US)

NUCLEAR MEDICINE
Travel to Germany to work on off-site assignment at the Clinic for Nuclear Medicine at the University of Bonn, Germany, for a one-year period through support as a Senior American Scientist of the Alexander von Humboldt Foundation of Germany: Foreign trip report, June 10, 1991–June 4, 1992, 18:27528 (R;US)

NUCLEAR POWER
Electricity market under change: A study of electric power markets in Eastern Europe, CIS and the Baltic states, 18:26418 (R;SE;In Swedish)

NUCLEAR POWER PLANTS

Artificial Intelligence
The potential of knowledge based systems in nuclear installations: Report of a specialists' meeting/workshop held in Erlangen, Germany, 21-25 September 1992, 18:26256 (R;XA)

Computer-Aided Design
Decision aid software development for nuclear reactors, 18:26115 (RA;XA)

Control Rooms
The "glass" control room and human error in the nuclear power plant, 18:26265 (R;US)
The development and evaluation of guidelines for the review of advanced human-system interfaces, 18:26250 (R;US)

Economic Analysis
Nuclear and conventional baseload electricity generation cost experience, 18:26446 (R;XA)

Expert Systems
FBOLES: An expert system for fault diagnoses of nuclear power plants, 18:26258 (RA;XA)
The potential of knowledge based systems in nuclear installations: Report of a specialists' meeting/workshop held in Erlangen, Germany, 21-25 September 1992, 18:26256 (R;XA)

Fission Product Release
RASCAL Version 2.0 workbook: Volume 2, 18:26273 (R;US)

Pipes
Short Cracks in Piping and Piping Welds: Semiannual report, October 1991–March 1992: Volume 2, No. 2, 18:26240 (R;US)

Power Distribution Systems
EDSFI: Electrical Distribution System Functional Inspection Data Base, 18:28161 (CM;US)

Radiation Accidents
Community emergency response to nuclear power plant accidents: A selected and partially annotated bibliography, 18:26266 (R;US)

Radiation Monitoring
NRC TLD Direct Radiation Monitoring Network: Progress report, January–March 1993: Volume 13, No. 1, 18:27433 (R;US)
Quality assurance of radiation monitoring performed of the swedish nuclear industry. Discharges of liquid wastes 1989, 18:26277 (R;SE;In Swedish)

Reactor Accidents
Community emergency response to nuclear power plant accidents: A selected and partially annotated bibliography, 18:26266 (R;US)
SHEAN (Simplified Human Error Analysis code) and automated THERP, 18:26386 (R;US)

Reactor Components
A comparison of response spectrum and direct integration analysis methods as applied to a nuclear component support structure: Revision 1, 18:26387 (R;US)
Aging assessments: A strategy for today and the future, 18:26345 (R;US)
Computational problems with the binomial failure rate model and incomplete common cause failure reliability data, 18:26239 (R;US)
Interpretation of risk significance of passive component aging using probabilistic structural analysis, 18:26353 (R;US)
Licensee contractor and vendor inspection status report: Quarterly report, January–March 1993: Volume 17, Number 1, 18:26211 (R;US)

Reactor Control Systems
Addressing the susceptibility of digital systems to electromagnetic interference, 18:26254 (R;US)

Reactor Licensing
United States Nuclear Regulatory Commission Staff practice and procedure digest: Commission, Appeal Board and Licensing Board Decisions, July 1972–June 1992: Digest 6, Revision 6, 18:26213 (R;US)

Reactor Physics
DIF3D-K: A nodal kinetics code for solving the time-dependent diffusion equation in hexagonal-Z geometry: New Production Reactors Program, 18:26221 (R;US)

Reactor Safety
Expert system application and neural network development for nuclear safety improvement, 18:26257 (RA;XA)
Guidelines for IAEA International Regulatory Review Teams (IRRTs), 18:28216 (R;XA)
Status of nuclear safety R&D in the US, 18:26342 (R;US)

Regulations
Guidelines for IAEA International Regulatory Review Teams (IRRTs), 18:28216 (R;XA)

Reliability
The NUCLARR databank: Human reliability and hardware failure data for the nuclear power industry, 18:26352 (R;US)

Retrofitting
Impact on the steam electric power industry of deleting Section 316(a) of the Clean Water Act: Capital costs, 18:26462 (R;US)

Seismic Effects
Methods used for the treatment of non-proportionally damped structural systems, 18:26365 (R;US)

Service Life
[Life Management of Nuclear Power Plants]: Foreign trip report, February 15–22, 1992, 18:26243 (R;US)

Spent Fuels
Transportation infrastructure upgrades in the South: A compilation of state plans for construction near nuclear reactor sites, 18:25671 (R;US)

Steam Generators
Modeling of a horizontal steam generator for the submerged nuclear power station concept, 18:26228 (R;US)

Valves
Cavitation guide for control valves, 18:26242 (R;US)

Welded Joints
Short Cracks in Piping and Piping Welds: Semiannual report, October 1991–March 1992: Volume 2, No. 2, 18:26240 (R;US)

OAK RIDGE RESERVATION
Annual report on the Background Soil Characterization Project on the Oak Ridge Reservation, Oak Ridge, Tennessee: Results of Phase 1 investigation, 18:27398 (R;US)
Management plan for the Oak Ridge Reservation Hydrology and Geology Study Groundwater Data Base, 18:27446 (R;US)
The application of GIS and remote sensing technologies for site characterization and environmental assessment, 18:27388 (R;US)
[The Hanford story, Chapter 15], 18:25634 (R;US)
[The Hanford story, Chapter 16], 18:25635 (R;US)
[The Hanford story, Chapter 18], 18:27252 (R;US)
[The Hanford story, chapter 20], 18:27255 (R;US)

OCCUPATIONAL EXPOSURE
Personnel dosimetry, 1991, 18:27644 (R;SE;In Swedish)

OCCUPATIONAL SAFETY
Integrating environment, safety and health training at a national laboratory, 18:26419 (R;US)
Who's protecting you from hazardous substances?, 18:27659 (R;US)

OCEANIC CIRCULATION
[An experimental regional scale climate simulation laboratory]: Year 1 progress letter, 18:27320 (R;US)

OCEANS
See SEAS

OFF-GAS SYSTEMS
Cooler and particulate separator for an off-gas stack, 18:27357 (PA;US)
Measurement of cesium and mercury emissions from the vitrification of simulated high level radioactive waste, 18:25815 (R;US)

OFFICE BUILDINGS
DOE standard compliance demonstration program: An office building example, 18:26513 (R;US)

OFFSHORE PLATFORMS
Densified cement ultra-fine particle-based materials, 18:26934 (R;DK)

OHIO
Catalytic reduction of SO_x-NO_x in coal flue gas: Supplement to the final report, 18:26110 (R;US)
Site evaluation criteria for a horizontal well in the Clinton Sandstone, Mahoning County, Ohio, 18:25591 (R;US)

OHMIC PLASMA HEATING
See JOULE HEATING

OHMIC RESISTANCE
See ELECTRIC CONDUCTIVITY

OIL FIELDS
Alaska North Slope National Energy Strategy initiative: Analysis of five undeveloped fields, 18:25604 (R;US)
Establishment of an oil and gas database for increased recovery and characterization of oil and gas carbonate reservoir heterogeneity: Appendix 1, Volume 3, 18:25581 (R;US)
Establishment of an oil and gas database for increased recovery and characterization of oil and gas carbonate reservoir heterogeneity: Appendix 1, Volume 2 (Jurassic Smackover Formation), 18:25582 (R;US)
Geologic setting, petrophysical characteristics, and regional heterogeneity patterns of the Smackover in southwest Alabama: Draft topical report on Subtasks 2 and 3, 18:25580 (R;US)
[Diffusion/dispersion transport of chemically reacting species]: Progress report, FY 1992–1993, 18:26050 (R;US)
[National Institute for Petroleum and Energy Research] 1991 annual report, October 1, 1990–September 30, 1991, 18:25594 (R;US)

OIL RESIDUES
See PETROLEUM RESIDUES

OIL SHALE WASTE WATER
See WASTE WATER

OIL SPILL FINGERPRINTING
See OIL SPILLS
PATTERN RECOGNITION

OIL SPILLS
Application of EM holographic methods to borehole vertical electric source data to map a fuel oil spill, 18:25606 (R;US)
Comparison of three field screening techniques for delineating petroleum hydrocarbon plumes in groundwater at a site in the southern Carson Desert, Nevada, 18:27447 (R;US)

OIL WELLS
Assist in the recovery of bypassed oil from reservoirs in the Gulf of Mexico: Quarterly report, January 1–March 30, 1993, 18:25587 (R;US)
BOAST II for the IBM 3090 and RISC 6000: Final report, 18:25589 (R;US)

Evaluation of enhanced recovery operations in Smackover fields of southwest Alabama: Draft topical report on Subtasks 5 and 6, 18:25586 (R;US)
Mechanism and environmental effects on MEOR induced by the alpha process: Final report, 18:25585 (R;US)
Observations of broad-band micro-seisms during reservoir stimulation, 18:25597 (R;US)
Site evaluation criteria for a horizontal well in the Clinton Sandstone, Mahoning County, Ohio, 18:25591 (R;US)
Techniques for mapping the types, volumes, and distribution of clays in petroleum reservoirs and for determining their effects on oil production: Final report, 18:25593 (R;US)

OMEGA MINUS
See OMEGA PARTICLES

OMEGA PARTICLES
Early baryon and meson spectroscopy culminating in the discovery of the Omega minus SU(3) and quarks, 18:27768 (R;US)

OMEGA-1778 RESONANCES

Assessment of management alternatives for LWR wastes. Volume 6. Cost determination of the LWR waste management routes (treatment/conditioning/packaging/transport operations), 18:26217 (R;XE)

Radioactive Waste Processing
Assessment of options for the treatment of Sizewell PWR liquid effluent, 18:26267 (R;GB)

Reactor Accidents
Analysis of accidents during the mid-loop operating state at a PWR, 18:26343 (R;US)

Reactor Components
Long-term embrittlement of cast duplex stainless steels in LWR systems: Semiannual report, October 1991–March 1992: Volume 7, No.1, 18:26713 (R;US)

Reactor Licensing
DOE plutonium disposition study: Pu consumption in ALWRs: Volume 2, Final report, 18:26128 (R;US)

Reactor Maintenance
Development of RCM methodology and tools for EDF nuclear power plants, 18:26129 (R;FR;In French)

Reactor Protection Systems
Qualification issues for advanced light-water reactor protection systems, 18:26253 (R;US)

Reactor Safety
Assessment of RELAP5/MOD2 computer code against the Net Load Trip Test data from Yong-Gwang, Unit 2, 18:26367 (R;US)
Probability of the iodine spike release rate during an SGTR, 18:26354 (R;US)
Status of nuclear safety R&D in the US, 18:26342 (R;US)

Reliability
Engineering reliability in design phase: An application to AP-600 reactor passive safety system, 18:26131 (R;US)

Service Life
[Life Management of Nuclear Power Plants]: Foreign trip report, February 15–22, 1992, 18:26243 (R;US)

Spent Fuels
Spent nuclear fuel storage – Performance tests and demonstrations, 18:26161 (R;US)

Steam Generators
Assessment of PWR Steam Generator modelling in RELAP5/MOD2: International Agreement Report, 18:26157 (R;US)
Increasing knowledge of stress corrosion cracking in PWR steam generator tubes combining Eddy current testing and nondestructive analysis of mock-ups, 18:26125 (R;FR)
Probability of the iodine spike release rate during an SGTR, 18:26354 (R;US)

Transients
Assessment of CCFL model of RELAP5/MOD3 against simple vertical tubes and rod bundle tests: International Agreement Report, 18:26156 (R;US)

PYRITE
Ultrasonic ash/pyrite liberation: Final technical report, 18:25477 (R;US)

PYRITES
See PYRITE

PYROLYSIS PRODUCTS
See also CHARS
COAL GAS
Novel technique for coal pyrolysis and hydrogenation product analysis: Final technical report, 18:25529 (R;US)

PYROTEK PROCESS
See LOW BTU GAS
WASTE PROCESSING

PZT
Solution chemistry optimization of sol-gel processed PZT thin films, 18:26769 (R;US)

Q

QATAR
Qatar's economy transition from oil based economy to gas based economy, 18:25605 (R;QA)
Some improvement of charcoal measurement techniques used for indoor radon measurements in Qatar, 18:27341 (R;QA)
Status of energy intensive industrial development and ecological aspects of State of Qatar, 18:25617 (I;QA)
The natural gas resources and industrial development in Qatar, 18:25616 (I;QA)

QUANTUM CHROMODYNAMICS
QCD condensate values from analytical structure of pion's form factor via sum rules methods, 18:27762 (R;AT)
Research in theoretical nuclear physics: Progress report (Nuclear Theory Group, Dept. of Physics, State Univ. of New York at Stony Brook), 18:27747 (R;US)
The renormalization of the axial anomaly in dimensional-regularization, 18:27759 (R;NL)
The three-loop QCD β-function and anomalous dimensions, 18:27758 (R;NL)
Travel to Aachen, Germany, to attend the conference on recent developments and applications of the theory of quantum chromodynamics entitled "QCD – 20 years later": Foreign trip report, June 5–18, 1992, 18:27749 (R;US)

QUANTUM ELECTRODYNAMICS
Selffield quantum electrodynamics without infinities. A new calculation of vacuum polarization, 18:27756 (R;XA)

QUANTUM FIELD THEORY
See also PHI4-FIELD THEORY
QUANTUM CHROMODYNAMICS
QUANTUM ELECTRODYNAMICS
1992 Trieste lectures on topological gauge theory and Yang-Mills theory, 18:27736 (R;XA)
Finite-dimensional representations of the quantum superalgebra $U_q[gl(2/2)]$: 1. Typical representations at generic q, 18:27737 (R;XA)
Phase space representations and quantum probability theory, 18:27688 (R;RU)

QUANTUM MECHANICS
Phase space representations and quantum probability theory, 18:27688 (R;RU)
The geometric phase in quantum physics, 18:27671 (R;US)

QUANTUM OPERATORS
On paragrassmann differential calculus, 18:27694 (R;RU)
Paragrassmann analysis and quantum groups, 18:27689 (R;RU)

QUARK MATERIAL
See QUARK MATTER

QUARK MATTER
PHENIX Conceptual Design Report: An experiment to be performed at the Brookhaven National Laboratory Relativistic Heavy Ion Collider, 18:27745 (R;US)
Purpose of the trip was to hold discussions with several institutions in Russia on their prospective collaboration with the PHENIX experiment at the BNL Relativistic Heavy Ion Collider (RHIC): Foreign trip report, March 29, 1992–April 4, 1992, 18:27834 (R;US)
Radiative energy loss in the quark-gluon plasma, 18:27752 (R;FR)
The theory of relativistic heavy ion collisions: Progress report, 18:27828 (R;US)
Theoretical status of J/ψ suppression, 18:27769 (R;US)

QUARK MODEL
Determination of nucleon structure functions on the assumption of diquark presence, 18:27807 (R;FR;In French)

QUARK PLASMA
See QUARK MATTER

QUARK SEA
See QUARK MATTER

QUARK-GLUON INTERACTIONS
On the validity of perturbative evolution of structure functions from low Q^2, 18:27760 (R;GB)

QUARK-GLUON PLASMA
See QUARK MATTER

QUARKS
A search for scalar leptoquarks in D0, 18:27777 (R;US)
Early baryon and meson spectroscopy culminating in the discovery of the Omega minus SU(3) and quarks, 18:27768 (R;US)
On the validity of perturbative evolution of structure functions from low Q^2, 18:27760 (R;GB)
Quark and gluon jets at CDF, 18:27775 (R;US)
QUARTZ
Theory of the electronic and structural properties of solid state oxides: Annual technical report 1993, 18:26751 (R;US)
QUASARS
A positron annihilation radiation telescope using Laue diffraction in a crystal lens, 18:27701 (R;US)
QUASI PARTICLES
Effect of spontaneous decay of superconductor quasiparticles in the tunneling density of states, 18:27932 (R;US)
QUENCHING
Collider bypass diode thermal simulations and measurements for the SSCL, 18:27136 (R;US)
QUENCHING (SCINTILLATION)
See SCINTILLATION QUENCHING
QUINOLINES
Use of dispersed catalysts for coal liquefaction, 18:25478 (R;US)

R

R CODES
Assessment of RELAP5/MOD2 against a 10% load rejection transient from 75% steady state in the Vandellos II Nuclear Power Plant, 18:26159 (R;US)
Assessment of RELAP5/MOD2 against a turbine trip from 100% power in the Vandellos II nuclear power plant, 18:26158 (R;US)
RELAP5 assessment using LSTF test data SB-CL-18, 18:26368 (R;US)
RELAP5/MOD3 assessment using the Semiscale 50% Feed Line Break test S-FS-11, 18:26369 (R;US)
REMIT3.0: Radiation Exposure Monitoring and Information Transmittal System, 18:28159 (CM;US)
RISKIND: Radiological Risk Assessment Code for Spent Nuclear Fuel Transportation, 18:28152 (CM;US)
Studies of nuclei far from stability in the A=80 mass region: Final report, 18:27178 (R;US)
R-1650 RESONANCES
See MESONS
RADAPPERTIZATION
See RADIOSTERILIZATION
RADIATION ACCIDENTS
Community emergency response to nuclear power plant accidents: A selected and partially annotated bibliography, 18:26266 (R;US)
Off-site contamination at Oak Ridge National Laboratory, 18:25851 (R;US)
Radiation surveyance actions following large-area contamination, 18:27437 (R;AT;In German)
Radiological transportation emergency response training course funding and timing in the southern states, 18:25657 (R;US)
Southern State Radiological Transportation Emergency Response Training Course Summary, 18:25664 (R;US)
Southern state radiological emergency preparedness and response agencies, 18:27658 (R;US)
Southern state radiological emergency preparedness and response plans: A collection of matrices, 18:25852 (R;US)
Southern states radiological emergency response laws and regulations, 18:25853 (R;US)
Southern states radiological emergency response laws and regulations, 18:25659 (R;US)
Southern states radiological emergency response laws and regulations, 18:25854 (R;US)
System response of a DOE Defense Program package in a transportation accident environment, 18:25675 (R;US)

RADIOACTIVE WASTE DISPOSAL
B Codes
Sensitivity analysis and benchmarking of the BLT low-level waste source term code, 18:25732 (R;US)
Clays
Radionuclides sorption in clay soils, 18:27410 (IA;AR;In Spanish)
Computerized Simulation
Sensitivity analysis and benchmarking of the BLT low-level waste source term code, 18:25732 (R;US)
Concretes
Long-term durability experiments with concrete-based waste packages in simulated repository conditions, 18:25841 (R;FI)
Copper
Long term corrosion tests of OFHC-coppers in simulated repository conditions: Final report, 18:25843 (R;FI)
Cost Estimation
Pretreatment of Plutonium Finishing Plant (PFP) sludge: Report for the period October 1990–March 1992, 18:25743 (R;US)
Report on waste burial charges: Escalation of decommissioning waste disposal costs at low-level waste burial facilities: Revision 3, 18:25677 (R;US)
Geophysical Surveys
The Nirex Sellafield site investigation: the role of geophysical interpretation, 18:25690 (R;GB)
Ground Water
Modelling of water-rock interaction at TVO investigation sites: Summary report, 18:27512 (R;FI)
Saline groundwater in crystalline bedrock: A literature survey, 18:27511 (R;FI)
Planning
Partitioning and transmutation: Near-term solution or long-term option?, 18:25763 (R;US)

Radionuclide Migration
Radionuclides sorption in clay soils, 18:27410 (IA;AR;In Spanish)
Review of the sorption of radionuclides on the bedrock of Haestholmen and on construction and backfill materials of a final repository for reactor wastes, 18:27471 (R;FI)
Research Programs
The SSI reviews of the SKB research programs 1992, 18:28092 (R;SE;In Swedish)
Treatment and final disposal of nuclear waste. Aespoe hard rock laboratory, 18:25731 (R;SE)
Risk Assessment
The Nirex Sellafield site investigation: the role of geophysical interpretation, 18:25690 (R;GB)
Rock Mechanics
Application of the continuously-yielding joint model for studying disposal of high-level nuclear waste in crystalline rock, 18:25844 (R;FI)
Hydraulic fracturing rock stress measurement at Haestholmen, Finland, 18:25838 (R;FI)
Rock-Fluid Interactions
Measurements of hydraulic conductivity in deep bedrock at Palmottu, Outokumpu, Pori and Ylivieska, 18:27490 (R;FI;In Finnish)
Safety
Final disposal of spent fuel in the Finnish bedrock: Technical plans and safety assessment, 18:25839 (R;FI;In Finnish)
Sanitary Landfills
Travel to United Kingdom and Germany to transfer foreign landfill barrier and stabilization technologies both to and from the US Department of Energy complex sites: Foreign trip report, March 4–June 30, 1992, 18:25857 (R;US)
Seismic Effects
A review of the seismotectonics of Finland, 18:27472 (R;FI)
Site Characterization
Final disposal of spent nuclear fuel in the Finnish bedrock: Preliminary site investigations, 18:25840 (R;FI;In Finnish)
Site Selection
Finnsjoen study site. Scope of activities and main results, 18:25758 (R;SE)

RADIOACTIVE WASTE FACILITIES

Supercritical water oxidation technology for DWPF, 18:25824 (R;US)
Availability
Experimental Tritium Cleanup System availability analysis from 1984 to 1992, 18:25703 (R;US)
Capacity
Radioactive mixed waste disposal, 18:25785 (R;US)
Charges
Low-level radioactive waste disposal facility fee schedules, 18:25691 (R;US)
Construction
Preliminary near-field environment report: Volume 1, Technical bases for EBS design, 18:25764 (R;US)
Tolerancing requirements for remote handling at the Hanford Waste Vitrification Plant, 18:25797 (R;US)
Cost
Assessment of management alternatives for LWR wastes. Volume 7. Cost and radiological impact associated with near-surface disposal of reactor waste (French concept), 18:26270 (R;XE)
Demolition
Decommissioning of the vitrification cell of the Piver plant, 18:26895 (R;FR;In French)
Design
Current plans to characterize the design basis ground motion at the Yucca Mountain, Nevada Site, 18:25682 (R;US)
Design of the Waste Receiving and Processing Module 2A Facility, 18:25799 (R;US)
Facility effluent monitoring plan for 242-A Evaporator facility: Revision 1, 18:25769 (R;US)
Gas barrier design for the WIPP, 18:25756 (R;US)
Hazardous waste treatment facility and skid-mounted treatment systems at Los Alamos, 18:25725 (R;US)
Low-level radioactive mixed waste land disposal facility – Permanent disposal, 18:25801 (R;US)
Low-level waste disposal - Grout issue and alternative waste form technology, 18:25795 (R;US)
Mobile inspection and repackaging unit, 18:25786 (R;US)
Pilot scale vitrification studies on hazardous and mixed wastes, 18:25822 (R;US)
Radioactive mixed waste disposal, 18:25785 (R;US)
Hazards
Guidelines for the development of natural phenomena hazards design criteria for surface facilities, 18:25880 (R;US)
Human Intrusion
Development of exposure scenarios for CERCLA risk assessments at the Savannah River Site, 18:25814 (R;US)
Maintenance
Maintenance Implementation Plan for B Plant: Revision 1, 18:25810 (R;US)
Operation
Time and motion simulation of the WRAP Module 1 Facility, 18:25802 (R;US)
Performance
A comparative application of the Repository Integration Program (RIP) to Total System Performance Assessment, 1991, 18:25698 (R;US)
The United States Department of Energy process for performance assessment for disposal of low-level radioactive waste, 18:25804 (R;US)
Public Opinion
Trying to make an unwanted facility palatable, 18:25680 (R;US)
Radiation Doses
Assessment of management alternatives for LWR wastes. Volume 7. Cost and radiological impact associated with near-surface disposal of reactor waste (French concept), 18:26270 (R;XE)
Radioactive Waste Processing
Description of project for pretreatment and storage of wastes of L.P.R. (Radiochemical Processes Laboratory), 18:25712 (IA;AR;In Spanish)
Radioactive Waste Storage
Description of project for pretreatment and storage of wastes of L.P.R. (Radiochemical Processes Laboratory), 18:25712 (IA;AR;In Spanish)
Radionuclide Migration
Disposal Unit Source Term (DUST) data input guide, 18:27435 (R;US)
Reliability
Experimental Tritium Cleanup System availability analysis from 1984 to 1992, 18:25703 (R;US)
Remedial Action
Development of exposure scenarios for CERCLA risk assessments at the Savannah River Site, 18:25814 (R;US)
Pit 9 project: A private sector initiative, 18:25863 (R;US)
Safety Analysis
Master Safety Analysis Report (SAR) approach for solid waste treatment, storage, and disposal facilities, 18:25806 (R;US)
The impact of safety analyses on the design of the Hanford Waste Vitrification Plant, 18:25796 (R;US)
Site Characterization
Cross borehole electromagnetic imaging of chemical and mixed waste landfills, 18:25877 (R;US)
Site Selection
Trying to make an unwanted facility palatable, 18:25680 (R;US)
Tanks
DWPF recycle stream corrosion tests, 18:25835 (R;US)

RADIOACTIVE WASTE MANAGEMENT
See also RADIOACTIVE WASTE DISPOSAL
RADIOACTIVE WASTE PROCESSING
RADIOACTIVE WASTE STORAGE
Capitalized Cost
Assessment of management alternatives for LWR wastes. Volume 6. Cost determination of the LWR waste management routes (treatment/conditioning/packaging/transport operations), 18:26217 (R;XE)

Cost
Assessment of management alternatives for LWR wastes. Volume 1. Main achievements of the joint study, 18:26132 (R;XE)
Assessment of management alternatives for LWR wastes. Volume 2. Description of a French scenario for PWR waste, 18:26133 (R;XE)
Assessment of management alternatives for LWR wastes. Volume 3. Description of German scenarios for PWR and BWR wastes, 18:26119 (R;XE)
Assessment of management alternatives for LWR wastes. Volume 4. Description of a Belgian scenario for PWR waste, 18:25708 (R;XE)

Federal Republic Of Germany
Assessment of management alternatives for LWR wastes. Volume 3. Description of German scenarios for PWR and BWR wastes, 18:26119 (R;XE)

France
Assessment of management alternatives for LWR wastes. Volume 2. Description of a French scenario for PWR waste, 18:26133 (R;XE)

Meetings
Travel to the Envirotech Vienna 1992 conference in Vienna, Austria to obtain current information related to waste management activities and technologies: Foreign trip report, April 21–24, 1992, 18:25688 (R;US)

Operating Cost
Assessment of management alternatives for LWR wastes. Volume 6. Cost determination of the LWR waste management routes (treatment/conditioning/packaging/transport operations), 18:26217 (R;XE)

Program Management
Status report on roadmap headquarters issue resolution activities, 18:25684 (R;US)

Radiation Doses
Assessment of management alternatives for LWR wastes. Volume 1. Main achievements of the joint study, 18:26132 (R;XE)
Assessment of management alternatives for LWR wastes. Volume 3. Description of German scenarios for PWR and BWR wastes, 18:26119 (R;XE)
Assessment of management alternatives for LWR wastes. Volume 4. Description of a Belgian scenario for PWR waste, 18:25708 (R;XE)

Radioactive Waste Disposal
Progress report on safety research on high-level waste management for the period April 1991 to March 1992, 18:25719 (R;JP)

Radioactive Waste Facilities
Assessment of management alternatives for LWR wastes. Volume 7. Cost and radiological impact associated with near-surface disposal of reactor waste (French concept), 18:26270 (R;XE)

Regulations
Assessment of greater-than-Class C waste at Los Alamos National Laboratory, 18:25724 (R;US)

Research Programs
Treatment and final disposal of nuclear waste. Aespoe hard rock laboratory, 18:25731 (R;SE)

Safety
Final disposal of spent fuel in the Finnish bedrock: Technical plans and safety assessment, 18:25839 (R;FI;In Finnish)

Sensitivity Analysis
Assessment of management alternatives for LWR wastes. Volume 1. Main achievements of the joint study, 18:26132 (R;XE)

Waste Transportation
Assessment of management alternatives for LWR wastes. Volume 4. Description of a Belgian scenario for PWR waste, 18:25708 (R;XE)

RADIOACTIVE WASTE PROCESSING
Evaluating the technical aspects of mixed waste treatment technologies, 18:25745 (R;US)
Measurement of plutonium and americium volatilities under thermal process conditions: Final report, 18:26882 (R;US)
Radiation deactivations of the long-life lived radioactive wastes with the help of median energy protons, 18:25715 (RA;UA;In Russian)
Time and motion simulation of the WRAP Module 1 Facility, 18:25802 (R;US)
Travel to Bristol, England to observe "proof-of-principle" experiments for nitric acid recycle and nitrate destruction, review progress on contracted work, and the project schedule status: Foreign trip report, July 25–30, 1992, 18:25689 (R;US)
Treatment and disposal of a mixed F006 plating line sludge at the Savannah River Site, 18:25821 (R;US)
Treatment of radioactive wastes containing plutonium, 18:25714 (IA;AR;In Spanish)
US Department of Energy interim mixed waste inventory report: Waste streams, treatment capacities and technologies: Volume 5, Site specific-Tennessee through Washington, 18:25693 (R;US)

RADIOACTIVE WASTE STORAGE
Cost-benefit evaluation of compaction for solid TRU wastes, 18:25701 (R;US)
GSM: Columbia Plateau Geologic Site Simulation, 18:28154 (CM;US)
Managing Hanford Site solid waste through strict acceptance criteria, 18:25783 (R;US)
SALT4: Bedded Salt Radioactive Waste Storage, 18:28155 (CM;US)
Similarity analysis applied to the design of scaled tests of hydraulic mitigation methods for Tank 241-SY-101, 18:25742 (R;US)

RADIOACTIVE WASTES
See also ALPHA-BEARING WASTES
HIGH-LEVEL RADIOACTIVE WASTES
LOW-LEVEL RADIOACTIVE WASTES
RADIOACTIVE EFFLUENTS

Aging
Resolving the safety issue for radioactive waste tanks with high organic content, 18:25791 (R;US)

Calcination
Radiant-heat spray-calcination process for the solid fixation of radioactive waste: Part 1, Non-radioactive pilot unit, 18:25645 (R;US)

Chemical Analysis
Investigation of the organic matter in inactive nuclear tank liquids: Environmental Restoration Program, 18:25734 (R;US)

Chemical Reactions
Resolving the safety issue for radioactive waste tanks with high organic content, 18:25791 (R;US)

Compacting
Cost-benefit evaluation of compaction for solid TRU wastes, 18:25701 (R;US)

Ground Disposal
International Atomic Energy Agency co-ordinated research programme 'the safety assessment of near-surface radioactive waste disposal facilities (NSARS)', 18:27498 (R;AT)
Preliminary experiments for determining Kd values for cesium and strontium as part of site selection. Pt. 2: Experiments with clay materials (To be used as filler material in radioactive waste ground deposits.), 18:26811 (R;AT;In German)
Preliminary experiments for measuring Kd values for cesium and strontium. To be used in site evaluations, 18:26810 (R;AT;In German)
Qualitative comparison of the so-called biotransfer model, 18:25846 (R;AT;In German)
Radioactive mixed waste disposal, 18:25785 (R;US)
Transbios - a unified model for assessment of the effect of noxious materials in ground water to the biosphere. Compilation of the model, 18:25847 (R;AT;In German)

Grouting
DWPF saltstone study: Effects of thermal history on leach index and physical integrity: Part 2, Final report: Revision 1, 18:25825 (R;US)

Inventories
An investigation of Inventory Differences, 18:25819 (R;US)
US Department of Energy interim mixed waste inventory report: Waste streams, treatment capacities and technologies: Volume 5, Site specific-Tennessee through Washington, 18:25693 (R;US)

Radioactive Waste Storage
Dynamic soil pressures on rigid cylindrical vaults, 18:25850 (R;US)
Simulation
Ferrocyanide waste simulant characterization, 18:25776 (R;US)
Treatment of waste by the Molten Salt Oxidation process at the Oak Ridge National Laboratory, 18:25683 (R;US)
Transmutation
Los Alamos aqueous target/blanket system design for the accelerator transmutation of waste concept, 18:25727 (R;US)
Underground Disposal
RCRA closure plan for the Bear Creek Burial Grounds B Area and Walk- In Pits at the Oak Ridge Y-12 Plant, Oak Ridge, Tennessee, 18:25695 (R;US)
Vitrification
A literature review of surface alteration layer effects on waste glass behavior, 18:25679 (R;US)
Graphite electrode dc arc technology development for treatment of buried wastes, 18:25872 (R;US)
Waste Processing
Ammonium generation during SRAT cycle, 18:25827 (R;US)
Supercritical water oxidation technology for DWPF, 18:25824 (R;US)

RADIOBIOLOGY
Pacific Northwest Laboratory annual report for 1992 to the DOE Office of Energy Research: Part 4, Physical sciences, 18:27631 (R;US)
Radiation physics, biophysics, and radiation biology: Progress report, December 1, 1992–November 30, 1993, 18:27607 (R;US)
The Radiological Research Accelerator Facility: Progress report, December 1, 1992–November 30, 1993, 18:27608 (R;US)

RADIOISOTOPE-LABELLED DRUGS
See RADIOPHARMACEUTICALS

RADIOISOTOPES
Annual report on the Background Soil Characterization Project on the Oak Ridge Reservation, Oak Ridge, Tennessee: Results of Phase 1 investigation, 18:27398 (R;US)
Radioisotope production at Oak Ridge National Laboratory–past, present, and future, 18:25904 (R;US)

RADIOLOGICAL PROTECTION
See RADIATION PROTECTION

RADIOMETERS
Multi-spectral automated rotating shadowband radiometry, 18:27302 (RA;US)
New shortwave solar radiometer with information-based sparse sampling, 18:27303 (RA;US)
Photovoltaic Advanced Research and Development project: Solar radiation research annual report, 1 October 1990–30 September 1991, 18:25994 (R;US)
Tethered balloon sounding system for vertical radiation profiles, 18:27306 (RA;US)

RADIONUCLIDE DISTRIBUTIONS
See RADIONUCLIDE KINETICS

RADIONUCLIDE KINETICS
The soil-to-plant transfer of radionuclides. Feasibilities and limits of the transfer concept, 18:27438 (R;AT;In German)

RADIONUCLIDE METABOLISM
See RADIONUCLIDE KINETICS

RADIONUCLIDE MIGRATION
A modeling study of contaminant transport resulting from flooding of Pit 9 at the Radioactive Waste Management Complex, Idaho National Engineering Laboratory, 18:27401 (R;US)
Application of lysimeter data as input to performance assessment evaluations of a low-level waste disposal facility, 18:25704 (R;US)
Data collection handbook to support modeling the impacts of radioactive material in soil, 18:27380 (R;US)
Harmonization of models used for calculation of environmental transport and radiation doses, 18:27638 (R;SE;In Swedish)
Progress report on safety research on high-level waste management for the period April 1991 to March 1992, 18:25719 (R;JP)
Review of the sorption of radionuclides on the bedrock of Haestholmen and on construction and backfill materials of a final repository for reactor wastes, 18:27471 (R;FI)
Software quality assurance plan for PORFLOW-3D, 18:27402 (R;US)
Subsurface injection of radioactive tracers: Field experiment for model validation testing, 18:27434 (R;US)
The Atmospheric Release Advisory Capability Site Workstation System, 18:27326 (R;US)

RADIONUCLIDE TRANSFER (IN ENVIRONMENT)

RADIOPASTEURIZATION
See RADICIDATION

RADIOPHARMACEUTICALS
Enantioselective synthesis of L-(-)-4-boronophenylalanine (L-BPA), 18:26881 (PA;US)
Synthesis and evaluation of boron compounds for neutron capture therapy of malignant brain tumors: Technical progress report No. 1, May 1, 1990–January 31, 1991, 18:27522 (R;US)

RADIOPRESERVATION
Acceptance of food irradiation by the consumer - The views of consumers, 18:26442 (RA;XA)

RADIOPROTECTIVE SUBSTANCES
Chemoprevention by WR-2721, 18:27602 (R;US)

RADIOSTERILIZATION
Environmental conservation by radiation technology: New Italian multi-purpose demonstration centre, 18:27046 (R;IT)

RADIOSURGERY
See RADIOTHERAPY
SURGERY

RADIOTHERAPY
See also NEUTRON THERAPY
Experimental dosimetry and kinetics of radioactive tracers for human applications: example of therapeutic injection of Lipiodol labelled with Iodine 131, 18:27628 (R;FR;In French)
Performance specifications for proton medical facility, 18:27527 (R;US)

RADIOWAVE RADIATION
See also LONG WAVE RADIATION
SHORT WAVE RADIATION
An integrated cloud observation and modeling investigation in support of the Atmospheric Radiation Measurement Program, 18:27295 (RA;US)

CHAMMP program overview, 18:27292 (RA;US)
Data assimilation and the Atmospheric Radiation Measurement Program, 18:27293 (RA;US)
Development of a regional-scale climate model with a detailed microphysics parameterization, 18:27291 (RA;US)
Ionospheric effects on a wide-bandwidth, polarimetric, space-based, synthetic-aperture radar, 18:27723 (R;US)
Multi-spectral automated rotating shadowband radiometry, 18:27302 (RA;US)
Numerical simulations of an idealized convective system: Comparisons between parameterized and explicitly resolved clouds, 18:27290 (RA;US)
Parameterization tests for the Atmospheric Radiation Measurement Program, 18:27289 (RA;US)
Quantitative Luminescence Imaging System, 18:27633 (R;US)
Testbed model and single column data assimilation for the Atmospheric Radiation Measurement Program, 18:27294 (RA;US)
Tethered balloon sounding system for vertical radiation profiles, 18:27306 (RA;US)

RADIUM ADDITIONS
See ALLOYS

RADON
A rapid, simple method for the determination of the radon content of water, 18:27409 (R;US)
An investigation of the geology and geochemistry of radon in shear zones, 18:27391 (R;US)
Conference on provisions against radon: Proceedings, 18:27332 (R;CS;In Czech, Slovak)
Reference instrument for continuous radon measurement, 18:27210 (R;SE;In Swedish)
Residential radon survey in Finland, 18:27645 (R;FI;In Finnish)
Simplified modeling for infiltration and radon entry, 18:27626 (R;US)
Temporal variation (during 1992) in the radon flux at the Enot Zuqim (Dead Sea) anomaly, 18:27494 (IA;IL)

RADON 222
Anti-radon provisions by Building Offices, 18:25903 (RA;CS;In Czech)
Conference on provisions against radon: Proceedings, 18:27332 (R;CS;In Czech, Slovak)
Controlled overpressure airing as an efficient anti-radon system in existing buildings, 18:27615 (RA;CS;In Czech)
Data collection handbook to support modeling the impacts of radioactive material in soil, 18:27380 (R;US)
Detailed survey of buildings as a targeted system of test procedures, 18:27339 (RA;CS;In Czech)
Effect of radon on human health, 18:27614 (RA;CS;In Czech)
Evaluation of radon risk from the subsoil, 18:27335 (RA;CS;In Czech)
Existing experience with anti-radon provisions in the Jihlava district, 18:27617 (RA;CS;In Czech)
Practical experience with the implementation of remedial actions, 18:27618 (RA;CS;In Czech)
Radon in the interior of building structures and the sick building syndrome, 18:27340 (RA;CS;In Slovak)
Radon monitoring in general, 18:27334 (RA;CS;In Czech)
Radon propagation through buildings, 18:27336 (RA;CS;In Czech)
Radon risk maps - correct applications, 18:27333 (RA;CS;In Czech)
Radon survey in the Jihlava district, 18:27337 (RA;CS;In Czech)
Removal of radon-222 from water, 18:27616 (RA;CS;In Czech)
Some improvement of charcoal measurement techniques used for indoor radon measurements in Qatar, 18:27341 (R;QA)
Technologies suitable for technical provisions aimed at reducing the radiation burden of people in homes, 18:27619 (RA;CS;In Czech)
Track detectors, 18:27194 (RA;CS;In Czech)

RADURIZATION
Opinion polls and marketing trials with irradiated food, 18:26441 (RA;XA)

RAHYD PROCESS
See REPROCESSING

RAIL TRANSPORT
The rail abandonment process: A southern perspective, 18:25667 (R;US)

RAILGUN ACCELERATORS
Measurements of experimental plasma brush behavior in hybrid armatures, 18:26915 (R;US)

RAIN
See also ACID RAIN
Isotopic composition relationships between rainfall and runoff in rocky basin in an arid zone, 18:27492 (IA;IL)

RAIN WATER
The isotopic composition of sulphur in rainwater from the Negev desert, 18:27493 (IA;IL)

RAMAN SPECTROSCOPY
An assessment of the use of CARS for remote sensing, 18:26893 (R;US)

RANGE FINDERS
Non-scanned LADAR imaging and applications, 18:27228 (R;US)

RANGELANDS
[Participation in United Nations environmental projects]: Foreign trip report, September 9–14, 1992, 18:27384 (R;US)

RARE EARTH NUCLEI
See also ERBIUM 168

Bioremediation of soils, sludges, and materials contaminated with toxic metals or radionuclides, 18:25681 (R;US)
Selective leaching of uranium from uranium-contaminated soils: Progress report 1, 18:27448 (R;US)
Environmental Transport
Survey of subsurface geophysical exploration technologies adaptable to an airborne platform, 18:26898 (R;US)
Information
[Rothamsted model for turnover of soil organic matter]: Foreign trip report, October 7–9, 1992, 18:27441 (R;US)
Maps
Travel to the Netherlands to participate in a workshop held by the World Inventory of Soil Emissions (WISE) project at the International Soil Reference and Information Centre (ISRIC): Foreign trip report, August 22–29, 1992, 18:27439 (R;US)
Moisture
A new probe for in situ TDR moisture measurement, 18:27403 (R;US)
Pollution
Analysis of soil and water for TATB content, 18:26850 (R;US)
Shemya AFB, Alaska 1992 IRP field investigation report: Volume 2, Appendix A: Final report, 18:27404 (R;US)
Travel to the United Kingdom and Italy to present keynote lectures and technical talks at two international meetings on the role of natural organic matter in the environment and to learn about recent advances in this area relevant to the traveler's research: Foreign trip report, September 10–26, 1992, 18:27440 (R;US)
Radionuclide Migration
Data collection handbook to support modeling the impacts of radioactive material in soil, 18:27380 (R;US)
Remedial Action
Subsurface injection of radioactive tracers: Field experiment for model validation testing, 18:27434 (R;US)
Vadose zone characterization of highly radioactive contaminated soil at the Hanford Site, 18:25787 (R;US)
Sample Preparation
Response of soil aggregate stability to storage time of soil samples, 18:25919 (R;AT;In German)
Sampling
A study of the homogenization of soils, 18:27394 (R;US)
Phase 2 Sampling Plan for Chestnut Ridge Operable Unit 2 (Filled Coal Ash Pond/Upper McCoy Branch) at the Oak Ridge Y-12 Plant, Oak Ridge, Tennessee: Environment Restoration Program, 18:25696 (R;US)
Stability
Response of soil aggregate stability to storage time of soil samples, 18:25919 (R;AT;In German)
Vitrification
Graphite electrode dc arc technology development for treatment of buried wastes, 18:25872 (R;US)
Implementation of in situ vitrification technology for remediation of Oak Ridge contaminated soil sites: Past results and future plans, 18:25874 (R;US)
Investigation of potential for occurrence of molten soil displacement events during in situ vitrification of combustible wastes, 18:25870 (R;US)
Water Saturation
A comparison of simulation models for predicting soil water dynamics in bare and vegetated lysimeters, 18:27456 (R;US)
X-Ray Spectroscopy
Applications of the Advanced Light Source to problems in the earth, soil, and environmental sciences report of the workshop, 18:27910 (R;US)

SOLANUM
Mechanisms and genetic control of interspecific crossing barriers in Lycopersicon: Second yearly progress report, 18:27541 (R;US)

SOLAR AIR CONDITIONING
Travel to Norway to participate in the 2nd planning meeting of the International Energy Agency (IEA) Solar Heating and Cooling Program (SHCP) Task 19, solar air systems for buildings: Foreign trip report, June 28–July 2, 1992, 18:26008 (R;US)

SOLAR ARCHITECTURE
Operational experience of spandrel solar walls: Partial report 1: Measurements on the improved construction. Duevej in Struer, 18:26023 (R;DK;In Danish)
Operational experience of spandrel solar walls: Partial report 2: Evaluation of energy yield for solar walls that preheat fresh air. Duevej in Struer (Denmark), 18:26024 (R;DK;In Danish)

SOLAR WATER HEATERS
Colorado State University program for developing, testing, evaluating and optimizing solar heating and cooling systems: Project status report, March–May 1993, 18:26010 (R;US)

SOLDERED JOINTS
Microstructural influences on the mechanical properties of solder, 18:26710 (R;US)

SOLID CLUSTERS
Synthesis and properties of novel cluster phases: Progress report, [June 30, 1993], 18:26786 (R;US)

SOLID ELECTROLYTE FUEL CELLS
Abstracts of Nordisk Ministerraads workshop on high temperature electrode materials, 18:26484 (R;DK)
Chemical interactions between interconnect and electrode materials during sintering in solid oxide fuel cells, 18:26496 (R;US)
Electrode kinetics of SOFC anodes and cathodes (SOFC = Solid Oxide Fuel Cells), 18:26492 (RA;DK)
Impedance spectroscopy applied on sofc-related problems (SOFC = Solid Oxide Fuel Cells), 18:26489 (RA;DK)
Methane oxidation on oxide catalysts (The Nordic Council of Ministers), 18:26491 (RA;DK)
On the SOFC cathode reaction (SOFC = Solid Oxide Fuel Cells), 18:26495 (RA;DK)
Status of SOFC development in USA, 18:26482 (R;US)
The Statoil SOFC program (SOFC = Solid Oxide Fuel Cells), 18:26493 (RA;DK)

SOLID ELECTROLYTES
Oxide ion conduction and mixed conduction in $LaTa_3O_9$, $Ba_6Ta_2O_{11}$ and $Ca_{12}Al_{14}O_{33}$ (The Nordic Council of Ministers), 18:26487 (RA;DK)
Surface oxygen exchange kinetids of solid oxide ion conductors (The Nordic Council of Ministers), 18:26488 (RA;DK)

SOLID STATE LASERS
Design and performance of the terawatt Cr:$LiSrAlF_6$ laser system, 18:26950 (R;US)
Full-wave simulation of the thumbtack laser, 18:26957 (R;US)

SOLID STATE PHYSICS
Electronic states in systems of reduced dimensionality: Progress report, October 15, 1992–October 14, 1993, 18:27898 (R;US)
Report of the joint seminar on solid state physics, atomic and molecular physics, and materials science in the energy region of tandem accelerators, 18:27848 (R;JP;In Japanese, English)

SOLID WASTES
Characterization of past and present solid waste streams from the plutonium finishing plant, 18:25774 (R;US)
Investigation of potential for occurrence of molten soil displacement events during in situ vitrification of combustible wastes, 18:25870 (R;US)
Managing Hanford Site solid waste through strict acceptance criteria, 18:25783 (R;US)
Preliminary site selection report for the new sanitary landfill at the Savannah River Site, 18:27466 (R;US)
Similarity analysis applied to the design of scaled tests of hydraulic mitigation methods for Tank 241-SY-101, 18:25742 (R;US)
Waste management plan for the remedial investigation/feasibility study of Waste Area Grouping 5 at Oak Ridge National Laboratory, Oak Ridge, Tennessee: Environmental Restoratin Program, 18:25735 (R;US)

SOLID-STATE PLASMA
Investigations of transitions from order to chaos in dynamical systems: Annual progress report, 18:27914 (R;US)

SOLUTES
Full-field dye concentration measurement within saturated/unsaturated thin slabs of porous media, 18:27458 (R;US)
Mechanisms controlling the production and transport of methane, carbon dioxide, and dissolved solutes within a boreal peatland: Progress report, July 15, 1992–July 14, 1993, 18:27480 (R;US)

SOLVENT EXTRACTION
A modular implementation of G2 on a solvent extraction process, 18:25711 (RA;XA)
Solvents extraction: results obtained from cycle operation. Pt. 2, 18:26845 (IA;AR;In Spanish)

SOLVENTS
Laboratory solvent reuse – Liquid chromatography, 18:25730 (R;US)

SONDES
See PROBES

SORTING
Neural network hardware and software solutions for sorting of waste plastics for recycling, 18:26555 (R;US)

SOUND
See SOUND WAVES
SOUND WAVES
See also ULTRASONIC WAVES
Acousto-optical confirmation of the localized wave phenomena, 18:27728 (R;US)
Portable acoustic wave sensor systems for real-time monitoring of volatile organic compounds, 18:27459 (R;US)
SOURCE TERMS
Disposal Unit Source Term (DUST) data input guide, 18:27435 (R;US)
SOUTH ATLANTIC BIGHT
Biological processes in the water column of the South Atlantic Bight: Phytoplankton response: Final progress report, 18:27478 (R;US)
SOUTH CAROLINA
Composite refraction-reflection stack sections: Tracing faults in the Atlantic coastal plain sediments, 18:27464 (R;US)
[Workshop for coordinating South Carolina's pre-college systemic initiatives in science and mathematics], 18:28072 (R;US)
SOUTHEAST REGION
See USA
SOUTHWEST REGION
See USA
SOVIET UNION

SOYBEANS
Effects of the radiation exposure on the growing of the crops (2): Influence of the radiation intensity on the exposure effects of the soybean seeds, 18:27596 (R;KP;In Korean)
SPACE FLIGHT
Primary and secondary electrical space power based on advanced PEM systems, 18:26483 (R;US)
SPACE LATTICES
See CRYSTAL LATTICES
SPACE POWER REACTORS
See also SPACE PROPULSION REACTORS
Preliminary nuclear safety assessment of the NEPST (Topaz II) space reactor program, 18:26384 (R;US)
Summary report of project SIREN (Search, Intercept, Retrieve, Expulsion, Nuclear), 18:25702 (R;US)
Thulium heat sources for space power applications, 18:26208 (R;US)
SPACE POWER UNIT REACTOR
See SPACE POWER REACTORS
SPACE PROPULSION REACTORS
A particle bed reactor based NTP in the 112,500 N thrust class, 18:26203 (R;US)
Generation of neutronic thermal data in support of space nuclear propulsion, 18:26202 (R;US)
MCNP benchmark analyses of critical experiments for the Space Nuclear Thermal Propulsion program, 18:26205 (R;US)
Nuclear Thermal Propulsion engine based on Particle Bed Reactor using light water steam as a propellant, 18:26204 (R;US)
Overview of fuel element development and mass loss rate experiments on uranium–zirconium carbide fuel, 18:26207 (R;US)
Space reactor fuel element testing in upgraded TREAT, 18:26206 (R;US)
SPACE VEHICLES
See also REENTRY VEHICLES
Experimental technique to simulate orbital-debris impact on space shields at impact velocities over 10 km/s, 18:26932 (R;US)
Simulation of orbital debris impacts on bumper shields, 18:26931 (R;US)
Spacecraft fabrication and test integration: Leveraging existing information, 18:27264 (R;US)
SPARK CHAMBERS
Spark discharge guided by high energy particles beams, 18:27203 (R;RU;In Russian)
[Study of electroweak interactions]: Final report [February 1, 1992–January 31, 1993], 18:27770 (R;US)
SPARK GAPS
Development of uhf spark-switched L-C Oscillators, 18:26949 (R;US)
SPECIAL PRODUCTION REACTORS
See also K REACTOR
L REACTOR
Steam explosion analysis in support of the SRS reactor safety assessment, 18:26390 (R;US)
SPECIAL RELATIVITY THEORY
See RELATIVITY THEORY
SPECTRA UNFOLDING
Studies of nuclei far from stability in the A=80 mass region: Final report, 18:27178 (R;US)
SPECTROMETERS

GAMMA SPECTROMETERS
MAGNETIC SPECTROMETERS
MASS SPECTROMETERS
NEUTRON SPECTROMETERS
Radiative transfer model development in support of the Atmospheric Radiation Measurement (ARM) program, 18:27280 (RA;US)
SPEED INDICATORS
See VELOCIMETERS
SPENT FUEL CASKS
Design rules under development by ASME B and PV Subgroup on Containment Systems for Spent Fuels and High Level Waste Transport Packagings, 18:26917 (R;US)
Development and application of the automated Monte Carlo biasing procedure in SAS4, 18:27866 (R;US)
The impact of using reduced capacity baskets on cask fleet size and cask fleet mix, 18:25653 (R;US)
SPENT FUEL STORAGE
Spent nuclear fuel storage – Performance tests and demonstrations, 18:26161 (R;US)
SPENT FUELS
Containment Systems
Design rules under development by ASME B and PV Subgroup on Containment Systems for Spent Fuels and High Level Waste Transport Packagings, 18:26917 (R;US)
Criticality
Creep of clad irradiation as an uncertainty in criticality safety margins that include the effects of burnup for pressurized water reactor fuel assemblies, 18:25879 (R;US)
Dissolution
SIMFUEL dissolution studies in granitic groundwater leaching experiments at VTT, 18:25836 (R;FI)
Evaluation
ICPP Waste Management Technology Development Program, 18:25811 (R;US)
Processing
Technical and regulatory review of the Rover nuclear fuel process for use on Fort St. Vrain fuel, 18:25705 (R;US)
Radioactive Waste Management
ICPP Waste Management Technology Development Program, 18:25811 (R;US)
Technical and regulatory review of the Rover nuclear fuel process for use on Fort St. Vrain fuel, 18:25705 (R;US)
Rail Transport
Rail abandonments in the South and their effect on NWPA rail shipments, 18:25666 (R;US)
Reprocessing
Radiant-heat spray-calcination process for the solid fixation of radioactive waste: Part 1, Non-radioactive pilot unit, 18:25645 (R;US)
Spent Fuel Storage
Spent nuclear fuel storage – Performance tests and demonstrations, 18:26161 (R;US)
Waste Transportation
Alternative routes for highway shipments of radioactive materials and lessons learned from state designations, 18:25660 (R;US)
An examination of the Hazardous Materials Transportation Uniform Safety Act (HMTUSA): A southern perspective, 18:25656 (R;US)
Lessons learned by southern states in transportation of radioactive materials, 18:25654 (R;US)

RISKIND: Radiological Risk Assessment Code for Spent Nuclear Fuel Transportation, 18:28152 (CM;US)
Radiological transportation emergency response training course funding and timing in the southern states, 18:25657 (R;US)
Southern states' routing agency report, 18:25670 (R;US)
Spent Fuel and High-Level Radioactive Waste Transportation Report, 18:25655 (R;US)
Spent fuel and high-level radioactive waste transportation report, 18:25665 (R;US)
Spent fuel and high-level radioactive waste transportation report, 18:25668 (R;US)
The rail abandonment process: A southern perspective, 18:25667 (R;US)
Transportation infrastructure upgrades in the South: A compilation of state plans for construction near nuclear reactor sites, 18:25671 (R;US)

SPENT SHALES
Catalytic activity of oxidized (combusted) oil shale for removal of nitrogen oxides with ammonia as a reductant in combustion gas streams, Part 2, 18:25620 (R;US)

SPHERES
On the motion through a viscous fluid of a spherical particle touching a plane wall: Slip boundary conditions, 18:26920 (R;US)

SPICES
Detection methods for irradiated foods - review of current developments, 18:27552 (RA;XA)

SPIN
Measurement of the spin of a particle using undulator radiation, 18:26984 (R;US)
Numerical simulation of spin motion in circular accelerators using spinor formulation, 18:26994 (R;FR)

SPIN ORIENTATION
Toroid excitation of nuclear magnetic resonance, 18:27708 (R;RU;In Russian)

SPIN-OFF

SUBBITUMINOUS COAL
Development of an advanced, continuous mild gasification process for the production of co-products technical evaluation: Final report, 18:25480 (R;US)
Liquid chromatographic analysis of coal surface properties: Quarterly progress report, January–March 1993, 18:25546 (R;US)
SUBCRITICAL FLOW
See LAMINAR FLOW
SULFATE-REDUCING BACTERIA
Chemical and electrochemical aspects of the corrosion of stainless steels in the presence of sulphate reducing bacteria, 18:26576 (R;FR)
SULFATES
See also AMMONIUM SULFATES
CALCIUM SULFATES
Anion-exchange resin-based desulfurization process: Quarterly technical progress report, January 1, 1993–March 31, 1993, 18:26478 (R;US)
Modeling of aqueous chemistry in cloud droplets, 18:27370 (R;US)
SULFUR
Bench-scale testing and evaluation of the direct sulfur recovery process, 18:25490 (RA;US)
Catalytic reduction of SO_x-NO_x in coal flue gas: Phase 1 report, 18:26109 (R;US)
H_2S-removal and sulfur-recovery processes using metal salts, 18:25484 (RA;US)
SULFUR DIOXIDE
Ammonia regeneration for a combined lime/ammonia spray dryer for SO_2 control: Final report, 18:25554 (R;US)
An examination of utility emissions contributions to elevated ozone concentrations in the Chicago area, 18:26112 (R;US)
Catalytic reduction of SO_x-NO_x in coal flue gas: Phase 1 report, 18:26109 (R;US)
Catalytic reduction of SO_x-NO_x in coal flue gas: Supplement to the final report, 18:26110 (R;US)
Comparative study of the reactions of metal oxides with H_2S and SO_2, 18:25512 (RA;US)
Design and development of a novel gas desulfurization process using hollow fiber membranes to stimulate the utilization of high sulfur Ohio coal: Final report, 18:25555 (R;US)
The Coal Tech Advanced Cyclone Combustor Demonstration Project: A DOE assessment, 18:25561 (R;US)
SULFUR HYDRIDES

SULFURIC ACID
Microbial-influenced cement degradation: Literature review, 18:25733 (R;US)
SUPER HIGH FREQUENCY RADIATION
See RADIOWAVE RADIATION
SUPER PHENIX REACTOR
Reactivity accidents of Super Phenix and EFR reactors, 18:26346 (R;FR;In French)
SUPERCOMPUTERS
An efficient parallel algorithm for matrix-vector multiplication, 18:28185 (R;US)
Refining and defining the Program Dependence Web, 18:28187 (R;US)
Storage systems for national information assets: Revision 1, 18:28195 (R;US)
The National Storage Laboratory: A collaborative research project: Revision 1, 18:28196 (R;US)
SUPERCONDUCTING CABLES
Comparisons of processes and performance of SSC-VQP material, 18:27125 (R;US)
Conductor design for the GEM Detector Magnet, 18:27132 (R;US)
Databases for analysis of superconducting cable manufacturing, 18:27120 (R;US)
SUPERCONDUCTING CAVITY RESONATORS
Computer simulation and cold model testing of CCL cavities, 18:27146 (R;US)
RF cavity for the Medium Energy Booster (MEB) for SSCL, 18:27142 (R;US)
Status of the SSC LEB rf cavity, 18:27135 (R;US)
Superconducting multicell cavity development program at Los Alamos, 18:27081 (R;US)
[Travel to Germany and Switzerland to discuss the progress and further development of the TESLA collaboration, and to present a paper and attend the European particle accelerator conference in Berlin, under the auspices of the Technische Hochschule Berlin]: Foreign trip report, March 17–April 5, 1992, 18:27044 (R;US)

SUPERCONDUCTING COILS
ITER-hard Toroidal Field coil structural analysis, 18:28061 (R;US)
Systematic error analysis of rotating coil using computer simulation, 18:27124 (R;US)

SUPERCONDUCTING FILMS
Effects of depositon rate on $Bi_2Sr_2CaCu_2O_{8+x}$ and $Bi_2Sr_{1.6}La_{0.4}CuO_{6+x}$ epitaxial thin film growth by pulsed-laser ablation, 18:26747 (R;US)
Kinetics of photodeposition of superconducting films, 18:26741 (R;US)
Measurement of penetration depth $\lambda(T)$ in $YBa_2Cu_3O_{7-\delta}$ thin film, 18:26762 (R;US)

SUPERCONDUCTING JUNCTIONS
An x-ray detector using superconducting aluminum tunnel junctions, 18:27215 (R;US)

SUPERCONDUCTING MAGNETS
Alignment
Optical measurement of SSC ARC quadrupole cold mass location, 18:27121 (R;US)
Preliminary studies on a magneto-optical procedure for aligning RHIC magnets, 18:27042 (R;US)
Cryostats
SSC 50 mm dipole magnet cryostat thermal measurement results, 18:27050 (R;US)
Data Acquisition Systems
MTL distributed magnet measurement system, 18:27112 (R;US)
Design
Conceptual design studies for a He II cooled Low Beta Quad IR Magnets, 18:27122 (R;US)
Design of a model dipole magnet for the SSC High Energy Booster, 18:27118 (R;US)
Overview of the superconducting magnet subsystem for the GEM detector at the SSC, 18:27209 (R;US)
Heaters
Collider bypass diode thermal simulations and measurements for the SSCL, 18:27136 (R;US)
Magnet Coils
Alternate manufacturing processes and materials for the SSC dipole magnet coil end parts, 18:27048 (R;US)
Magnetic Fields
Axial variations in the magnetic field of superconducting dipoles, 18:27038 (R;US)
Magnetic field quality in the pilot industrial batch's SC dipoles for the UNK, 18:27008 (R;RU;In Russian)
Magnetic measurements of the 5 meter QC series quadrupoles at Lawrence Berkeley Laboratory, 18:27088 (R;US)
Performance Testing
Design and performance of a new 50 mm quadrupole magnet for the SSC, 18:27100 (R;US)
Quenching
Collider bypass diode thermal simulations and measurements for the SSCL, 18:27136 (R;US)
Serpukhov Tevatron
Magnetic field quality in the pilot industrial batch's SC dipoles for the UNK, 18:27008 (R;RU;In Russian)
Methods of UNK SC-dipoles magnetic measurements, 18:27157 (R;RU;In Russian)
Supports
A study of structural integrity of the SSC magnet six-strut support system, 18:27106 (R;US)
Dynamic analysis of six-strut supporting system for accelerator magnet, 18:27119 (R;US)
Friction and wear of radiation resistant composites, coatings and ceramics in vacuum and low temperature environment, 18:27047 (R;US)
Preliminary results from a study of collar lamination variation in SSC Prototype Dipole Magnets, 18:27111 (R;US)
The design and development of a single piece, sandwhich tube coldmass support post for the SSC Collider Dipole Magnets, 18:27117 (R;US)
Temperature Distribution
A quasi-3D model to predict temperature distribution in SSC magnets due to 3D heat loads, 18:27107 (R;US)
Test Facilities
Cryogenic characteristics of the SSC Accelerator Systems String Test (ASST), 18:27113 (R;US)
Data acquisition and controls for the SSCL ASST, Phase 1, 18:27108 (R;US)
The accelerator systems string test: Objectives, problems, results, anecdotes, and reflections, 18:27101 (R;US)
Thermal Analysis
The thermal behavior of an SSC magnet in an unconditioned outdoor environment, 18:27105 (R;US)

SUPERCONDUCTING SUPER COLLIDER
Alignment
The effect of global survey misalignment on the SSC, 18:26978 (R;US)
Beam Bunching
Simulation studies of the transverse dipole mode multibunch instability for the SSC Collider, 18:27018 (R;US)
Beam Dynamics
A parallel implementation of particle tracking with space charge effects on an INTEL iPSC/860, 18:27019 (R;US)
Beam Emittance
Effect of power supply ripple on emittance growth in the collider, 18:27029 (R;US)
Electron beam emittance monitor for the SSC, 18:27134 (R;US)
Suppression of emittance growth caused by mechanical vibrations of magnetic elements in presence of beam-beam effects in the SSC, 18:27158 (R;RU)
Beam Monitors
Beam instrumentation and precision timing equipment for the SSC accelerator complex, 18:27114 (R;US)
Bunch Shape Monitor for SSCL linac, 18:27141 (R;US)
Overview and status of beam instrumentation at the SSC, 18:27131 (R;US)
Beam Optics
Current design of the SSC Interaction Regions, 18:27022 (R;US)
Second order chromaticity of the interaction regions in the collider, 18:27028 (R;US)
The provision of IP crossing angles for the SSC, 18:27021 (R;US)
Beam Strippers
Thermal analysis of the SSC beam scraper, 18:27126 (R;US)
Beam Transport
An engineering design study of the transfer bridge for the SSC SDC detector, 18:27130 (R;US)
Mechanical integration of an RF volume source and einzel lens LEBT to the SSC RFQ, 18:27144 (R;US)
Beam-Beam Interactions
Proton-proton scattering contribution to emittance growth, 18:27027 (R;US)
Betatron Oscillations
Echo effect in accelerators, 18:27020 (R;US)
Collimators
Beam loss handling at the SSC, 18:27128 (R;US)
Computer Calculations
Database computing for the SSC: Progress report, 18:28139 (R;US)
Computer Graphics
Integrating PAW, a graphical analysis interface to Sybase, 18:27102 (R;US)
Computer Networks
FDDI experience at the SSCL, 18:27110 (R;US)
Control Systems
Business opportunities in the SSCL Global Control System, 18:26975 (R;US)
Cryogenics
Experimental strength verification of SSC cryogenic transfer line internal suspension system, 18:27103 (R;US)
Data Analysis
Database computing for the SSC: Progress report, 18:28139 (R;US)
Design
Accelerator physics issues at the SSC, 18:26979 (R;US)
Status of the SSC, 18:26977 (R;US)
The Superconducting Super Collider: A status report, 18:26974 (R;US)

Feedback
Issues of the transverse feedback systems design at the SSC, 18:27147 (R;US)
Information Systems
Building the repositories to serve, 18:27123 (R;US)
Ion Sources
Mechanical integration of an RF volume source and einzel lens LEBT to the SSC RFQ, 18:27144 (R;US)
Kicker Magnets
Dealing with abort kicker prefire in the Superconducting Super Collider, 18:27129 (R;US)
Linear Accelerators
A digital approach for phase measurement applied to delta-t tuneup procedure, 18:27139 (R;US)
Accelerator Readiness Review process for the SSC Linac, 18:27137 (R;US)
High density harp for SSCL linac, 18:27064 (R;US)
The SSCL LINAC Control System, 18:27133 (R;US)
The SSCL RFQ system integration, 18:27145 (R;US)
Liners
Heat leak measurements and thermal modeling of a mechanical support for a SSC beam tube liner, 18:27104 (R;US)
Magnetic Fields
Decoupling schemes for the SSC Collider, 18:27023 (R;US)
Magnetic Spectrometers
Proposal for a feasibility study of very large aperture quadrupole magnets, 18:27097 (R;US)
Particle Boosters
Preliminary testing of the LEB to MEB transfer kicker modulator prototype, 18:27138 (R;US)
RF cavity for the Medium Energy Booster (MEB) for SSCL, 18:27142 (R;US)
Status of the SSC LEB rf cavity, 18:27135 (R;US)
The effects of temperature and rf power level on the tuning of the water-cooled SSC Low-Energy Booster cavity, 18:27075 (R;US)
Quality Assurance
What the quality philosophy brings to a research and development environment like the SSC, 18:26976 (R;US)
Rf Systems
Design and results of the radio frequency quadrupole RF system at the Superconducting Super Collider Laboratory, 18:27109 (R;US)
RF systems engineering for the SSC collider rings, 18:27140 (R;US)
Technical status of SSC RF amplifier and accelerating cavity systems, 18:27116 (R;US)
The SSC RFQ-DTL matching section buncher cavities, 18:27143 (R;US)
Shower Counters
Overview of the superconducting magnet subsystem for the GEM detector at the SSC, 18:27209 (R;US)
Superconducting Cables
Comparisons of processes and performance of SSC-VQP material, 18:27125 (R;US)
Databases for analysis of superconducting cable manufacturing, 18:27120 (R;US)
Superconducting Magnets
A quasi-3D model to predict temperature distribution in SSC magnets due to 3D heat loads, 18:27107 (R;US)
A study of structural integrity of the SSC magnet six-strut support system, 18:27106 (R;US)
Alternate manufacturing processes and materials for the SSC dipole magnet coil end parts, 18:27048 (R;US)
Conceptual design studies for a He II cooled Low Beta Quad IR Magnets, 18:27122 (R;US)
Cryogenic characteristics of the SSC Accelerator Systems String Test (ASST), 18:27113 (R;US)
Data acquisition and controls for the SSCL ASST, Phase 1, 18:27108 (R;US)
Dynamic analysis of six-strut supporting system for accelerator magnet, 18:27119 (R;US)
MTL distributed magnet measurement system, 18:27112 (R;US)
Magnetic measurements of the 5 meter QC series quadrupoles at Lawrence Berkeley Laboratory, 18:27088 (R;US)
Optical measurement of SSC ARC quadrupole cold mass location, 18:27121 (R;US)
Preliminary results from a study of collar lamination variation in SSC Prototype Dipole Magnets, 18:27111 (R;US)
The accelerator systems string test: Objectives, problems, results, anecdotes, and reflections, 18:27101 (R;US)
The design and development of a single piece, sandwhich tube coldmass support post for the SSC Collider Dipole Magnets, 18:27117 (R;US)
The thermal behavior of an SSC magnet in an unconditioned outdoor environment, 18:27105 (R;US)
Timing Circuits
Beam instrumentation and precision timing equipment for the SSC accelerator complex, 18:27114 (R;US)
Vacuum Systems
Design and analysis of the Collider SPXA/SPRA spool piece vacuum barrier, 18:27115 (R;US)
On coupling impedances of pumping holes, 18:27127 (R;US)
SUPERCONDUCTIVITY
After seven years, where's the consensus?, 18:27930 (R;US)
SUPERCONDUCTORS

TITANIUM 46 TARGET
TITANIUM 50 TARGET
TRITIUM TARGET
YTTRIUM 89 TARGET
Los Alamos aqueous target/blanket system design for the accelerator transmutation of waste concept, 18:25727 (R;US)
Optimal choice of a target for producing e^+e^- polarized beams for a linear collider, 18:27062 (R;RU;In Russian)
The interaction of intense femtosecond laser pulses with solid targets, 18:27928 (R;US)

TASK SCHEDULING
Broadcasting on linear arrays and meshes, 18:28174 (R;US)

TATB
Analysis of soil and water for TATB content, 18:26850 (R;US)

TAU LEPTONS
See TAU PARTICLES

TAU PARTICLES
The perturbative QCD prediction to R_τ revisited, 18:27789 (R;FR)

TAUONS
See TAU PARTICLES

TAXES
Prospect on new energies.: Effective energy utilization, 18:26525 (I;JP;In Japanese)
Status-quo of energy-related taxation systems in developed countries and economic instrumets for environmental preservation, 18:26457 (R;JP;In Japanese)

TECHNETIUM
Combined TRU-Sr extraction/recovery process, 18:25678 (R;US)

TECHNOLOGY IMPACTS
Situating the history of technology in a philosophical triptych: Contours for future research, 18:28081 (R;XA)

TECHNOLOGY TRANSFER
A trip to Hungary to present a paper on bioremediation and to attend the international symposium on environmental contamination in central and eastern Europe: Foreign trip report, October 10–October 19, 1992, 18:26439 (R;US)

NORME: Multi-media information system in support of technology utilization and transfer Italian program guidelines for financial assistance, 18:26449 (R;IT;In Italian)

TELESCOPES
A positron annihilation radiation telescope using Laue diffraction in a crystal lens, 18:27701 (R;US)
Tip-tilt compensation: Resolution limits for ground-based telescopes using laser guide star adaptive optics: Revision 2, 18:27223 (R;US)

TELLURIUM
Thick-target yields of iodine isotopes from proton interactions in Te, and the double-β decay of ^{128,130}Te, 18:27825 (R;US)

TELLURIUM 128
Thick-target yields of iodine isotopes from proton interactions in Te, and the double-β decay of ^{128,130}Te, 18:27825 (R;US)

TELLURIUM 128 TARGET
About anomalous scattering of p neutrons by tellurium nuclei, 18:27854 (R;RU;In Russian)

TELLURIUM 130
Thick-target yields of iodine isotopes from proton interactions in Te, and the double-β decay of ^{128,130}Te, 18:27825 (R;US)

TELLURIUM 130 TARGET
About anomalous scattering of p neutrons by tellurium nuclei, 18:27854 (R;RU;In Russian)

FOSSIL-FUEL POWER PLANTS
GEOTHERMAL POWER PLANTS
NUCLEAR POWER PLANTS
REFUSE-FUELED POWER PLANTS
The work environment at thermal power plants using biofuel and peat. Presence and concentrations of airborne microorganisms, endotoxins and dust and proposals to control measures, 18:25978 (R;SE;In Swedish)

THERMOCOUPLES
Determination of the bias in LOFT fuel peak cladding temperature data from the blowdown phase of large-break LOCA experiments, 18:26366 (R;US)

THERMODYNAMICS
Thermodynamics of computation and information distance, 18:28170 (R;US)

THERMOLUMINESCENT DOSEMETERS
Analysis of anomalous data produced by Harshaw Model 8801 thermoluminescent dosimeter cards, 18:27205 (R;US)
Manufacture of personal thermal neutron dosimeter with cadmium covered with $CaSO_4$(Dy), 18:27197 (R;KP;In Korean)

THERMONUCLEAR REACTIONS
See also MUON-CATALYZED FUSION

Burn control by refueling: Appendix C, 18:28032 (R;US)

THERMONUCLEAR REACTOR FUELING
Contributions to 20th international conference on phenomena in ionized gases, 18:27962 (R;IT)
Properties of ablation cloud surrounding solid hydrogen pellets injected in tokamaks, 18:28041 (RA;IT)

THERMONUCLEAR REACTOR MATERIALS
Materials for structural and functional components in fission and fusion nuclear power reactors, 18:28038 (R;IT)
[Travel to France to the IAEA technical committee meeting on atomic and molecular data for fusion reactor technology]: Foreign trip report, October 9–18, 1992, 18:28036 (R;US)

THERMONUCLEAR REACTOR WALLS
See also FIRST WALL
Behavior of SiC/Al coatings under high-dose irradiation with deuterium and helium ions, 18:28051 (R;IT)
Contributions to 10th international conference on plasma surface interactions, 18:28046 (R;IT)
Film deposition on metallic surfaces at liquid nitrogen temperature in view of conditioning of FTU vacuum chamber, 18:28047 (RA;IT)
Kinetics of Hydrocarbon formation in a-C:H film deposition plasmas, 18:27940 (R;ES)

THERMONUCLEAR REACTORS
See also ION BEAM FUSION REACTORS
STELLARATOR TYPE REACTORS
TOKAMAK TYPE REACTORS
Travel to Japan for ITER meeting and expatriate fact finding activities: Foreign trip report, August 30–September 16, 1992, 18:27935 (R;US)

THERMONUCLEAR WEAPONS
See NUCLEAR WEAPONS

THERMOPILES
See THERMOCOUPLES

THIN FILMS
ArF laser deposited tin oxide films studied by 'in situ' surface analysis techniques, 18:26795 (R;IT)
Boundary stability under nonequilibrium conditions: Progress report, 18:26602 (R;US)
Canted magnetic moments at the Gd(0001) surface, 18:26575 (R;US)
Film deposition on metallic surfaces at liquid nitrogen temperature in view of conditioning of FTU vacuum chamber, 18:28047 (RA;IT)

THIO COMPOUNDS
See ORGANIC SULFUR COMPOUNDS

THIONAPHTHENES
Synthesis of 6-Methyl-9-n-propyldibenzothiophene-4-ol: Quarterly technical progress report No. 5, July 28–October 28, 1991, 18:26865 (R;US)

THORIUM
Recovering of thorium contained in wastes from Thorium Purification Plant, 18:25718 (R;BR;In Portuguese)

THORIUM 232
Nonconventional methods for accurately calibrating germanium detectors, 18:27213 (R;US)

THORIUM 232 TARGET
High transverse momentum events in Kr+Au, Th central collisions at 43 MeV/u, 18:27862 (R;FR)
Study of Krypton-Silver, Krypton-gold, Krypton-thorium interactions at 27 and 43 MeV/n in terms of global variables, 18:27863 (R;FR;In French)

THREE-BODY PROBLEM
Simple effective adiabatic representation for three-body problem and modelling the transition of quasistationary state in weakly bound state for dt mesic molecule, 18:27896 (R;RU;In Russian)

THRESHOLD DOSE
Generic intervention levels for protecting the public in the event of a nuclear accident or radiological emergency: Interim report for comment, 18:27612 (R;XA)

THULIUM 169
Thulium heat sources for space power applications, 18:26208 (R;US)

THULIUM 170
Thulium heat sources for space power applications, 18:26208 (R;US)

THULIUM ISOTOPES
See also THULIUM 169
THULIUM 170
Research at the Fragment Mass Analyzer at ATLAS, 18:27830 (R;US)

THYLAKOID MEMBRANE PROTEINS
Heterogeneity in Photosystem I: The domain organization of the chloroplast thylakoid membrane, 18:25999 (R;SE)
Photosynthetic electron transport in genetically altered chloroplasts: Progress report, June 15, 1992–June 15, 1993, 18:25997 (R;US)

TIDAL POWER
Tidal stream energy review, 18:26052 (R;GB)
Tidal stream energy review: Appendices, 18:26053 (R;GB)

TIGHT SANDS
See SANDSTONES

TIMING CIRCUITS
Design of the Advanced Light Source timing system, 18:27166 (R;US)

TIN OXIDES
ArF laser deposited tin oxide films studied by 'in situ' surface analysis techniques, 18:26795 (R;IT)
High temperature hydrogen sulfide removal, 18:25511 (RA;US)

TITANATES
See also PZT
Monosodium titanate particle characterization, 18:25833 (R;US)

TITANIUM
Atomic mixing of metals, 18:26620 (RA;UA;In Russian)
Effect of electron beam treatment on diffusion of copper into a titanium base layer, 18:26656 (RA;UA;In Russian)
Experimental technique to simulate orbital-debris impact on space shields at impact velocities over 10 km/s, 18:26932 (R;US)
The extraction of titanium, chromium and cadmium from phosphoric acid solutions by para (1,1,3,3 tetramethyl butyl) phenyl phosphoric acid in kerosene diluent, 18:26866 (R;DZ)

TITANIUM 46 TARGET
Reaction mechanism and nuclear correlations study by low energy pion double charge exchange, 18:27856 (R;US)

TITANIUM 50 TARGET
Reaction mechanism and nuclear correlations study by low energy pion double charge exchange, 18:27856 (R;US)

TITANIUM ALLOYS
See also ALLOY-NI43FE33CR16MO3
Dispersion and amorphization of nickel-titanium under mechanical and radiation treatment, 18:26650 (RA;UA;In Russian)
Electronic structure and phase stability properties in ternary substitutional alloys, 18:26730 (R;US)
Excimer laser surface processing of titanium, 18:26703 (R;US)
Mechanical properties of excimer laser modified titanium surfaces, 18:26705 (R;US)
The effect of processing on the microstructure and tensile properties of a γ-TiAl based alloy, 18:26700 (R;US)

TITANIUM CARBIDES
Summary report of research accomplishments, 18:26750 (R;US)

TRYPANOSOMA
Antigen-detection enzyme-linked immunoassay (Ag-ELISA) as an aid to the diagnosis of animal trypanosomiasis in Tanzania, 18:27581 (RA;XA)
Application of the ELISA antigen-detection technique for the detection of apparent drug resistance trypanosome strains in Senegal, 18:27576 (RA;XA)
Diagnostic methods in trypanosomiasis of livestock, 18:27574 (RA;XA)
Field validation and use of the antigen-ELISA to monitor the effectiveness of a tsetse and trypanosomiasis control campaign in the Gwembe valley, Zambia, 18:27582 (RA;XA)
Improving the diagnosis and control of trypanosomiasis and other vector-borne diseases of African livestock using immunoassay methods: Results of an FAO/IAEA/DGIS coordinated research programme, 18:27573 (R;XA)
The validation of an Ag-ELISA for the diagnosis of trypanosomiasis in cattle in Uganda and its use in assessing the efficacy of a control programme, 18:27580 (RA;XA)
Validation of the antigen ELISA in comparison with parasitological techniques for the diagnosis of bovine trypanosomiasis in Zimbabwe, 18:27583 (RA;XA)

TRYPANOSOMIASIS
Antigen-detection enzyme-linked immunoassay (Ag-ELISA) as an aid to the diagnosis of animal trypanosomiasis in Tanzania, 18:27581 (RA;XA)
Application of the ELISA antigen-detection technique for the detection of apparent drug resistance trypanosome strains in Senegal, 18:27576 (RA;XA)
Diagnostic methods in trypanosomiasis of livestock, 18:27574 (RA;XA)
Diagnostic techniques for animal trypanosomiasis: What future for serology?, 18:27575 (RA;XA)
Evaluation of monoclonal antibody-based antigen detection immunoassays for the diagnosis of trypanosoma congolense and T. vivax in Mali, 18:27579 (RA;XA)
Fate of trypanocidal drugs in cattle (chemotherapy of trypanosomiasis). Kenya: Terminal report. Report prepared for the Government of Kenya, 18:27590 (R;XA)
Field validation and use of the antigen-ELISA to monitor the effectiveness of a tsetse and trypanosomiasis control campaign in the Gwembe valley, Zambia, 18:27582 (RA;XA)
Improving the diagnosis and control of trypanosomiasis and other vector-borne diseases of African livestock using immunoassay methods: Results of an FAO/IAEA/DGIS coordinated research programme, 18:27573 (R;XA)
Prevalence of trypanosomiasis in pastoral camels in the Butana plains, mid-eastern Sudan, 18:27585 (RA;XA)
The use of an antigen-detection ELISA for the diagnosis of trypanosome infections in N'dama cattle in Gambia, 18:27577 (RA;XA)
The use of antigen-detection ELISA (Ag-ELISA) in diagnosing bovine trypanosomiasis and assessing the efficacy of chemotherapy in North West Ghana, 18:27578 (RA;XA)
The use of the antigen ELISA for the monitoring of trypanosomal infections in cattle in Zimbabwe, 18:27584 (RA;XA)
The validation of an Ag-ELISA for the diagnosis of trypanosomiasis in cattle in Uganda and its use in assessing the efficacy of a control programme, 18:27580 (RA;XA)
Use of ELISA in the diagnosis of infection and evaluation of treatment with Cymelarsan in camels infected with Trypanosoma evansi in Kenya, 18:27586 (RA;XA)
Validation of the antigen ELISA in comparison with parasitological techniques for the diagnosis of bovine trypanosomiasis in Zimbabwe, 18:27583 (RA;XA)

TRYPSIN
Quasi-elastic neutron scattering studies of protein dynamics: Progress report, November 1, 1992–May 25, 1993, 18:27909 (R;US)

TSL PROCESS
Run 263 with Black Thunder Mine subbituminous coal and dispersed molybdenum catalysts: Technical progress report, 18:25533 (R;US)

TUBES
See also PRESSURE TUBES
Increasing knowledge of stress corrosion cracking in PWR steam generator tubes combining Eddy current testing and nondestructive analysis of mock-ups, 18:26125 (R;FR)
Measurement of source tube radial position in cast EMC test-beam module, 18:27169 (R;US)
The effect of chlorine on CFB furnace wall tubes, 18:26719 (R;SE;In Swedish)

TUBES (CONDUITS)
See PIPES

TUFF
Heat pipe effect in porous medium, 18:25694 (R;US)

TUMORS
See NEOPLASMS

TUNGSTEN
Atomic mixing of metals, 18:26620 (RA;UA;In Russian)
Radiation effects in thin films on the conducting materials surface, 18:26617 (RA;UA;In Russian)
Radiative effects and properties of refractory metals with the bcc and hcp, 18:26658 (RA;UA;In Russian)

TUNGSTEN FLUORIDES
Multiphoton ionization studies of WF_6 and UF_6, 18:27894 (R;US)

TUNING
Beam pinging, sweeping, shaking, and electron/ion collecting, at the Proton Storage Ring, 18:27165 (R;US)
The effects of temperature and rf power level on the tuning of the water-cooled SSC Low-Energy Booster cavity, 18:27075 (R;US)

TUNNELS
A portable vacuum hammer seismic source for use in tunnel environments, 18:27226 (R;US)
TURBINE BLADES

JMTR REACTOR
PWR TYPE REACTORS
MCNP benchmark analyses of critical experiments for the Space Nuclear Thermal Propulsion program, 18:26205 (R;US)

WATER MODERATOR
See WATER

WATER POLLUTION
The use of aquatic organisms as environmental indicators, 18:27495 (R;SE;In Swedish)
Trace contaminant determination in fish scale by laser ablation technique, 18:27476 (R;US)

WATER SATURATION
A comparison of simulation models for predicting soil water dynamics in bare and vegetated lysimeters, 18:27456 (R;US)

WATER SPRINGS
Sampling and analysis of 100 Area springs, 18:27486 (R;US)

WATER TREATMENT PLANTS
UV disinfection pilot plant study at the Savannah River Site, 18:25820 (R;US)

WATER VAPOR
Laser remote sensing of water: Raman lidar development, 18:27308 (RA;US)
Spectroscopic study of water vapor absorption in the 8- to 14-μm atmospheric window: Measurement of new line and continuum parameters and investigation of far-wind phenomena, 18:27278 (RA;US)

WATER WELLS
Water-level data for selected wells on or near the Idaho National Engineering Laboratory, Idaho, 1983–1990, 18:27484 (R;US)

WATERBORNE PARTICLES
See PARTICULATES

WATT-HOUR METERS
See POWER METERS

WAVE ENERGY CONVERTERS
A parametric costing model for wave energy technology, 18:26054 (R;GB)
Consultancy on review of SEA Clam wave energy device, 18:26058 (R;GB)

Frame design options for a circular clam wave energy device, 18:26057 (R;GB)
Reliability and availability assessments of wave energy devices: Main report, 18:26055 (R;GB)
Reliability and availability assessments of wave energy devices: Supporting appendices, 18:26056 (R;GB)

WAVE PROPAGATION
Geophysical and transport properties of reservoir rocks: Final report for task 4: Measurements and analysis of seismic properties (Wave propagation in a grain packing), 18:25583 (R;US)

WAVEGUIDES
Design of the detuned accelerator structure, 18:27098 (R;US)
Folded waveguide designs for tokamaks, 18:28033 (R;US)
Pulse propagation in inhomogeneous optical waveguides: Progress report, September 15, 1992–September 14, 1993, 18:27218 (R;US)
R and D of transmission lines for ECH system, 18:28013 (R;JP)

WAVES (SHOCK)
See SHOCK WAVES

WAZ 16
See NICKEL BASE ALLOYS

WEAPONS
See also BOMBS
CHEMICAL WARFARE AGENTS
NUCLEAR WEAPONS
Captive flight testing of a kinetic kill vehicle, 18:27243 (R;US)
Destruction of waste energetic materials using base hydrolysis, 18:26867 (R;US)
Environmentally conscious manufacturing life cycle analysis, 18:27367 (R;US)
Pin grid arrays: Final report, 18:27234 (R;US)
Use of the new Los Alamos Pulsed Intense X-Ray (PIXY) for deep-penetration radiography in conventional munitions research and development, 18:27235 (R;US)

WEATHER
Testbed model and single column data assimilation for the Atmospheric Radiation Measurement Program, 18:27294 (RA;US)

WECS
See WIND TURBINES

WEEVILS
See BEETLES

WEINBERG LEPTON MODEL
Topologically stable electroweak flux tubes, 18:27753 (R;XA)

WEINBERG MODEL
See WEINBERG LEPTON MODEL

WEINBERG-SALAM GAUGE MODEL
Radiative corrections in the strongly interacting limit of the standard electroweak model, 18:27757 (R;US)

WELDED JOINTS
Short Cracks in Piping and Piping Welds: Semiannual report, October 1991–March 1992: Volume 2, No. 2, 18:26240 (R;US)
The effect of aging at 343°C on the mechanical properties and microstructure of type 308 stainless steel weldments, 18:26591 (R;US)

WELDS
See WELDED JOINTS

WELLS
See also GEOTHERMAL WELLS
NATURAL GAS WELLS
OIL WELLS
WATER WELLS
An inventory of wells of Oak Ridge National Laboratory 1992, 18:27449 (R;US)

WEST GERMANY
See FEDERAL REPUBLIC OF GERMANY

WESTERN EUROPE
See EUROPE

WESTERN REGION
See USA

WET-TYPE COOLING TOWERS
See COOLING TOWERS

WETLANDS
See also SWAMPS
Mechanisms controlling the production and transport of methane, carbon dioxide, and dissolved solutes within a boreal peatland: Progress report, July 15, 1992–July 14, 1993, 18:27480 (R;US)

WHEAT
Accumulation of dry matter and nitrogen in the developing seeds of high protein mutant lines of Triticum Aestivum (L.) produced by the IAEA, 18:27535 (R;SY;In Arabic)

WHOLE-BODY COUNTERS
Whole body counters operating in Italy: MIDIA 1991 report, 18:27183 (R;IT;In Italian)
Whole body counters operating in Italy: MIDIA 1991 report. Supplement 'Whole body counters technical schedules', 18:27184 (R;IT;In Italian)

WILD ANIMALS
Mass and energy budgets of animals: Behavioral and ecological implications: Annual technical progress report, April 1, 1992–March 31, 1993, 18:27390 (R;US)

WIND
Wind prediction in short term: A first step for a better wind turbine control, 18:26087 (R;DK)
Wind turbines modelling: An introduction to experimental identification, 18:26084 (R;DK)

WIND ENERGY CONVERSION SYSTEMS
See WIND TURBINES

WIND FARMS
See WIND TURBINE ARRAYS

WIND GENERATORS
See WIND TURBINES

WIND POWER
Prospect on new energies.: Wind power generation, 18:26062 (I;JP;In Japanese)
The impact of climate variability on the UK wind resource. Final report, 18:26060 (R;GB)
The impact of climate variability on the UK wind resource. Final report: Appendices, 18:26061 (R;GB)

WIND POWER PLANTS
Development study of a large wind turbine system, Third generation: Final report phase 1 - general conditions, 18:26090 (R;SE;In Swedish)
Operating experiences from small and medium sized wind power plants 1989-1991: Final report, 18:26064 (R;SE;In Swedish)
Prospect on new energies.: Wind power generation, 18:26062 (I;JP;In Japanese)
[Travel to Guatemala to discuss plans to incorporate renewable energy technologies into rural electrification programs]: Foreign trip report, September 16, 1992–October 7, 1992, 18:26003 (R;US)

WIND TURBINE ARRAYS
The effect of rotor characteristics on loading and fatigue life of a WTG in a wind farm, 18:26082 (R;GB)
Wind farm balance of plant costs, 18:26063 (R;GB)

WIND TURBINES
See also HORIZONTAL AXIS TURBINES
VERTICAL AXIS TURBINES

Availability
Availability, reliability and maintainability (ARM) management for wind turbines, 18:26074 (RA;GB)
Safety, reliability and condition monitoring of wind turbines: Proceedings, 18:26069 (R;GB)

Control Systems
Wind turbine control systems modelling and design. Phase I and II: Main report, 18:26080 (R;GB)

Demonstration Plants
Experimental results of wind powered pumping plant with electrical transmission, 18:26068 (R;IT)

Design
Modal survey of the 60m LS-1, 18:26077 (R;GB)
Wind turbine control systems modelling and design. Phase I and II: Main report, 18:26080 (R;GB)

Electric Generators
Modal survey of the 60m LS-1, 18:26077 (R;GB)
Testing of a torque-limiting gearbox on the Ilfracombe MS-2 WTG, 18:26081 (R;GB)

Electromagnetic Radiation
An investigation of the levels of electromagnetic radiation generated by wind turbines, 18:26065 (R;GB)
Gears
Testing of a torque-limiting gearbox on the Ilfracombe MS-2 WTG, 18:26081 (R;GB)
In-Service Inspection
Condition monitoring techniques for composite wind turbine blades, 18:26073 (RA;GB)
Lubricant analysis as an indicator of wind turbine machinery health, 18:26076 (RA;GB)
Thermal inspection of composite structures, 18:26075 (RA;GB)
Induction Generators
Circle diagram approach for self excited induction generators, 18:26088 (R;US)
Mathematical Models
Wind turbine control systems modelling and design. Phase I and II: Main report, 18:26080 (R;GB)
Reliability
Reliability and monitoring in wind engineering, 18:26071 (RA;GB)
Standards
Development of standards and certification relating to the UK, 18:26072 (RA;GB)
Safety and reliability on wind turbines - the Danish rules, 18:26070 (RA;GB)
Surveys
Modal survey of the 60m LS-1, 18:26077 (R;GB)
Turbine Blades
Examination of forced unsteady separated flow fields on a rotating wind turbine blade, 18:26089 (R;US)
Wind
Wind prediction in short term: A first step for a better wind turbine control, 18:26087 (R;DK)
WINDSCALE REPROCESSING PLANT
See SELLAFIELD REPROCESSING PLANT
WIPP
Large-scale brine inflow data report for room Q prior to November 25, 1991, 18:25754 (R;US)
Room Q data report: Test borehole data from April 1989 through November 1991, 18:25753 (R;US)
WIPP supplementary roof support system Room 1, Panel 1: Geotechnical field data analysis report, 18:25700 (R;US)
Waste Isolation Pilot Plant: Site environmental report for calendar year 1991, 18:25699 (R;US)
WIRES
High density harp for SSCL linac, 18:27064 (R;US)
WOLFRAM
See TUNGSTEN
WOOD
Wood biomass gasification: Technology assessment and prospects in developing countries, 18:25969 (R;IT;In Italian)
WOOD ALCOHOL
See METHANOL
WOOD BURNING FURNACES
Biomass energy: State of the technology present obstacles and future potential, 18:25963 (R;US)
WOOD FUELS
Biomass energy: State of the technology present obstacles and future potential, 18:25963 (R;US)
Gasification of wood chips, 18:25953 (R;DK;In Danish)
Long-distance transport of bioenergy fuel to VEGA, 18:25972 (R;SE;In Swedish)
WORKERS

WORKING (MATERIALS)
See MATERIALS WORKING

X

X RADIATION
Magnetic effects in anomalous dispersion, 18:27908 (R;US)
Many-body corrections in XAFS, 18:27867 (R;US)
Resonant x-ray Raman scattering from atoms and molecules, 18:27880 (R;US)
X-2830 RESONANCES
See MESONS
X-RASERS
See X-RAY LASERS
X-RAY DETECTION
Adjustment of a goniometer for X-rays optics calibration in the spectral range 1.5-20 KeV, 18:27173 (R;FR;In French)
X-RAY DIFFRACTION
Interface roughness and x-ray reflectivity, 18:27927 (RA;US)
Resonant x-ray Raman scattering from atoms and molecules, 18:27880 (R;US)
X-RAY EQUIPMENT
See also X-RAY SOURCES
Control of X-ray installations in hospitals, 18:27639 (R;SE;In Swedish)
X-RAY FLUORESCENCE ANALYSIS
X-ray optics for scanning fluorescence microscopy and other applications, 18:26855 (R;US)
X-RAY LASERS
Experimental measurements of selenium x-ray laser spectral line profiles, 18:26958 (R;US)
The Livermore X-ray Laser Program, 18:26953 (R;US)
X-RAY RADIOGRAPHY
Real time radiography of Titan IV booster, 18:27241 (R;US)
X-RAY SOURCES
Real-time spot size camera for pulsed high-energy radiographic machines, 18:25915 (R;US)
X-RAY SPECTROSCOPY
Many-body corrections in XAFS, 18:27867 (R;US)
Recent developments in multiple-scattering calculations of XAFS and XANES, 18:27883 (R;US)
XENON 129 REACTIONS
Complex fragment production and multifragmentation in 60 MeV/u ^{129}Xe-induced reactions, 18:27858 (R;US)

Y

Y*RESONANCES
See BARYONS
Y-12 PLANT
Environmental Restoration Program pollution prevention performance measures for FY 1993 and 1994 remedial investigations, 18:25865 (R;US)
Microcomputer resource inspection/self-inspection program, 18:28121 (RA;US)
Phase 2 Sampling Plan for Chestnut Ridge Operable Unit 2 (Filled Coal Ash Pond/Upper McCoy Branch) at the Oak Ridge Y-12 Plant, Oak Ridge, Tennessee: Environment Restoration Program, 18:25696 (R;US)
RCRA closure plan for the Bear Creek Burial Grounds B Area and Walk- In Pits at the Oak Ridge Y-12 Plant, Oak Ridge, Tennessee, 18:25695 (R;US)
YANG-MILLS THEORY
1992 Trieste lectures on topological gauge theory and Yang-Mills theory, 18:27736 (R;XA)
Generating functional for Donaldson invariants and operator algebra in topological D=4 Yang-Mills theory, 18:27743 (R;RU)
YIELDS
Field survey of information on energy policy in the Pacific region.: China as a whole, 18:26454 (RA;JP;In Japanese)
YTTERBIUM 151
Experiments using the Argonne Fragment Mass Analyzer, 18:27037 (R;US)
Research at the Fragment Mass Analyzer at ATLAS, 18:27830 (R;US)
YTTERBIUM 174
Analysis of the nonstatistical behaviour of the radiative strength function at capture of thermal and resonance neutron, 18:27855 (R;RU;In Russian)

YTTRIUM 89 TARGET
Complex fragment production and multifragmentation in 60 MeV/u ^{129}Xe-induced reactions, 18:27858 (R;US)
YTTRIUM ALUMINIUM GARNETS
See ALUMINIUM OXIDES
FERRITE GARNETS
YTTRIUM BASE ALLOYS
Nuclear dynamical diffraction using synchrotron radiation, 18:27912 (R;US)
YTTRIUM HYDRIDES
First-principles studies of phase stability and the structural and dynamical properties of hydrogen-metal systems: Final report, 18:26752 (R;US)
YTTRIUM OXIDES
High-resolution Z-contrast imaging and hole concentration mapping of YBCO thin films, 18:26748 (R;US)
YUCCA MOUNTAIN
Current plans to characterize the design basis ground motion at the Yucca Mountain, Nevada Site, 18:25682 (R;US)
Heat pipe effect in porous medium, 18:25694 (R;US)
JAC3D – A three-dimensional finite element computer program for the nonlinear quasi-static response of solids with the conjugate gradient method: Yucca Mountain Site Characterization Project, 18:25752 (R;US)
Modeling of strongly heat-driven flow processes at a potential high-level nuclear waste repository at Yucca Mountain, Nevada, 18:25729 (R;US)
Preliminary capillary hysteresis simulations for fractured rocks – model development and results of simulations, 18:25728 (R;US)
Yucca Mountain Site Characterization Project Technical Data Catalog, 18:25697 (R;US)

Z

Z NEUTRAL BOSONS
Electroweak physics from D0, 18:27796 (R;US)
Z PINCH DEVICES (LINEAR)
See LINEAR Z PINCH DEVICES
ZEA MAYS
See MAIZE
ZEOLITES
The importance of zeolites in the potential high-level radioactive waste repository at Yucca Mountain, Nevada, 18:27430 (R;US)
[Experimental and kinetic modeling of acid/base and redox reactions over oxide catalysts]: Technical progress report, 18:26858 (R;US)
ZERO POWER REACTORS
Experimental testing of the Monte Carlo calculations for prompt neutron lifetime dependence on reactivity of a fast reactor with slowing-down reflector, 18:26306 (R;RU;In Russian)
ZHURAVLEV PROCESS
See COAL GASIFICATION
ZINC
In situ Raman spectroscopy of lithium electrode surface in ambient temperature lithium secondary battery: Final report, 18:26401 (R;US)
ZINC COMPLEXES
Ultrafast photoinduced electron transfer reactions in supramolecular arrays: Studies of electronic coupling and solvation, 18:25995 (R;US)
ZINC OXIDES
Hot gas desulfurization with sorbents containing mixed metal oxides: Final report, October 1, 1990–December 31, 1992, 18:25536 (R;US)
ZIRCONIUM
High purity zirconium obtainment through the iodine compounds transport method, 18:26843 (IA;AR;In Spanish)
The creep of zirconium and Zr-1%Nb alloy under non-stationary irradiation by helium ions, 18:27924 (RA;UA;In Russian)
The effect of noble gas implantation of corrosion of metals and alloys, 18:26663 (RA;UA;In Russian)
The mechanism of cascade vacancy loop nucleation in HCP zirconium, 18:26613 (RA;UA;In Russian)
Uranium determination in zirconium, 18:26842 (IA;AR;In Spanish)
Zirconium behaviour in nitric medium, 18:26584 (R;FR;In French)
ZIRCONIUM BASE ALLOYS
Anisotropy
Anisotropy of irradiation strengthening of textured zirconium alloys H-1 and H-2.5, 18:26686 (RA;UA;In Russian)
The structural-phenomenological description of plastic anisotropy of H-1 and H-2.5 alloys, subjected to reactors irradiation, 18:26685 (RA;UA;In Russian)
Corrosion
The effect of noble gas implantation of corrosion of metals and alloys, 18:26663 (RA;UA;In Russian)
Creep
The creep of zirconium and Zr-1%Nb alloy under non-stationary irradiation by helium ions, 18:27924 (RA;UA;In Russian)
Diffusion
Changes in zirconium microstructure and properties under LOCA simulation conditions, 18:26682 (RA;UA;In Russian)
Ion Implantation
The effect of noble gas implantation of corrosion of metals and alloys, 18:26663 (RA;UA;In Russian)
Microstructure
Changes in zirconium microstructure and properties under LOCA simulation conditions, 18:26682 (RA;UA;In Russian)
Oxidation
Changes in zirconium microstructure and properties under LOCA simulation conditions, 18:26682 (RA;UA;In Russian)
The mechanism and mathematical model of nodule (spot) corrosion of zirconium alloys, 18:26690 (RA;UA;In Russian)
Physical Radiation Effects
Anisotropy of irradiation strengthening of textured zirconium alloys H-1 and H-2.5, 18:26686 (RA;UA;In Russian)
Investigation and prediction of cladding materials deformation behaviour under rapid heating, 18:26696 (RA;UA;In Russian)
Irradiation effect on corrosion cracking of WWER reactors fuel element claddings ion iodium and cesium iodide medium, 18:26679 (RA;UA;In Russian)
Radiation growth of zirconium alloys, 18:26684 (RA;UA;In Russian)
Resistance to destruction of zirconium tubes in technological channels with account of radiation creeping and delayed hydrogen failure, 18:26695 (RA;UA;In Russian)
Second phase inclusion effect on the mechanism of irradiation nodula corrosion of the unswelling alloys, 18:26691 (RA;UA;In Russian)
Study of crack initiation and propagation mechanism on SCC of Zr-1%Nb VVER fuels, 18:26692 (RA;UA;In Russian)
The creep of zirconium and Zr-1%Nb alloy under non-stationary irradiation by helium ions, 18:27924 (RA;UA;In Russian)
The structural-phenomenological description of plastic anisotropy of H-1 and H-2.5 alloys, subjected to reactors irradiation, 18:26685 (RA;UA;In Russian)
Pitting Corrosion
Second phase inclusion effect on the mechanism of irradiation nodula corrosion of the unswelling alloys, 18:26691 (RA;UA;In Russian)
The mechanism and mathematical model of nodule (spot) corrosion of zirconium alloys, 18:26690 (RA;UA;In Russian)
Stacking Faults
Investigation of quench induced faults in the hcp crystalline structure of zirconium alloys, 18:26678 (RA;UA;In Russian)
Stress Corrosion
Irradiation effect on corrosion cracking of WWER reactors fuel element claddings ion iodium and cesium iodide medium, 18:26679 (RA;UA;In Russian)
Study of crack initiation and propagation mechanism on SCC of Zr-1%Nb VVER fuels, 18:26692 (RA;UA;In Russian)
Ultimate Strength
Investigation and prediction of cladding materials deformation behaviour under rapid heating, 18:26696 (RA;UA;In Russian)

Wear Resistance
Strength of technological channel tubes, 18:26683 (RA;UA;In Russian)
Yield Strength
Anisotropy of irradiation strengthening of textured zirconium alloys H-1 and H-2.5, 18:26686 (RA;UA;In Russian)
ZIRCONIUM CARBIDES
A thermokinetic model describing the vaporization behavior of $U_xZr_{1-x}C_{1-y}$ in hydrogen, 18:26758 (R;US)
Overview of fuel element development and mass loss rate experiments on uranium–zirconium carbide fuel, 18:26207 (R;US)
ZIRCONIUM IODIDES
Phase structure and microhardness of zirconium irradiated with carbon, nitrogen and boron ions, 18:26645 (RA;UA;In Russian)
ZIRCONIUM OXIDES
Combustion synthesis and engineering of nanoparticles for electronic, structural and superconductor applications: Annual progress report, December 1, 1992–May 31, 1993, 18:26749 (R;US)
Rheology and microstructure of concentrated zirconia-alumina suspensions for gelcasting composites, 18:26743 (R;US)
Synthesis of ceramic oxide powders in a microwave plasma device, 18:26761 (R;US)
Thermogravimetry for optimization of chloride pyro hydrolytic separations in zirconia-magnesia matrix, 18:25625 (R;BR;In Portuguese)

Contract Number Index

Numbers assigned to DOE contracts announced in documents in this publication are listed. Contract numbers are sorted alphanumerically and list the primary corporate author of the document cited, the citation number, and the report number or other document identification.

Contract No.	Abstract No.	Report No.

Report Number Index

The report number index consists of the alphanumeric identifiers assigned to report literature as well as patent and conference literature cited in this publication. Entries provide the abstract number; the source(s) of availability of the document; the GPO file prefix for GPO depository library documents; the order number for OSTI and NTIS report ordering purposes; and, if the document was distributed under the DOE distribution program, the category number is shown for paper copy (PC), microfiche (MF), or no distribution (ND). These categories are included to assist DOE librarians in responding to requests for reports in their collections. The index also lists secondary numbers, with the corresponding abstract numbers and cross-references to other identifying numbers.

Codes Used on Index Lines

Following the citation numbers in the Corporate Author, Personal Author, and Subject Indexes, codes are used to designate the type of document, country of publication, and language of the document, e.g., (R;SU;In Russian). The language designator does not appear if the document is published in English.

ORDER FORM

DOE and DOE Contractors: Fill in Parts I, II, and IV. **Others:** Fill in Parts I, III, and IV. Mark appropriate blanks in Part IV to indicate quantity and form (microfiche or paper copy).

I. SHIPPING AND PAYMENT INFORMATION

Ordering Address

Name _____ Telephone _____

Address _____

City _____ State _____ Zip _____

Shipping Address (if different from above)

Name _____

Address _____

City _____ State _____ Zip _____

_____

SIGNATURE (Required to validate ALL orders)

II. OSTI ORDERS (DOE and DOE contractors can order from OSTI.)

☐ Charge OSTI deposit account no. _____

Mail orders to: U.S. Department of Energy
Office of Scientific and Technical Information
P.O. Box 62
Oak Ridge, TN 37831

III. NTIS ORDERS

☐ Charge NTIS deposit account no.

☐ Check/Money Order enclosed for $

☐ Charge to my ☐ American Express ☐ VISA ☐ Mastercard

_____ _____
Account Number **Card expiration date**

☐ Ship and Bill (see below for restrictions)

Employer identification number (9 digits) _ _–_ _ _ _ _ _ _

Purchase Order number _____

Phone number of billing office _____
(Required for Ship & Bill orders)

Ship & Bill service is restricted to North American business locations for an extra $7.50 per order (or per Custom Search). The business' employer identification number plus the phone number of the office paying the bill are required to process these requests. A late payment charge will be applied to billings more than 30 days overdue. Prepaying, using an NTIS Deposit Account or a charge account, speeds order processing. Be sure payment and order are sent together. Checks, payable to NTIS, must be in U.S. dollars.

Mail orders to: U.S. Department of Commerce
National Technical Information Service
5285 Port Royal Road
Springfield, VA 22161

IF NO METHOD OF PAYMENT IS INDICATED, YOUR ORDER WILL BE RETURNED TO YOU AS A PRICE QUOTE UNPROCESSED.

Federal Depository Library Program

As a result of an agreement between the U.S. Government Printing Office (GPO) and the Department of Energy, beginning in 1984 DOE reports with unlimited distribution are now included in the Federal Depository Library Program. The Regional Depository Libraries listed below receive and retain at least one copy of nearly every Federal Government publication, either in printed or microfilm form, for use by the general public. These libraries provide reference services and interlibrary loans; however, they are not sales outlets. You may wish to ask your local library to contact a Regional Depository to help you locate specific publications, or you may contact the Regional Depository yourself. Do not send checks or orders to these libraries.
